Re: DE 09-243, DE 09-244, DE 09-245, DE 09-246 and DE 09-247, New Hampshire Electric Cooperative, Inc. Certification Applications for Class II Eligibility Pursuant to RSA 362-F on behalf of homeowners Ralph E. Ralston, Carl A. McNall, Shawn L. Wilder, Kimball L. Bergstrom and Fred G. Lavigne

Dear Mr. McNeil:

On November 30, 2009, you submitted applications on behalf of homeowners Ralph E. Ralston, Carl A. McNall, Shawn L. Wilder, Kimball L. Bergstrom and Fred G. Lavigne requesting certification of customer-sited rooftop photovoltaic facilities as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the applications and recommended approval noting that the applications were complete on November 30, 2009.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The applications indicate that the facilities are customer-sited photovoltaic rooftop arrays located in New Hampshire and that they began operation in 2009. The details for each facility are listed in the table on the following page.

Commission Assigned Docket #	Facility Owner	Facility Location	Operation Date <sup>1</sup>	Total kW listed in application (DC Arrays)	NH Certification code
DE 09-243	Ralph E. Ralston	31 Hickorywood Dr., Meredith, NH	June 16, 2009	3.10	NH-II-09-063
DE 09-244	Carl A. McNall	155 Tilton Haley Rd., Center Sandwich, NH	August 25, 2009	3.28	NH-II-09-064
DE 09-245	Shawn L. Wilder	158 Tallow Hill Rd, Plainfield, NH	August 26, 2009	3.36	NH-II-09-065
DE 09-246	Kimball L. Bergstrom	236 Mica Mine Rd, Claremont, NH	September 2, 2009	2.28	NH-II-09-066
DE 09-247	Fred G. Lavigne	407 Diamond Ledge Rd., Center Sandwich, NH	September 25, 2009	3.28	NH-II-09-067

Since the facilities are customer-sited sources, their output is not recorded in the NEPOOL Market Settlement System and, as a result, their output must be monitored and verified by an independent monitor. The applications state that NHEC will monitor the facilities' output as required by N.H. Code of Admin. Rules Puc 2505.08.

Based on Staff's recommendation, the Commission has determined that NHEC has provided all the necessary information to demonstrate that the facilities are eligible for certification as Class II facilities. Therefore, the Commission hereby certifies that the Ralph E. Ralston, Carl A. McNall, Shawn L. Wilder, Kimball L. Bergstrom and Fred G. Lavigne facilities are Class II renewable energy sources effective November 30, 2009 and are eligible to be issued New Hampshire Class II renewable energy certificates.

The New Hampshire Renewable Portfolio Standard certification codes for the NHEC solar photovoltaic facilities are listed in the previous table.

Sincerely,

Debra A. Howland  
Executive Director

<sup>1</sup> NHEC considers the operation date listed in the table above, and in Appendix E of each application, to be the date on which NHEC inspected the facility and installed a revenue quality meter to record the electricity that will be eligible for Class II RECs. The date listed in each interconnection application pertains to the installation and interconnection of the facility and may be different than the operation date listed in the above table.
