Re: DE 10-157, Conservation Services Group's Application for Class II Eligibility of the Kirwan Enterprises Photovoltaic Facility Pursuant to RSA 362-F on behalf of Kirwan Enterprises, LLC

Dear Ms. Stanton:

On June 2, 2010, Conservation Services Group (CSG) submitted an application on behalf of Kirwan Enterprises, LLC requesting certification of the Kirwan Enterprises customer-sited photovoltaic facility (Kirwan facility) as eligible to produce Class II renewable energy certificates (RECs), pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval, noting that the application was complete on June 30, 2010.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The application indicates that the Kirwan facility is a 151.05 kilowatt customer-sited photovoltaic rooftop array located at 180 Enterprises Drive, Marshfield, Massachusetts that began operation on September 14, 2009. The facility's New England Power Pool (NEPOOL) Generation Information System facility code is NON 32920.

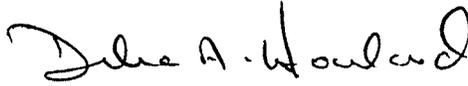

Since the facility is a customer-sited source, its output is not recorded in the NEPOOL Market Settlement System and, as a result, its output must be monitored and verified by an independent monitor. The application states that PowerDash, LLC will

monitor the facility's output as required by the New Hampshire Code of Administrative Rules Puc 2505.09.¹

Based on Staff's recommendation, the Commission has determined that CSG has provided all the necessary information to demonstrate that the facility is eligible for certification as a Class II facility. Therefore, the Commission hereby certifies that the Kirwan facility is a Class II renewable energy source effective June 30, 2010 and is eligible to be issued New Hampshire Class II renewable energy certificates.

The New Hampshire Renewable Portfolio Standard certification code for the Kirwan photovoltaic facility is NH-II-10-092.

Sincerely,

A handwritten signature in black ink that reads "Debra A. Howland". The signature is written in a cursive style with a large, looped initial "D".

Debra A. Howland
Executive Director

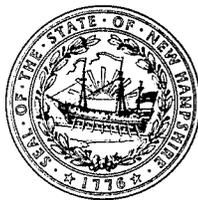

¹ In October 2009, the Massachusetts Department of Energy Resources approved PowerDash as an independent third party meter reader pursuant to the NEPOOL GIS Operating Rule 2.5 (j).

Re: DE 10-157, Conservation Services Group's Certification of the Kirwan Enterprises Photovoltaic Facility as a New Hampshire RPS Class II Facility Pursuant to RSA 362-F
New Hampshire Certification Code NH-II-10-092

Dear Mr. Webb:

Please be advised that, pursuant to RSA 362-F, the New Hampshire Public Utilities Commission has certified the Kirwan Enterprises photovoltaic facility (Kirwan facility) as a Class II renewable energy source effective June 30, 2010. Accordingly, the Kirwan facility is eligible to be issued New Hampshire Class II renewable energy certificates.

The Kirwan facility is a 0.151 megawatt (MW) customer-sited photovoltaic rooftop array located at 180 Enterprise Drive, Marshfield, Massachusetts that began operation on September 14, 2009. PowerDash, LLC, the facility's independent monitor, will verify and report to the New England Power Pool Generation Information System (NEPOOL GIS) the facility's behind-the-meter electrical output using facility code NON 32920 pursuant to the NEPOOL GIS Operating Rules. The facility's New Hampshire certification code is NH-II-10-092.

Sincerely,

A handwritten signature in cursive script that reads "Debra A. Howland/jael".

Debra A. Howland
Executive Director
