Subject: Berlin Biomass Plant

NH PUC,

As a NH resident not connected in any way with the Berlin Biomass Plant project, I want to encourage you consider second and third order affects as well as lowest possible price. Sure we can get dirty coal from out of state, or dirty oil from some of the most politically noxious places around the world, but those come with their own costs. They are just not reflected in their low price. Just because it's cheap does not mean it is good for us.

I appreciated you looking out for our pocket book, and expect you to make sure power generators do not rip us off, but low prices should not be the only consideration.

Thank you,
Duncan Domey
Wilmot NH
