

Sustainable Energy Division State of New Hampshire, Public Utilities Commission

21 S. Fruit Street, Suite 10, Concord, NH 03301-2429

STEP 1: REBATE PRE-APPROVAL APPLICATION

FOR RESIDENTIAL BULK-FUEL FED WOOD-PELLET CENTRAL BOILERS AND FURNACES

**Because the application requires an original notarized signature,
it will not be accepted if submitted electronically.**

The Public Utilities Commission (the Commission) requires pre-approval for any New Hampshire homeowner seeking a rebate payment of 30% of the system and installation cost, or \$6,000, whichever is less, for investments in residential high-efficiency (85% or greater), **bulk-fuel fed** indoor wood-pellet central heating boilers and furnaces that become operational, serving designed intent and installer-certified, between April 14, 2010 and February 15, 2012, or when funds run out, whichever comes first. Rebates for the residential central pellet heating system program are not available for systems installed prior to April 14, 2010.

Pre-approval will reserve your place in the funding queue. Once the system has been installed at the owner's residence, the homeowner must then complete and submit the **Step 2: Rebate Request Form**. The rebate pre-approval expires three months from the date this application is approved or February 15, 2012, whichever comes first, or when funds run out. The goals of the program are to:

- a. Stimulate economic development through market expansion of local fuels and manufacturing.
- b. Create and retain jobs, particularly in a clean-energy field.
- c. Expand the market of available wood-pellet central heating systems.
- d. Increase sales and installation of these systems.
- e. Develop a stable and competitive wood-pellet bulk-fuel delivery infrastructure.
- f. Reduce fossil-fuel use for home heating.
- g. Reduce emissions from fossil fuels.

Funds for this program are made available through the American Recovery and Reinvestment Act – State Energy Programs.

Please submit application and all associated documents to:

Sustainable Energy Division
New Hampshire Public Utilities Commission
21 S. Fruit Street, Suite 10
Concord, NH 03301-2429

TERMS AND CONDITIONS

Please read the Terms and Conditions carefully prior to completing the form.

Any applicant requesting a rebate payment for any renewable energy system is responsible for meeting all terms and conditions of the program as follow:

1. The rebate payment is 30% of the system cost and installation, or \$6,000, whichever is less.
2. The rebate pre-approval expires three months from the date this application is approved or February 15, 2012, whichever comes first, or when funds run out. One three-month extension will be granted to individuals who provide the Commission with a written request stating a reasonable need for the extension and the expected date of installation completion. Extensions granted after November 15, 2011 must be completed by February 15, 2012, or before all funds have been expended.
3. Applicants must complete a Final Rebate Request Form (Step 2) to receive a rebate payment.
4. The wood-pellet central boiler or furnace system must be located within the applicant's New Hampshire primary residence. Second homes do not qualify. A primary residence is defined as the place where the NH resident lives the majority of the calendar year and is used as the residential basis for tax or voting purposes. Owner-occupied apartment buildings of four units or less qualify for this program; all other multi-family buildings do not.
5. This rebate payment must be used for the installation of new, commercially available, high thermal efficiency¹, bulk-delivery capable wood-pellet central boilers and furnaces utilized as a central heating system where:
 - a. **The system** has a thermal efficiency rating of 85% or greater².
 - b. **The particulate matter emissions rating is 0.32 lb/MMBtu heat output.**³
 - c. **Basic attributes include:**
 - i. The heating system turns itself on in response to a demand for heat.
 - ii. The heating system is designed to be capable of being located inside the residence, either in a basement or a room designed specifically to accommodate the heating system, although if space does not permit, it may be installed in a separate structure.
 - iii. The heating system modulates to lower output and/or turns itself off when the heating load decreases or is satisfied.
 - iv. The system automatically cleans the burn chamber and the heat exchanger.
 - v. Based on the consumption of premium pellet fuel, ash may be required to be automatically or manually removed from the system about once per month, but the owner or operator must not be required to rake, poke, brush, or scrape any surfaces.
 - vi. Other routine maintenance, including cleaning, may be required annually and is strongly recommended.
 - vii. Fuel can be automatically conveyed from the bulk storage container/area (device) to the burn chamber in a planned/integrated path without operator intervention of any sort.
 - d. **Bulk fuel capability features include:**
 - i. The heating system has built-in fuel conveyance capability that can be pneumatic (suction) or mechanical (auger) or a combination of two transport mechanisms from the bulk storage device. The fuel conveyance can also be an add-on feature as long as it allows for seamless and safe conveyance of fuel from the storage device to the burn chamber without operator intervention of any sort;
 - ii. The heating system can convey fuel from almost any appropriately adapted bulk storage device to allow flexibility in placement and design. The heating system shall not be restricted to any one bulk storage device, for instance one made by the same manufacturer as the appliance;

¹ For the purposes of this program, high efficiency is defined as boilers/furnaces that operate at a minimum of 90% lower heating value (LHV) or 85% higher heating value (HHV) of wood. Efficiency rates may be determined by third party testing laboratories approved and recognized by authorities having jurisdiction in the United States, Canada, and/or the European Union.

² The New Hampshire Residential Central Pellet Heating System Rebate requirements are more stringent than those allowed under the federal tax credit. The federal program offers tax credits for systems with a lower efficiency value of 75%. According to a recently commissioned NYSERDA report, boilers at 90% represent the top 25% of the European market.

³ Emissions may be determined by third party testing laboratories approved and recognized by authorities having jurisdiction in the United States, Canada, and/or the European Union.

- iii. The pellet-fuel storage bin shall have a minimum capacity of three tons; and,
 - iv. Pellet fuel storage bin access (by pipe or auger or both) is located 100 feet or less from the street or driveway.
- e. **Key safety features include:**
- i. There is a positive closure and/or fire extinguishing device and/or emergency disconnection device between the burn chamber and the bulk storage device to keep the fire from reaching the bulk pellets.
 - ii. The fuel fill pipe to the storage bin must be grounded or anti-static.
- f. **Wood pellet fuel** is a condensed, uniformly sized form of biomass energy. Wood pellets are compressed by-products from the forest products industry, often woodchips and sawdust. Voluntary industry standards for wood pellets have been specified by the [Pellet Fuels Institute](#).
- g. **A central heating system** provides warmth to the whole interior of a building (or portion of a building), through an air or water distribution system, from one point to multiple rooms, not direct space heating. A pellet central boiler or furnace to be funded under this rebate program must be capable of being the home's only or primary central heating system, though it may also provide domestic hot water through a heat exchanger and may be interconnected with a supplemental solar hot water heating system. There may also be other supplemental space heating sources or interconnected back-up systems in the home, though none should be required.
6. The wood-pellet central boiler and furnace system must be installed by a qualified installer who is a sole proprietorship, company, corporation, limited liability company, or other organization authorized to conduct business in the State of New Hampshire that is normally commercially engaged in the installation of wood-pellet central boiler and furnace systems or who is a licensed New Hampshire plumber who has received training in the installation of the system installed.
 7. Only systems that become operational between April 14, 2010 (the date of Governor & Council approval and February 15, 2012, are eligible. Systems installed before April 14, 2010 are not eligible for this rebate program. Residents receiving this rebate may combine other local, state, or federal financial incentives with this rebate, but must meet the requirements of this rebate program.
 8. Outdoor wood-fired hydronic heaters (OWHH) "or outdoor wood boilers" subject to [RSA 125-R](#) are not eligible for this program. Wood pellet stoves, regular stick or cord wood stoves, and cord wood boilers and furnances are not eligible for this program.
 9. Replacement or expansion of system components does not constitute an eligible project unless it includes installation of a new eligible boiler.
 10. Do-It-Yourself installations do not qualify.
 11. Used parts cannot be included in the cost of the wood-pellet central boiler or furnace system used to calculate the incentive payment. The boiler or furnace and conveyance system must be new.
 12. Residents who choose to install systems, in whole or in part, prior to approval by the Commission may still apply for this rebate payment by submitting both the Step 1 and Step 2 applications, but the rebate payment is conditioned on meeting the requirements listed herein and available funding.
 13. Any wood-pellet central boiler or furnace system must comply with all manufacturers' requirements and the State Building Code pursuant to [RSA 155-A:1, IV](#) including the National Electric Code 2008 and any applicable local codes or ordinances.
 14. Any wood-pellet central boiler or furnace system is subject to inspection and monitoring by the Commission, the State Fire Marshal and local code authorities or their agents for safety and performance
 15. Rebates are subject to the availability of funds; complete applications will be processed in the order in which they are received.
 16. All program requirements and documentation must be complete and submitted in order to receive approval for a rebate payment. Payment of the rebate may be subject to inspection of the facility by an agent of the Commission, NH Office of Energy and Planning, NH Office of Economic Stimulus, US Department of Energy, and/or US Office of Management and Budget to confirm that the system is operational⁴ and consistent with the application, with appropriate advance notice to the owner.
 17. Certain information, including rebate recipients names, system details, town or zip code, and total costs of systems installed with program support, may be available to the public and may be publicly posted. Additional information may be released

⁴ For the purposes of this grant, *operation* is defined as providing at least 75% of home heating load needs.

upon official request. Specific personal information including Social Security number, telephone numbers, and email addresses will remain confidential to the extent permitted under State law.

18. The Commission reserves the right to request system performance data for a period of ten (10) years after issuing the rebate.
19. The rebate recipient may be liable to the State of New Hampshire for the entire amount of the rebate if the rebate is obtained fraudulently.
20. Any rebate received under this program may be treated as taxable income by the IRS. It is the responsibility of the recipient of this rebate payment to consult with his or her tax advisor to determine the correct tax treatment of these payments. Applicants who do not provide their social security number on the Step 2: Final Rebate Request Form will not be eligible for reimbursement.
21. If the dwelling is located in a locally designated historic district, the applicant may be required to receive approval for the installation of this heating system and/or the bulk storage system through the applicable local Historic District Commission.
22. The rebate covers the entire installed system, including pellet storage and conveyance, boiler, controls, and installation, up to the point where the system interconnects with the dwelling's heat distribution system.

For questions regarding this rebate program, e-mail rcphsrebates@puc.nh.gov.

APPLICANT INFORMATION

Name: _____
 Mailing Address: _____
 Town/City: _____ State: _____ Zip Code: _____
 Installation Address (if different): _____
 County: _____
 Telephone: _____ Cell: _____
 Email address: _____
 Federal Congressional District (if known): [District 1](#) [District 2](#)

Briefly state your primary reason for installing a pellet central heating system:	
---	--

DWELLING INFORMATION

	YES	NO
Is your dwelling located within a locally designated historic district?	<input type="checkbox"/>	<input type="checkbox"/>
In what year was your dwelling originally built?		
If your dwelling is located in a locally designated historic district, the Commission requests that you seek approval from your local historic commission.		

Please indicate the type of dwelling being used for the installation:
 Single family home Duplex/Townhouse Condo Other

INFORMATION ON THE EXISTING HEATING SYSTEM

FUEL USED:	Oil <input type="checkbox"/>	Natural Gas <input type="checkbox"/>	Propane <input type="checkbox"/>	Wood <input type="checkbox"/>
	Electric <input type="checkbox"/>	Other <input type="checkbox"/> (please describe)		
Approximate Annual Fuel Use:				
Approximate Age of System:				
Rated Burner or System Efficiency:				
Source of Rating: (e.g. your oil service company) or your new heating system installer):				

INSTALLATION INFORMATION

Anticipated start date:		Anticipated date of completion:	
Rated Efficiency of New System:			

NEW HEATING SYSTEM INFORMATION

Manufacturer:		Product Name/Model:	
Please indicate if your new heating system will be a boiler or a furnace.		Boiler: <input type="checkbox"/>	Furnace: <input type="checkbox"/>
What size is your new heating system (Btu/hour)?			

PELLET FUEL STORAGE SYSTEM INFORMATION

Manufacturer:		Product Identification:	
Capacity (tons):			
Conveyance: (how the pellets get from the storage vessel to the heating system)			

INSTALLER

Installer Name:		Company:	
Mailing Address:			
Town/City:		State:	Zip Code:
Telephone:		Email:

Company Type:	HVAC <input type="checkbox"/>	Plumbing <input type="checkbox"/>	Other <input type="checkbox"/> Describe: <input type="text"/>
Has the installer completed approved manufacturer or distributor installation training?		Yes <input type="checkbox"/>	No <input type="checkbox"/>
If the installation is being done by a NH licensed plumber please provide the license number.			

WOOD-PELLET CENTRAL BOILER AND FURNACE SYSTEM INFORMATION**REQUIRED ATTACHMENTS**

These items (copies) must be attached to the application:	Attached
Signed contract with qualified installer	<input type="checkbox"/>
Photos of the old system	<input type="checkbox"/>
Installer's certification or approved authorization from the manufacturer or distributor	<input type="checkbox"/>

Note: For the **STEP 2: REBATE REQUEST FORM** you will be expected to provide paid invoices, pictures of the final installation, including both the heating system and the storage system, a copy of your building permit and documentation that the system has been inspected by a local building code official and/or sign-off from a local fire jurisdiction.

REBATE CALCULATION

Project Components	
Appliance (Boiler or Furnace)	\$
Fuel Storage Bin	\$
Fuel Conveyance	\$
Controls & Circulators	\$
Labor	\$
Other*	\$
Total Project Cost	\$
NH Incentive (30% of system costs up to \$6,000, whichever is less)	\$
Total Incentive Requested	\$

*Other eligible components up to the point of interconnection with heat distribution system.

DECLARATION

The Undersigned applicant declares under penalty of perjury that:

- 1) the applicant intends to purchase and install the wood-pellet central boiler or furnace system described in this application;
- 2) the applicant has read and understands the terms and conditions set forth in this application with attachments and has agreed to abide by those requirements;
- 3) the information provided in this form is true and correct to the best of the applicant's knowledge;
- 4) the applicant agrees that the system and documents supporting the application may be audited and inspected by the Commission or an agent of the Commission; and,
- 5) the applicant gives permission to the PUC to contact the applicant's installer in order to notify the installer of pre-approval of the rebate.
