Board of Directors  
Eastman Sewer Company

Dear Board,

I am presenting you with an estimate to install a chlorination system for the lagoon pump station. Scope of services are on the following page.

Thank You,

Joseph P. Damour, President

Scope of work:

1. Remove existing single door on the East side of the lagoon pump station building.
2. Install new five foot wide double door in place the removed single door.
3. Clean the concrete floor and walls of the Lagoon Pump Station.
4. Seal the floor and the wall with a sealer.
5. Apply one coat of Top Coating after base sealer.
6. Install 50 gallon Chemical day tank.
7. Install new 300 gallon plastic storage tank with fill piping connections.
8. Install one new injection tap for chemical feed.
9. Install new chemical transfer pump with piping between storage tank and day tank.
10. Install Control box and PVC conduit for electrical and control wiring.

Our proposal includes all the labor and materials to have fully functioning bulk chemical feed system.

We will perform the above installation for a lump sum of \$5,000.00. We will require a deposit of \$2,000.00 before proceeding.
