

UNITIL ENERGY SYSTEMS, INC.

**DIRECT TESTIMONY OF
LINDA S. MCNAMARA**

New Hampshire Public Utilities Commission

Docket No. DE 10-028

June 11, 2010

TABLE OF CONTENTS

I. INTRODUCTION	Page 1
II. PURPOSE OF TESTIMONY	Page 1
III. RETAIL RATE CALCULATIONS	Page 2
IV. BILL IMPACTS	Page 6
V. CONCLUSION	Page 7

LIST OF SCHEDULES

Schedule LSM-1: Redline Default Service Tariff

Schedule LSM-2: G1 Class Retail Rate Calculation – Power Supply Charge

Schedule LSM-3: G1 Class Retail Rate Calculation – Renewable Portfolio Standard
Charge

Schedule LSM-4: Bill Impacts

1 **I. INTRODUCTION**

2 **Q. Please state your name and business address.**

3 A. My name is Linda S. McNamara. My business address is 6 Liberty Lane West,
4 Hampton, New Hampshire 03842.

5

6 **Q. For whom do you work and in what capacity?**

7 A. I am a Senior Regulatory Analyst I at Unitil Service Corp. ("USC"), which
8 provides centralized management and administrative services to all Unitil
9 Corporation's affiliates including Unitil Energy Systems, Inc. ("UES").

10

11 **Q. Please describe your business and educational background.**

12 A. In 1994 I graduated *cum laude* from the University of New Hampshire with a
13 Bachelor of Science Degree in Mathematics. Since joining USC in June 1994, I
14 have been responsible for the preparation of various regulatory filings, including
15 changes to the default service charges, price analysis, and tariff changes.

16

17 **Q. Have you previously testified before the New Hampshire Public Utilities
18 Commission ("Commission")?**

19 A. Yes.

20

21 **II. PURPOSE OF TESTIMONY**

22 **Q. What is the purpose of your testimony in this proceeding?**

1 A. The purpose of my testimony is to present and explain the proposed changes to
2 UES' G1 Large General Service Class Default Service Charge ("DSC") effective
3 August 1, 2010, as reflected in the redline tariff provided as Schedule LSM-1.

4

5 **III. RETAIL RATE CALCULATIONS**

6 **Q. What is the proposed G1 Class DSC?**

7 A. Schedule LSM-1, Page 1, shows the proposed G1 Variable DSC of \$0.07439 per
8 kWh in August 2010, \$0.06343 per kWh in September 2010, and \$0.06309 per
9 kWh in October 2010. There is no fixed option DSC for the G1 class.

10

11 The proposed DSC are comprised of two components, as shown on Schedule
12 LSM-1, Page 1: A Power Supply Charge and a Renewable Portfolio Standard
13 ("RPS") Charge.

14

15 **Q. What is the proposed Power Supply Charge and RPS Charge?**

16 A. Schedule LSM-1, Page 1, shows the proposed G1 Variable Power Supply Charges
17 of \$0.07220 per kWh in August 2010, \$0.06124 per kWh in September 2010, and
18 \$0.06090 per kWh in October 2010.

19

20 Also shown on Schedule LSM-1, Page 1, is the proposed G1 Variable RPS
21 Charge of \$0.00219 per kWh in August, September, and October 2010. As stated

1 above, the total proposed default service charges are \$0.07439, \$0.06343, and
2 \$0.06309 per kWh in August, September, and October 2010, respectively, which
3 are the sum of the Power Supply and the RPS Charges for each month.
4

5 **Q. How do the G1 DSC compare to the current rate?**

6 A. The current DSC, based on a simple three-month average, is \$0.07066 per kWh.
7 The proposed rate, based on a simple three-month average, is \$0.06697 per kWh.
8 This is a decrease of \$0.00369 per kWh, on average, from the current rate. The
9 decrease reflects current market prices.
10

11 **Q. Please describe the calculation of the G1 class DSC.**

12 A. The rate calculations for the Variable Power Supply Charges are provided on
13 Schedule LSM-2, Page 1. The rate calculations for the Variable RPS Charges are
14 provided on Schedule LSM-3, Page 1. Both charges are calculated in the same
15 manner.
16

17 The Variable Charge is calculated by dividing the costs for each month, including
18 a partial reconciliation of costs and revenues through January 31, 2010¹, by the

¹ In its March 12, 2010 filing, UES provided the G1 Class reconciliation balance as of January 31, 2010, as adjusted, for both the Power Supply Charge and the RPS Charge. UES apportioned the Power Supply Charge balance of (\$32,250) over the twelve month period May

1 estimated G1 kWh purchases for the corresponding month. An estimated loss
2 factor of 4.591% is then added to arrive at the proposed retail Variable Charges.

3

4 **Q. Have you provided support for the total forecast costs shown on Page 1,**
5 **line 2 of Schedule LSM-2?**

6 A. The details of forecasted costs included in the Power Supply Charge for the
7 period August through October 2010 are provided on Schedule LSM-2, Page
8 2. Line items for the various costs included in default service are shown and
9 include: Total G1 Class DS Supplier Charges, GIS Support Payments, Supply
10 Related Working Capital, Provision for Uncollected Accounts, Internal
11 Company Administrative Costs, Legal Charges, and Consulting Outside
12 Service Charges.

13

2010 through April 2011, based on kWh, as follows: (\$8,550) in May-July 2010, (\$8,504) in August-October 2010, (\$7,612) in November 2010-January 2011, and (\$7,583) in February-April 2011. As shown on Schedule LSM-2, Page 1, the Power Supply Charge reconciliation amount used in this filing is (\$8,504). UES apportioned the RPS Charge balance of \$49,175 over the twelve month period May 2010 through April 2011, based on kWh, as follows: \$13,038 in May-July 2010, \$12,967 in August-October 2010, \$11,608 in November 2010-January 2011, and \$11,563 in February-April 2011. As shown on Schedule LSM-3, Page 1, the RPS Charge reconciliation amount used in this filing is \$12,967.

1 **Q. Have you provided support for the total forecast costs shown on Page 1,**
2 **line 2 of Schedule LSM-3?**

3 A. The details of forecasted costs included in the RPS Charge for the period
4 August through October 2010 are provided on Schedule LSM-3, Page 2.
5 Costs include Renewable Energy Credits (“RECs”) and the associated
6 Working Capital.

7
8 **Q. How is working capital calculated?**

9 A. Working capital included in the Power Supply Charge equals the sum of
10 working capital for Total G1 Class DS Supplier Charges plus GIS Support
11 Payments, as shown on Schedule LSM-2, Page 2. It is calculated by
12 multiplying the product of Total G1 Class DS Supplier Charges plus GIS
13 Support Payments and the number of days lag divided by 365 days (i.e. the
14 working capital requirement) by the monthly prime rate.

15
16 The calculation of working capital for RECs is included in the RPS Charge
17 and is shown on Schedule LSM-3, Page 2. It is calculated by multiplying the
18 product of RECs and the number of days lead divided by 365 days (i.e. the
19 working capital requirement) by the monthly prime rate.

20

1 The calculation of working capital included in the Power Supply Charge and
2 the RPS Charge both rely on the results of the 2009 Default Service and
3 Renewable Energy Credits Lead Lag Study. The G1 class Power Supply
4 Charge working capital calculation uses 13.72 days and the G1 class RPS
5 Charge working capital calculation uses (297.66) days.

6

7 **IV. BILL IMPACTS**

8 **Q. Have you included any bill impacts associated with the proposed rate**
9 **changes?**

10 A. Schedule LSM-4 provides typical bill impacts as a result of changes to the G1
11 Class DSC. Impacts presented on Schedule LSM-4 isolate the impact on typical
12 bills due to the proposed change in the DSC. Excluded from these comparisons
13 are the proposed temporary rates filed in DE 10-055 for effect July 1, as well as
14 the annual change to UES' Stranded Cost Charge and External Delivery Charge
15 which UES expects to file on June 17 for effect August 1.

16

17 Page 1 provides a table comparing existing rates to the proposed rates for the G1
18 class, as well as the impact on a G1 class typical bill. Page 2 of Schedule LSM-4
19 provides the typical bill impacts for the G1 class for a range of usage levels,
20 comparing proposed rates to current rates. As shown, G1 class customers who do
21 not choose a competitive supplier will see decreases of approximately 3.4 percent

1 depending upon usage. These impact analyses are based upon the simple three-
2 month average DSC. Page 3 of Schedule LSM-4 is a comparison of the proposed
3 rates to rates in effect during the same period last year. Similar to Page 2, it
4 provides the typical bill impacts for the G1 class for a range of usage levels and
5 the DSC used is based upon the simple three-month average. As shown, G1 class
6 customers who do not choose a competitive supplier will see decreases ranging
7 from 3.8 to 4.9 percent, depending on usage, compared to last year. This decrease
8 is primarily due to a change in the reconciliation balance.

9

10

11 **V. CONCLUSION**

12 **Q. Does that conclude your testimony?**

13 **A.** Yes, it does.

NHPUC No. 3 - Electricity Delivery
Unitil Energy Systems, Inc.

CALCULATION OF THE DEFAULT SERVICE CHARGE

(R)

G1 Class Default Service:	May-10	Jun-10	Jul-10	Total	Aug-10	Sep-10	Oct-10	Total
Power Supply Charge					As shown on Schedule LSM-2, Page 1
