

# North Country Wind

Coos County

# North Country Wind

Coos County

# Benefits of the project

- Project cost of \$470 million will add significant new tax revenue to Coos county.
- Jobs created during construction phase are in the hundreds.
- 10-15 permanent jobs
- “Anchor” tenant for a new transmission loop.

# 180 MW wind project

- Location: Town of Dix's Grant, Dixville
- Developer: Wagner Forest Management
- ISO Queue #280 filed October 2, 2008
- Site Control: Have land leases to cover entire project from wind sites to existing Coos transmission loop
- Two meteorological towers have been collecting wind data on site for over 1 year

# Timeline

- Continuing to collect wind data from two existing towers, may add several more towers next summer.
- Further development work is predicated on the resolving the transmission issue in the north country.
