RE: Docket No. IR 15-124
Investigation into Potential Approaches to Ameliorate Adverse Wholesale Electricity
Market Conditions in New Hampshire

Responses of Eversource Energy to Staff Request

Dear Attorney Speidel:

On August 20, 2015, the Commission Staff issued the below question to Public Service
Company of New Hampshire d/b/a Eversource Energy (“Eversource”) via email.

Assuming that the only EDCs that ultimately participate in
contracts with Access Northeast are those that are part of either
Eversource or National Grid, please provide the load ratio share for
each affiliated EDC that would be the basis for allocation of 100%
project costs.

In response to this proposed hypothetical, Eversource provides the following. Below are
the percentages assuming only National Grid and Eversource (noted as NU) companies
participate. The intent would be to adjust these downward for participation by other
EDCs/States.

NU	EDC Load Ratio	Share of Access Northeast	Total Infrastructure 900 (MDth/day)
CL&P	19.35%	27%	243
WMECO	3.03%	4%	38
NSTar	17.55%	25%	221
PSNH	6.60%	9%	83
Total NU	46.53%	65%	585
NGRID			
Mass Elec	18.23%	25%	229
NP - Nantucket	0.13%	0%	2
Narragansett Electric	6.66%	9%	84
Total NGRID	25.02%	35%	315
Total NU + Ngrid	71.55%	100.00%	900

If you have any questions, please do not hesitate to contact me. Thank you for your assistance with this matter.

Very truly yours,

/s/ Matthew J. Fossum
