Dear Mrs. Howland

June 17, 2008

I am writing this note with grave concern about the proposed hike in our water bill. This will have a terrible impact financially on my family. With the price of fuel for heating and driving we have been struggling just to maintain. If an increase of 360% percent passes we will not be able to afford the luxury of water. I have spoke with many community members who also share the same feelings. Those who can afford it have talked about putting in a well. Unfortunately for my family that is not an option.
