Dear Mr. Getz:

Enclosed for Commission review and approval under 47 U.S.C. Section 252(e) are amendments to the above-referenced cellular interconnection agreements previously approved by the Commission.

The approved interconnection agreements were negotiated under circumstances where the NYNEX billing system was unable to charge time-of-day rates to Commercial Mobile Radio Service (CMRS) carriers for calls placed by CMRS customers for termination on the NYNEX network utilizing Type 2A interconnection service. Accordingly, the negotiated charge in the interconnection agreements for Type 2A termination reflects a composite rate based on an assumption that 70% of the traffic is day, 20% is evening and 10% is night/weekend.

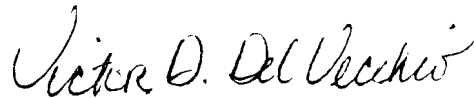

Effective June 1, 1997, uniform billing systems were implemented throughout the NYNEX region that provide the capability for charging for Type 2A termination based on actual time-of-day calling. We anticipate that the change in billing structure will have minimal financial impact on the payments a CMRS carrier makes to NYNEX.

Because the time-of-day rates represent a change in the applicable rate structure set forth in the CMRS interconnection agreements, the enclosed amendments are filed for Commission approval.

Thank you for your attention to this matter.

Very truly yours,

Victor D. Del Vecchio
