Subject: Proposed rate increases

I just received a flyer with my bill and it announced the proposal to the NH PUC and I am shocked that it could be approved at the rates that are stated. I live on a fixed SS income and my cost of living allowance from Social Security doesn't increase by that much. With the economy in the dire straights that it is in now, it seems unreal to expect us to come up with that much of an increase. And if Mr. Nobama gets in there (God forbid!!!!) we will have less and less to live on.

How does the PUC expect someone to come up with an additional 25.27% a year increase in their water bill. This if passed will just give the other utility companies the go ahead to do the same thing. I am opposed to this increase at the rates offered. I hope that others in the affected area are as upset as I am.

My name is Linda Twombly and I live at 120 East Hobart St Nashua.
