

RFP for Renewable Energy Projects in the C&I Sector
Released 2/25/2011
Questions and Answers

#	QUESTION	ANSWER
20.	<p>I am working on plans for a 350 bed dorm in Keene, NH.</p> <p>This is commercial, but also residential. Is it possible that it fits this program?</p>	<p>That size multi-unit apartment or dorm building would be considered commercial and may be eligible to qualify for funding under this RFP. Other determining factors include technology and the capacity (kW) of the project. If the project is a solar one and 100 kW or less, it would not qualify for this RFP but would likely qualify for a rebate under the Commission's Commercial and Industrial Rebate Program. More information on the rebate program may be found here: http://www.puc.nh.gov/Sustainable%20Energy/RenewableEnergyRebates-CI.html</p>
21.	<p>Are you ineligible if you don't increase the renewable energy credits (RECs)? We would cut our electrical use in 1/2 with the renewable energy method but not sure if you would get credits that way? That is, would geothermal not qualify but just solar energy?</p>	<p>Please see Answers #2 and #10.</p>
