| #   | QUESTION  | ANSWER   |
|-----|---|--|
| 12. | BERC has been working with several facilities in northern New Hampshire to help them study and install biomass energy systems. Several of them are looking for funding for the next stage of study or towards implementation of a project. What are the grant parameters for the New Hampshire Public Utilities Commission's renewable energy grants? | This RFP is for the installation of actual projects, of which biomass as a fuel source is eligible. Please read the RFP for further details: the parameters are listed therein. Feel free to ask us future questions of a specific nature. |
| 13. | Friends - I just review the PUC RFP cited above and it appears that thermal-only use of biomass (heating a commercial structure) is <u>not</u> an eligible renewable energy use for the RFP. Is that correct?   | Biomass projects that produce only useful thermal energy are eligible under this RFP. Please refer to Question and Answer #2.  |
