STATE OF NEW HAMPSHIRE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION

HAMPSTEAD AREA WATER COMPANY, INC

DW 10-

PETITION FOR ACQUISITION OF ASSETS AND FOR APPROVAL OF FINANCING

The Petitioner, Hampstead Area Water Company, Inc. (HAWC), respectively petitions the N.H. Public Utilities Commission (Commission) for acquisition of assets and for approval of financing for additions and upgrades to the System assets, and for the construction costs of a pumphouse to service wells within the System. In support of this Petition, HAWC says:

- HAWC is presently franchised in most areas of Hampstead and Atkinson, New
 Hampshire, and has franchised satellite systems in various towns in Rockingham County
 (see Schedule A, attached).
- 2. That as part of the Company's water source planning, the Company is seeking to acquire the Settlers Ridge wells that were installed by Lewis Builders Development, Inc. (LBDI), an affiliated company, as part of its Hydrology Study, as well as the proposed pumphouse to serve the Settlers Ridge wells.
- 3. That LBDI has estimated the construction costs for the pumphouse, including the wells, as shown on Exhibit 1.
- 4. That the cost of the Settlers Ridge Wells is shown on Exhibit 2. This information had been previously submitted to the Commission as part of the Hydrology Study in docket DW 10-134.
- 5. That HAWC is seeking approval for the financing this acquisition of assets and will be borrowing the monies from LBDI.
- 6. That the total amount of the financing provided by LBDI will be \$536,505.00.

- 7. In support of the financing request, HAWC proposes that the financing for the wells and the construction of the pumphouse for the Settlers Ridge wells will enhance the System's plant and water supply.
- 8. It would be in the public good for HAWC to have approval of this request.

HAWC provides the following in support:

- a. Upgrading HAWC'S Water System will enable HAWC to better serve its customers.
- b. Modernizing its supply wells ensures its customers will have a consistent and reliable water supply.

See the Pre-filed Testimony of Stephen St. Cyr attached as Exhibit 3.

9. That the Company proposes to have a Promissory Note with a term of Twenty (20) years, with an interest rate calculated to be 2.25 % above the prime rate for the last quarter prior to approval, adjusted every Three (3) years (currently the prime rate is 3.25%, which would make the interest rate 5.50%). The Company is assuming that the loan begins January 1, 2011. (See attached Proposed Note, Exhibit 4, attached, as well as the Prefiled Testimony of Stephen St. Cyr attached as Exhibit 3).

WHEREFORE your Petitioner prays:

- A. That the Commission find that it would be in the public good for the HAWC to be permitted to acquire the assets and to finance the wells and pumphouse installation, as proposed;
- B. That the Commission, by appropriate order, grant the HAWC permission to acquire the assets and to finance the wells and pumphouse installation, as proposed;

C. That the Commission make such further findings and orders as may be appropriate on the circumstances.

Dated the 8th day of September, 2010

Respectfully submitted,

HAMPSTEAD AREA WATER COMPANY, INC.

Christine Lewis Morse

Vice President

Description of Work Performed September 1 – December 31, 2008:

Pumping Tests on two Settlers Ridge Wells HWC-SR3 and HWC-SR4

- Site visits with NHDES representatives.
- Preparation of letters to obtain access to private domestic wells for water level monitoring.
- Construction, installation, and monitoring of weir in creek.
- Installation of four piezometers.
- Installation of groundwater monitoring equipment in wells, piezometers, surface water stations, domestic wells, and public water supply wells.
- Monitoring water levels throughout the pumping test program (around 30 days) at a total of 29 locations (including nine domestic wells and two public water supply wells).
- Conduct two rounds of bacteriological sampling of domestic wells (before pumping test and after pumping test).
- Removal of pump from Dill domestic well to recover-water-level transducer.
- Conduct simultaneous pumping tests on wells HWC-SR3 and HWC-SR4 (eight days of pumping of HWC-SR4 and seven days pumping of HWC-SR4).
- Complete EPA SWDA water quality analyses Wells HWC-SR3 and HWC-SR4.
- Field meetings, project supervision, meetings with individual homeowners, and multiple discussions with NHDES and HAWC personnel.

Water quality analyses

<u>Eastern Analytical</u> — testing water samples for chloride, nitrate, pH, specific conductance, metals, arsenic, iron, manganese, sodium, hardness, VOCs (4 samples each); total coliform and E.Coli (20 samples each).

One total coliform and E.Coli sample from the Dill domestic well.

Two water samples collected and analyzed for the following parameters: uranium, gross alpha compliance, perchlorate, radium 226, radium 228, synthetic organic compounds, and radon gas.

National Testing Labs – WaterCheck with pesticide option (6 samples)
