RE: DW 08-052

Dear Ms. Howland,

The Birch Hill Water District (BHWD) requests intervenor status on the permanent and temporary rate proceedings filed by the Pittsfield Aqueduct (PAC) company in the referenced document.

The Birch Hill Water District is a village district within the Town of Conway consisting of about 230 full time and part time residents. Water to the BHWD is provided by PAC, and consequently the requested rate increase will impact all residents within the district. In order to fully understand the impact the rate increase will have on residents as well as any alternative actions we request the intervenor status.

Thank you for your assistance in this matter.

Yours truly,

A handwritten signature in black ink that reads "Kirk W. Smith".
