Public Utilities Commission,

In response to the recent proposal by Pennichuck Water Works increases in rates I find their requests to be highly unrealistic and

places a heavy burden upon us consumers, who have no other choice of service providers. I sympathize with the increases that

they could be facing due to the economy, or upgrades they have needed to do. But ultimately, upgrades they make will in some

cases benefit them, particularly where they have expanded service. Yet I maintain, this is a **HUGE** increase!! It places an unfair

burden upon us customers, those of whom would be willing to support a more fair increase to maintain water purity obviously.

I ask that the commission reject their request of a 25.2 percent overall increase. Please consider us middle class who are also

feeling the strains from all different directions. Let's work towards something more reasonable!

I thank you all in advance. I appreciate your efforts.

Warmly,

Lucila Goldthwaite
