## 1. Introduction

The Liberty Utilities (“Liberty”) Information Technology (“IT”) Migration Plan is a companion document to the IT Plan and serves as the governing instrument for the transfer of all IT services, systems, software and support National Grid employs on behalf of Granite State Electric and EnergyNorth. The IT Migration Plan contains Liberty’s detailed (a) schedules for each application transfer, (b) comprehensive test plans and schedules for each application transfer, (c) roles and responsibilities of National Grid, Liberty and Liberty’s suppliers and providers, (d) a change management process to govern all modifications to the application software set, the provisioning methods, the selected suppliers and providers and (e) an issues management/remediation process to resolve differences between the involved parties. Since the IT Migration plan requires the completion of detailed scoping for all projects, it is intended that the IT Migration plan will be updated by August 1, 2012.

The IT Plan and IT Migration Plan should be read together and shall be interpreted collectively. In other words, while the IT Plan provides the overarching principles, processes, and guidelines for Liberty’s IT infrastructure, the IT Migration Plan provides the specific project level detail for the New Hampshire transition.

## 2. IT Migration Plan Methodology

The IT Migration Plan was developed within the framework of Liberty’s transition management process, which is outlined in section 4.6 of the IT Plan. The process began with the development of a Summary Migration Plan (see Figure 1) jointly created by the Liberty IT Team, National Grid IT Team and the TMO (Transition Management Office) with input from the various Business Leads. This summary plan was then used to develop specific IT Application Planning Templates (see Appendix A), which are used to guide the IT migration strategy approach. These templates serve as a starting point in the planning process for identifying areas requiring more detailed planning and monitoring. The Application Templates then inform the IT Migration Plan on the transfer of all IT services, systems, software and support. It should be noted that the Migration Plan, which will ultimately include detailed scopes and test plans, will be updated as projects are scoped in their entirety (approximately August 1, 2012).

*Figure 1 -Summary Migration Plan*

Task Name	% Complete	Duration	Start	Finish
<input type="checkbox"/> New Hampshire IT Migration Plan	15%	699 days	Tue 3/1/11	Fri 11/1/13
<input type="checkbox"/> Technology Selection Process	100%	34 days	Wed 6/1/11	Mon 7/18/11
<input type="checkbox"/> Workshops	100%	26 days	Mon 1/16/12	Mon 2/20/12
<input type="checkbox"/> Governance Committee	40%	699 days	Tue 3/1/11	Fri 11/1/13
<input type="checkbox"/> IT Steering Committee	25%	524 days	Tue 11/1/11	Fri 11/1/13
<input type="checkbox"/> Staffing	91%	206 days	Mon 7/4/11	Mon 4/16/12
<input type="checkbox"/> IT Application Implementation	9%	575 days	Mon 8/22/11	Fri 11/1/13
<input type="checkbox"/> Finance (ERP)	91%	160 days	Mon 8/22/11	Fri 3/30/12
<input type="checkbox"/> Work Management (ERP)	0%	325 days	Mon 4/2/12	Fri 6/28/13
<input type="checkbox"/> EHSS	28%	43 days	Wed 2/1/12	Fri 3/30/12
<input type="checkbox"/> Engineering & Operations	6%	326 days	Wed 2/1/12	Wed 5/1/13
<input type="checkbox"/> Meter to Cash	1%	437 days	Thu 3/1/12	Fri 11/1/13
<input type="checkbox"/> Regulatory	55%	43 days	Wed 2/1/12	Fri 3/30/12
<input type="checkbox"/> Network & Infrastructure	76%	197 days	Tue 11/1/11	Wed 8/1/12

The section below describes Liberty's IT Migration planning methodology and adds further details on its components.

The goal of the application transfer process is to ensure that applications are transferred to Liberty from National Grid in a seamless manner with minimal customer and user disruption.

Liberty follows the System Development Life Cycle (SDLC) framework for all application implementations. This framework provides a sequence of activities for system implementers to follow. It consists of a set of steps or phases in which each phase of the SDLC uses the outputs of the previous phase as its inputs and is often referred to as the waterfall approach.

The SDLC adheres to important essential phases, such as requirements analysis, design, configuration, data conversion, training, testing and implementation. These phases can be characterized as follows:

➤ Requirements

Requirements analysis is critical to the success of the system implementation. The process looks at those tasks that go into determining the needs or conditions of all stakeholders to be met by the new application. The Requirements are documented, actionable,

measurable, testable, traceable, related to identified business needs or opportunities, and defined to a level of detail sufficient for system design.

➤ Design

The focus of the design phase is on how to deliver the required functionality of the system. It should describe the desired features and operations in detail, including screen layouts, business rules, process diagrams, and other documentation where appropriate. The output of this stage will describe the new systems as a collection of modules or subsystems. The design stage takes as its initial input the requirements identified in the approved requirements document. For each requirement, a set of one or more design elements will be produced as a result of interviews and/or workshops.

➤ Configuration

The configuration phase converts the design into a complete information system. Tools are used within the application to set up and configure business data, views, roles, security, and establish rules and business processes.

➤ Data conversion (where appropriate)

Data conversion involves exporting data from one system, mapping and transforming it and importing it into another system. The objective is to maintain all of the data, and as much of the embedded information as possible.

➤ Training

In order to have successful user acceptance testing, end users must be trained on the functions of the system prior to testing. Each user is required to understand and execute the steps required to perform the necessary transactions to perform their job.

➤ Testing

Testing brings all the pieces together into a specific testing environment, then checks for errors, bugs and interoperability. The end result of testing demonstrates that the configured system conforms to the requirements as specified. Testing is executed by quality assurance staff and end users.

➤ Implementation

Deployment of the application into a production environment for final use by the user community is the final phase.

Each of these steps is undertaken for all of the IT implementations related to Granite State and EnergyNorth. Liberty's detailed planning process for the New Hampshire IT Migration also addresses the following areas:

➤ Technology Selection Process

The technology selection process involves accessing and taking an inventory of the IT systems used by National Grid and Liberty. Where gaps exist, potential vendors are identified and the vendor selection process is followed. The inventory of National Grid applications (see Appendix F) was used to ensure that all existing functionality was addresses in Liberty's Application Architecture.

➤ Workshops

Joint workshops were attended by National Grid and Liberty to develop the summary plan. The workshops identify the approach both IT and functional business teams will use for later detailed planning.

➤ Committee Establishment

The Transition Governance and IT Steering committees are established with individuals appointed and recurring meetings arranged.

➤ Staffing Requirements

Staffing involves the development of an IT organization chart and the recruitment and hiring of required resources.

The IT Migration Plan for New Hampshire encompasses the above mentioned phases. The plan has responsibility assigned and progress is tracked to each task. Through monitoring of the plan risks can be identified and actions taken, to ensure a successful migration is achieved.

### 3. Testing Approach

A critical component of the IT Migration Plan is testing. Liberty's approach to testing is to establish comprehensive test plans and schedules for each application transfer that will ensure end-user and customer satisfaction, as well as eliminating business interruption during and after application implementation.

Testing constitutes several distinct phases. The testing phase of the migration plan is initiated with the development and documentation of an overall **test strategy**. The test strategy outlines the scope of the test, roles and responsibilities of participants, standards and processes to follow, timelines, test scenarios and a reporting process to acquire final approval and sign off to proceed. The end result of the test strategy is a set of detailed testing scripts/cases created that address each requirement from the project, such as the sample test script provided in Appendix C. All tests scripts are logged on the test control sheet (see Appendix B). The test control sheet acts as a monitoring tool to evaluate the progress of testing. Through testing and verifying each requirement, confidence can be achieved that all needs of the application are met and functioning as desired.

The second phase of testing consists of generating **test cycles**. Through several cycles of testing, problems are identified, corrected and re-tested through the rigorous testing cycles. As many as four cycles may be performed with each cycle increasing in duration. This method of testing reduces the overall time to bring an application migration to implementation readiness.

The final phase of testing entails **user acceptance testing** (UAT). UAT enables the actual end-users/customers to use documented test scenarios and their own testing to facilitate the implementation approvals of the application. Only after business approval has been received can an application proceed to production.

In following with the SDLC process adopted by Liberty, once all of the business requirements have been identified and documented, the test plans can be created for each IT application implementation. The detailed IT Migration Plans allows for time to develop the testing strategy and create the necessary test scripts.

## 4. Roles and Responsibilities

In order to ensure a smooth transition, Liberty has established a comprehensive Governance Approach that is used for managing all new acquisitions. Oversight of IT projects falls within this overall Governance Structure, a summary of which is depicted in Figure 2 below. The Granite State and Energy North structure is depicted below, and involves the following key elements:

### 4.1 Transition Steering Committee

This Committee is made up of Senior Executives from Liberty and National Grid. It meets bi-weekly to review progress and resolve issues (if any) that cannot be resolved at lower levels in the organization. They have ultimate accountability for all aspects of the transaction.

## **4.2 Transition Governance Group**

This Committee is comprised of David Pasioka (President, Liberty Utilities), Tim Horan (Regional President, National Grid), Victor Del Vecchio (President, Liberty Utilities New Hampshire), Bob Wood (Transition Executive, Liberty Utilities), Madalyn Hanley (IT Transition Executive, National Grid), Dan Saad (Vice President Operations, Liberty Utilities New Hampshire) and Scott Campbell (Program Manager).

This committee meets on a bi-weekly basis. They review project status, progress, issues and risks and they are responsible for resolving issues and securing resources that cannot be resolved by the various project teams.

## **4.3 Transition Management Office**

The Transition Management Office (TMO) oversees the transition and integration of all new Liberty acquisitions. This group works with the functional leads from Liberty and the selling organizations to ensure that each acquisition is transitioned in a smooth and seamless way. The group is responsible for ensuring that each transition is properly planned, that progress is monitored and that issues and risks are identified and resolved in a timely manner. In the case of the New Hampshire transition, a full time Program Manager has been assigned to support the various teams and committees. The TMO supports the broader organization in developing appropriate plans. They also collect and summarize weekly status reports, identify risks and issues, conduct 'readiness assessments' and provide reports to the Governance and Steering Committees. The Governance Model and Project Management approach established by this group has been applied to both the Day 1 planning process, the Day N planning process and the IT planning process.

## **4.4 IT Steering Committee**

The IT Steering Committee is responsible for implementing the IT Applications and Infrastructure Plans. The Committee is made up of IT Executives and Senior Managers from both Liberty and National Grid. These individuals control the resources and operations required to implement the IT plan or have the authority to secure additional resources that may be required during the lifecycle of their projects. The Liberty members of this group have management responsibilities for running Liberty's IT operation. The National Grid representatives have been dedicated by National Grid to support the IT Transition and work with Liberty to ensure that the IT projects are properly planned, staffed and executed. The TMO has assigned a resource to support this committee and to ensure proper reporting of progress, issues and risks to the Transition Governance Group.

## **4.5 Functional Team Leads**

The Functional Team Leads are local Executives and Senior Managers who are responsible for running the New Hampshire operations once the transaction closes. These managers have designated counterparts at National Grid who are responsible for delivering Transition Services

under the TSA's and who are accountable to support the Liberty Utilities New Hampshire Team as they implement the Day 'N' plans. Figure 2 below

#### **4.6 IT Transition Executive, National Grid**

This position is held by Madalyn Hanley. Her responsibilities include: contributing to the development of the transition plans; managing the National Grid IT Resources assigned to the transition; securing additional National Grid IT resources (if needed); working with National Grid Business Leaders to ensure they are delivering the appropriate TSA services. Madalyn chairs the IT Steering Committee and is a member of the Transition Governance Group and reports to the Transition Steering Committee as required.

#### **4.7 Director IT, Liberty Utilities**

This position is held by David Carleton. He is responsible for developing Liberty's IT Strategy; setting IT standards and policies; managing the Liberty IT Group; managing Liberty's IT Vendors. David is a member of the IT Steering Committee.

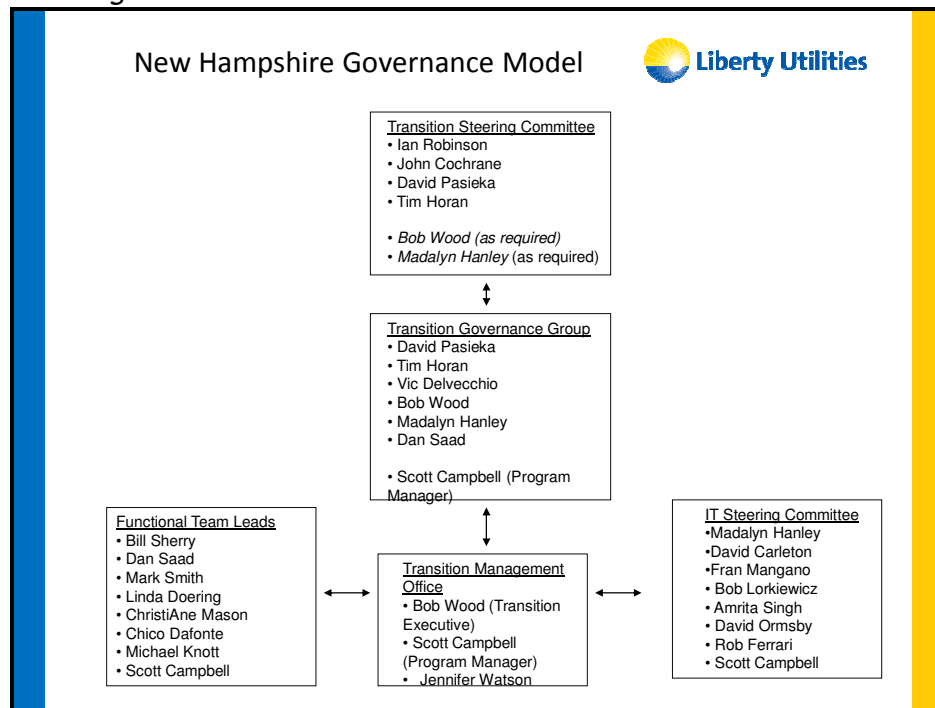

#### **4.8 Program Manager, Liberty Utilities**

This position is held by Scott Campbell. He is responsible for assisting all project teams and Team Leads who are working on the New Hampshire Transition, and he is responsible for monitoring and reporting the progress on all plans. He coordinates and supports the various Governance and Steering Committees and plays a key role in assessing project readiness.

#### **4.9 Project Manager(s)**

There are several Project Managers involved with the IT Migration; each assigned to a major IT Project. Project Managers are responsible for developing their project plans; completing weekly status reports; managing the activities of their teams and managing the activities of any vendors involved in their project. They are accountable for all project deliverables from their team and they are jointly responsible with their project sponsor for project success.

Figure 2 - Transition Governance Committee Structure

## 5. Change Management

The change management process governs all modifications to the original IT Migration plan as it relates to scope, vendors, resources, timelines, and cost. It is important that changes are executed in a controlled manner in order to mitigate risk and maintain a repository of knowledge about the current status of the project and its elements. Change management serves to minimize the occurrence of unintended affects.

Potential changes to the original plan should first be identified through the project status reporting mechanism. Here the potential change should be described and include the impact to all affected areas of the project. Following that, when the project manager deems one of the above mentioned changes is required, a project change request is completed and submitted to the TMO (see Appendix D).

The change request form outlines the details of the change, the reason for such change and the impact to the project and related functional areas. The TMO reviews the change for completeness and submits the change during the weekly IT Steering Committee meeting. The appropriate function

business representatives will be invited to such meetings. The change will be described in detail and reviewed by the group. They will assess the benefit and impact of the requested change and once agreement has been established, will be approved and authorization will be granted to proceed with the change. If agreement cannot be established, the change will be escalated up to the Governance Committee for resolution.

## 6. Issues Management

An issues management/remediation process is in place should issues arise during the course of a project. Issues are first identified by project managers on the project status report. The report must address the following:

- Date issue raised
- Impact
- Severity (H/M/L)
- Correction action
- Owner tasked with resolution
- Date resolution required
- Status

These status reports are submitted to the TMO. The TMO will begin by taking all issues to the weekly IT Steering Committee where they will be debated and an attempt will be made to resolve the issue. If resolution cannot be achieved, the TMO will escalate the issue to the Governance Committee. The means to achieve this is through highlighting all open issues and risks on the bi-weekly governance report (see Appendix E). This report is distributed to the Governance Committee and used as the basis for this team's bi-weekly meeting. Direction given by the Governance Committee will be communicated back down to the team.

## 7. Detailed IT Migration Plan

The detailed IT Migration plan was developed using Microsoft Project. This tool was used to effectively plan, collaborate and deliver the IT migration. It provides a way to effectively manage a wide range of tasks within the overall project. The view of the IT Migration plan is in Gantt chart format and illustrates the IT Migration project schedule.

The Gantt chart lists the required task to be executed by using descriptive names. The tasks are organized into phases by creating a hierarchy. This is referred to as the work breakdown structure.

This is represented on the Gantt chart as a tree structure with tasks that are similar being shown as indented.

The duration column represents the time required to complete each task. Start and finish dates show the dates during which the task is being worked on. The Gantt chart also shows the dependency relationships between activities. As tasks are worked on the Gantt chart is used to show current schedule status using percentage of completion. Individual task completion as well as overall project status can be determined at any given time.

Each of the above mentioned elements was incorporated into the detailed IT Migration Plan developed below:

### *IT Migration Plan - New Hampshire*

Task Name	% Complete	Duration	Start	Finish
<input checked="" type="checkbox"/> <b>New Hampshire IT Migration Plan</b>	5%	765 days	Mon 02/05/11	Fri 04/04/14

## 8. Conclusion

Through the careful management of the migration process by the Transition Management Office and the collaborative efforts of the IT teams, the IT Migration Plan described above and specifically outlined through the appendices will allow the successful migration of data from National Grid to Liberty seamlessly with minimal customer interruption.

Test Control Sheet

Test	Test Series / Type	Assigned To	Iteration	Status	Tester	Completed Date	Pass / Fail	Fail Severity	Issue	Details/config change	Detail Test Documents Link	Script Modified During testing
	General Ledger	Blank										
1	Create General ledger Accounts (Cards) Posting Accounts	Jennifer A	1	Not Started					For corporate only			
2	Create General Ledger Batch: Setup single use Setup recurring use  Process Transactions: Enter standard journal entries Enter reversing journal entries Enter correcting journal entries Copy a journal entry  Print batch edit report and validate posting entries  Post batch(s) Verify postings using inquiries	Linda, Paul, Joe	5	Completed	Linda, Paul, Joe, Jim	2/27/2012, 3/9/2012	Pass		Failed Feb 27, Nolan IC module incorrectly generating IC transactions. Steve A deleted template and reimported. Tested Mar 9, IC module is correctly working			
3	Create a Quick Journal Template ID  Print edit report and validate posting entries Process the Quick Journal	Linda, Paul, Joe	2	Completed	Joe, Jim, Linda	27/02/2012	Pass					
		Linda, Paul, Joe	2		Joe, Jim, Linda	27/02/2012	Pass					
4	Create a SmartList	Linda, Paul, Joe	5	Completed	Joe, Jim, Paul	27/02/2012	Pass					
5	Export & Import Budgets • Multiple Fiscal Years • Departmental Budgets	Linda, Paul, Joe	1	Completed	Paul	27/02/2012	Pass					
6	Enter Budget Transactions	Linda, Paul, Joe	5	Not Started					For corporate only			
	Payables	Blank										
7	Create new vendors (Cards)	Rich F	5	Completed	Rich/Phyllis	02/03/2012	Pass					
8	Assign vendors to a class	Rich F	All	Completed	Rich/Phyllis	05/03/2012	Pass					
9	Create Payables Batch: • Setup single use • Enter Invoices • Enter Credit notes • Update GL distribution • Verify or assign payment terms • Fixed Assets  Print batch edit report  Post Batch	Paul, Joe, Linda	15	Completed	Joe	29/02/2012	Pass					
10	Create Payables Batch: • Setup single use • Enter Invoices • Enter Credit notes • Update GL distribution • Verify or assign payment terms  Assign to Jobs  Print batch edit report  Post Batch	Paul, Joe, Linda	5	Completed	Paul, Joe, Jim	07/03/2012	Pass					
11	Print Historical Aged Trial Balance report >Payables>Reports>Trial Balance Review and verify reconciliation to GL >Financial>Routines>Reconcile To GL  For a specific vendor For a specific date	Paul, Joe, Linda	3	Completed	Paul, Joe, Jim	29/02/2012	Pass		Reconciliation did not balance, due to setup of GL acct. Should not be setup as allow GL entry.			

12	Cheque Printing / Processing: Create Cheques Batch (Select what to pay) >Purchasing>Select Cheques Cheque selection based on terms Cheque selection based on range of vendors Print Cheques - All Chequebooks Verify cheque layout and alignment for cheques on actual printer to be used  Reprint Cheques - All Chequebooks Post Cheques Batch	Paul, Joe, Linda	4	Completed	Joe	09/03/2012	Pass					
13	Void Transactions: <ul style="list-style-type: none"> <li>For an Open Transactions &gt;Payables&gt;Void Open Payables Txn&gt;</li> <li>For an Historical Transactions &gt;Payables&gt;Void Open Payables Txn&gt;</li> <li>Validate GL distribution</li> </ul>	Paul, Joe, Linda	5	Completed	Paul	3/8/12	Pass					
14	Test Transactions Inquiry by Vendor after each batch posted.	Paul, Joe, Linda	All	Completed	Paul	09/03/2012	Fail	L	1099 Details does not show in 1099			
15	Print Payables Historical Aged Trial Balance after all batches are posted. Reconcile with AP Control Account	Paul, Joe, Linda	3	Completed	Paul, Joe, Jim	29/02/2012	Pass		same as script #11			
	Receivables	Blank										
16	Create new customers	Paul, Joe, Linda	5	Not Started					For corporate only			
17	Assign customers to active class	Paul, Joe, Linda, Rich F	All	Not Started					For corporate only			
18	Process Cash Receipts: Create a batch Apply Enter cash receipts Update GL distribution  Print batch edit report and verify postings  Post batch	Paul, Joe, Linda	10	Completed	Joe	09/03/2012	Pass					
19	Print Historical Aged Trial Balance report Review and verify reconciliation to GL	Paul, Joe, Linda	3	Completed	Joe	09/03/2012	Pass					
20	Voiding Cash Receipts Verify GL distribution	Paul, Joe, Linda	5	Completed	Joe	09/03/2012	Pass					
21	Create a SmartList	Paul, Joe, Linda	3	Completed	Joe	09/03/2012	Pass					
	Sales order processing (Misc Billing)	Blank										
22	Create Sales Batch (for Misc Billing): Setup single use Enter Item line information Verify tax calculations Update GL distribution Verify or assign payment terms  Print batch edit report  Post batch	Paul, Joe, Linda	5	Completed	Paul, Joe, Jim	2/29/12, 3/9/12	Pass					
23	Print invoices and verify layout	Paul, Joe, Linda	All	Completed	Paul, Joe, Jim	2/29/12, 3/9/12	Pass					
24	Create a SmartList	Paul, Joe, Linda	3	Completed	Joe	09/03/2012	Pass					
		Blank										
25	Create SOP Quote  Assign to batch Assign each document line items to a Job & cost code	Chris B, Rich M	6	Completed	Rich, Chris	3/6/2012, 3/8/12	Pass					
26	Transfer to an order Assign to batch Assign each document line items to a Job & cost code If Engineering changes date MUST update SOP Order	Chris B, Rich M	6	Completed	Rich, Chris	06/03/2012	Pass					

27	For back orders create Purchase Orders (SOP to POP)	Rich F	6	Completed	Rich	06/03/2012	Pass					
28a	Transfer Order to Invoice (post to Job)	Rich F	6	Completed	Rich	07/03/2012	Pass					
28b	Print pick ticket	Rich F	6									
	Allocate order	Rich F	6									
	Print batch edit report and verify postings											
	Post Invoice batch	Rich F	6									
	Validate inventory depletion	Rich F	All									
	Validate posted job cost transaction	Chris B, Rich M	All									
	Sales order processing	Blank										
28a	Create Sales Batch (for Over the Counter Inventory): Invoice (Type) Issues (+) Receipts (-)	Rich F	6						To verify with Rich			
28b	Print batch edit report and verify postings	Rich F	All									
	Post Invoice batch	Rich F	All									
	Validate inventory depletion	Rich F	All									
	Validate posted job cost transaction (if applicable)	Chris B, Rich M	All									
30	Create a SmartList	All	3	Not Started					Not on testing agenda?			
	purchase order processing (Inventory)	Blank										
31	Run Historical Stock Status report and reconcile to Inventory Control Account  (Inventory → Reports → Activity → Historical Stock Status) Before ANY inventory transactions are made.	Rich F	3						To verify with Rich			
32	Enter Purchase Orders (try to use real examples) • Standard • Blanket • PO Generator (Mins/Maxes) Save/Commit Assign to Jobs	Rich F	8 Gas 8 Electric	Completed	Rich	07/03/2012	Pass					
		Rich F	4 Gas, 4 Electric									
33	Print Purchase Orders and verify layout	Rich F	All	Completed	Rich	2/27/2012, 3/7/12	Pass					
34a,b	Create Purchasing Batches (Receiving Batch)  Enter Receiving Transactions Shipment Type Partial and fully received Print batch edit report Post batch	Rich F	5 each	Completed	Rich	07/03/2012	Fail	L	Steve A to add password protection			
		Rich F	All									
		Rich F	All									
		Rich F	All									
35	Run Historical Stock Status report and reconcile to Inventory Control Account  (Inventory → Reports → Activity → Historical Stock Status) AFTER inventory transactions are made.	Rich F	3	Completed	Rich/Joe	29/02/2012	Pass		same as #45			
36a,b	Enter Invoice Match Transactions • Fully Invoiced • Partially Invoiced	Paul, Joe	All						To verify with Paul need scripts/backup			
37	Create Smartlists	Paul, Joe, Rich F	3 each						To verify with Paul			
	purchase order processing (Services)	Blank										
38	Enter Purchase Orders (try to use real examples) • Standard • Blanket  Save/Commit Assign to Jobs	Rich F	8 Gas 8 Electric	Completed	Rich	08/03/2012	Pass					
		Rich F	4 Gas, 4 Electric									
39	Print Purchase Orders and verify layout	Rich F	All	Completed	Rich	08/03/2012	Pass					
40a,b	Create Purchasing Batches (Receiving Batch) Enter Receiving Transactions Shipment Type Partial and fully received Print batch edit report Post batch	Rich F	5 each						To verify with Rich			
		Rich F	All									
		Rich F	All									
		Rich F	All									
41a,b	Enter Invoice Match Transactions • Fully Invoiced • Partially Invoiced	Paul, Joe	All						To verify with Paul need scripts/backup			
42	Create Smartlists	Paul, Joe, Rich F	3 each						To verify with Paul			

## APPENDIX - C

### Test Script Sample

## Sample Test Script

Liberty Utilities  
GP2010 Installation  
Test Plan

Area: Job Cost  
Assertion(s): Functionality  
Test Ref #: 65

Purpose: To test the creation of Jobs

Test plan approved by:

Test Performed by: *C. Brouillard*

Assigned GP Role:

Test Performed dates: *Nov 8/12*

Test Iterations: 10

Test Inputs: Job creation of 20 Jobs, 10 Gas and 10 Electric, minimum of 5 Capital for both Gas & Electric

Test Procedure & expected result.

- 1 Log in as user that does have the ability to see WennSoft Job Cost Cards
- 2 Enter Job Template
- 3 Copy to new Job Number with company prefix
- 4 Enter Job Description
- 5 Enter Project Number
- 6 Enter Division
- 7 Select Customer ID & Location
- 8 Enter Additional Job Information in Extender window
- 9 Verify Cost Codes are complete, make any changes
- 10 Enter Estimate on Cost Codes

Pass / Fail *Pass* *Pass* *Pass* *Pass* *Pass* *Pass* *Pass* *Pass* *Pass* *Pass*

## Project Change Request Form

Project Name: <Project Name>  
Project Manager: <Name>  
Change Requested by: <Name, Title>  
Contact Information: <Email address, telephone #>  
Change Request date: <MM/DD/YYYY>

### Change Request Details and Change Impact:

Description of Change:

Reason for Change/Justification: <State why this change must be made>

Requested Implementation Date: <MM/DD/YYYY> Critical Change? Y ☐ N ☐

#### Scope Impact:

Expand ☐ Reduce ☐ Clarify ☐ None ☐

Comments: <Will the change increase or decrease the scope/work of the project as defined in the Project Charter? Which project deliverable is impacted by the change and how?>

#### Schedule Impact:

Lengthen ☐ Shorten ☐ None ☐

Comments: <Is there enough lead-time to incorporate this change? How will it affect the current schedule?>

#### Resources Impact:

Increase ☐ Decrease ☐ None ☐

Comments: <Will additional resources need to be added to the project to implement this change? What type of resources, i.e./ Technical IT, Financial (accountants), SME's, other? How many?>

#### Budget:

Increase ☐ Decrease ☐ None ☐

Comments: <Will the change adversely or positively impact the CAPEX allocated for this project and subsequent operating costs?>

## **APPENDIX - E**

### **Governance Report**

## Granite State and Energy North Governance Update

For the Week of March 5 to March 9, 2012

Overall Project Update – Functional Area

Project	Overall Update	Status
Customer Service	Project is tracking to success	
Energy Procurement	Project is tracking to success	
EHS&S	Project is tracking to success	
Finance	Project is tracking to success	
Human Resources	The issue regarding benefits has been resolved, but still work to be done – TSA is in place for Day 1	
Information Technology (National Grid)	Project is tracking to success – no major obstacles at this time	
Information Technology (Liberty Energy)	Project is tracking to success	
Operations	Project is tracking to success	
Regulatory	Project is tracking to success	

6/10/2011

2

## Great Plains Application Project Update

Project	Overall Update	Status
Dynamics Great Plains	Project is tracking to success	

### **Project Update**

- All forms completed and approved
- Perform end user unit testing (Mar 7,8,9) for Electric (Finance, Operations, Procurement, IT)
- Created data upload plan (round 4)
- Continue to develop the automation of overhead allocations (administration, transportation and stores) to capital jobs

6/10/2011

3

## Information Technology Project Update (National Grid)

### ▪ **National Grid**

- Concluded the processing of application access feedback from Liberty business staff and National Grid business owners. All feedback was consolidated and will be sent out to transferring employees and business owners next week. A formal process to capture any requests prior to Day-1 close has been put in place.
- Held a Network & Telecommunications meeting with Liberty to review current activities and to recast Liberty Network staging and outover dates.
- Held a TSA review meeting between National Grid and Liberty IS teams. Primary and secondary contacts were confirmed. Language for support of the GAS SCADA systems will be added to the IS TSA and sent to Legal.
- Held internal National Grid IT meeting with named leads for the TSAs. Ownership of services and process for charging of services were discussed and confirmed. Leads are to fill out template provided and return to the project team within a week.
- Provided a detailed status update to the National Grid IS Leadership Team.
- Awaiting feedback from Customer Accounting on designs and samples in support of the recent set of requirements.
- Held National Grid Payroll discussion as it relates to the National Grid General Ledger.
- Participated in Telvent Kickoff Meeting.
- Participated in series of pre-meetings for upcoming Customer Workshop.
- Drafted High Level Financial Processes Transition Flows and have begun to share with National Grid business for feedback.
- Agreed to specifics for next test of Financial Data Extracts.
- Met with Wipro Integration Services team on secure file transfers and adjusted their scope to reduce costs. Project team will handle all one-time transfers, Wipro Integration Services team will implement solutions for all on-going transfers.

6/10/2011

## Information Technology Project Update (Liberty Utilities)

- **Liberty Utilities**

- Meeting with National Grid IT , updated project status , review remaining tasks prior to close
- Discussion on National Grid to Liberty Utilities data transfers for SharePoint, files, and email
- Telvent Meeting for project kick off
- Liberty SharePoint server , IMS Server , In configuration stage
- Meetings with Copier/printer vendors for New Hampshire offices
- Adjusted Day N dates for network transition , May 7 to June 23 outovers

6/10/2011

5

### Status Updates by Functional Area

- **Energy Procurement**

- Attended the Supplier/Broker Training conference call with Hicksville for Granite State
- Gastar contract finalization work
- Follow-up with National Grid on new meter agreement
- Attended Cogsdale training seminar to see interface issues with billing and customer choice programs
- GSE access to RFP issue resolved, we are not allowed to see it this round but will be involved in the next RFP round
- Procurement team will be involved in Telvent scoping sessions slated to start 3<sup>rd</sup> week of March in MDS (Pulse replacement), gas control

## Status Updates by Functional Area

- **Regulatory**
  - JOINT Master Regulatory Requirements Workbook ("MRRW") r.3 completed 3/9 (to include TSA's)
    - Kit rollout scheduled for 3/19<sup>th</sup> National Grid and Liberty Utility Business Leads
      - MRRW
      - Instructions to Business Unit Leads
    - Sign-Off from both National Grid and Liberty Utilities Functional Leads as to accuracy roles/responsibilities/ contact/ regulatory information, etc.
  - Centralized Repository:
    - Centralized Repository for Compliance Filing Management System: Tom Birmingham, following up with Celia O'Brien, for electronic copies of all required reports, to be "dropped" into above folders.
  - Staffing:
    - Interview and Selection of Compliance Administrator Position - Awaiting Offer and Acceptance

## Status Updates by Functional Area

### ▪ **Finance**

- Completed second week of testing with BDO and Liberty.
- Meeting on accounting for DSM activities with Eric Stanley and National Grid's Brian Pelletier.
- Meeting with National Grid on cash settlement of CSS, CRIS and Daily cash. This is not resolved. Another meeting is scheduled for next week.
- Investigated the possibility of using hand held devices for entering time. We are still looking for an efficient way to handle union time sheets.
- Met with National Grid regarding data downloads/data refresh and verification of totals. Responsibility is moving from BDO to Liberty Canada.
- Discussed pre-capitalization of transformers and the process pit falls. Liberty East will pre-capitalize transformers.
- Provided list of burdens requirements to Jennifer Agis for discussion.

6/10/2011

8

## Status Updates by Functional Area

### ▪ **Procurement**

- TSA Review sessions were held with the National Grid Fleet and Procurement areas. Fleet needs post Day One are expected to be minor, TSA will be in effect for potential repairs to vehicles with specialized equipment. It is not expected for the TSA to go beyond October 1 2012. Expectations for Procurement TSA were discussed. For sourcing events in progress, national Grid will see those through, for any new sourcing events, Liberty will assume responsibility of them.
- 3<sup>rd</sup> Party Contracts : I spoke with Shannon Coleman on some third party contracts for review. Legal seems to be in a better position in reviewing these as a resource has come aboard to help.
- Gas Leak Survey bids received for NH. National Grid procurement is evaluating and making a recommendation for the NH area.
- Electrical materials bid- Meeting held last week on Electrical supplies bid. This will be put out this week to potential suppliers.
- Inventory process post Day One was discussed with NH Gas Construction team on March 2. Proposal for process to be built this next week.
- Issues:
  - Property records indicate \$871,000 balance of Gas Meters in National Grid's Massachusetts Wilmington location. This number is very high- we estimate approximately \$50-\$75K balance of meters physically at Wilmington.
  - Third Party Contracts are still being obtained and reviewed.

6/10/2011

9

## Status Update by Functional Area

### ▪ **Customer Service**

- Website feedback from Customer Care NH has been provided to Pilot PMR.
- Collections awaiting Day 1 confirmation so the O/B call vendor can record and test collections scripts (2 weeks needed). Minor revisions made to the existing scripts. Copies are available upon request.
- Customer Care NH staff participated in the first of three weeks of Cogsdale overview and business process review sessions in Oakville with representatives from Cogsdale and ATMOS.
- Participated in an overview meeting for the GasStar system. More information is needed on how GasStar will integrate or be impacted by Cogsdale and other Liberty systems.
- TSA review meeting scheduled week of 3/12.

### ▪ **Meter (Load) Data Services:**

- LDS Group contributed to the development of the site agreement, part of the Interconnection agreement with Legal, Energy Procurement and National Grid
- Kelly Goodwin observed National Grid MDS personnel performing daily functions in Syracuse W/E 02/25
  - Electric Interval Operation
  - Electric Non-Interval Operations
- Held a meeting with National Grid gas operations people to review the Gas meter to Cash process flow from an MDS perspective W/E 02/25
- Continue to document National Grid MDS electric and National Grid Gas Operations process flows
- Kelly Goodwin participating in Cogsdale sessions representing metering and meter data services

## Status Update by Functional Area

- **Marketing and Communications:**
  - Day 1 Communications plans are in place. There will be some revisions to the documents pending final resolution of brand messaging changes by Pilot PMR and sign off by Liberty.
  - Day 1 Change Management Team meetings continue. Due dates for specific items will be adjusted pending updates to the NHPUC approval process.
- **Sales and Marketing:**
  - Developing standard gas sales activity and lead tracking reports to leverage going forward.
  - Business case submitted to support recruiting for Sales Manager position
  - TSA review meeting completed
- **Energy Efficiency Programs:**
  - Submitted 2012 gas program budget proposal revisions to the NH PUC.
  - Finalized C&I gas large customer event schedule (dates - 4/2 & 4/5); distributing invitations to customers.
  - Resolving InDemand program issues (program savings calculations, missing program apps for property allocating activities).
  - Continued with EE analyst interviews and phone screening
  - On-going C&I gas marketing activities - 80+ new project leads created over past two weeks.
  - TSA review meeting completed
  - NH Staff participated in the NH Home Show in Manchester, NH from March 2-4, to showcase our EE programs.

6/10/2011

11

## Status Updates by Functional Area

- **Environment, Health, Safety and Security (EHSS)**
  - **Environmental**
    - Attended prep meeting for Liberty Hill SIR site. Meeting with state in Concord March 12th;
    - Attended NH State NHDES refresher training.
  - **Health and Safety**
    - No new updates this week
  - **Security/Facilities**
    - Toured Salem, Nashua and Manchester facilities with C-Cure vendor, C-Cure 9000 a possible AMAG replacement;
    - Conference call held with project managers for temporary site and for building renovations;
    - Lease for temporary space is agreed to by Landlord and Liberty and should be signed shortly;
    - Furniture is being ordered for temporary space

## Status Updates by Functional Area

- **Human Resources**

- **Staffing**

- Filled 1 gas and electric controller position in Operations department. Candidate to begin work 3/25/12. Extended offers for gas/electric controller, load forecast analyst, and gas supply planner positions

- **Benefits**

- 401k make-up sessions completed. Employee elections to be returned by 3/16/12. Presented benefit plans to CEO. Met with USW and IBEW leadership to present benefit plans. All issues resolved with USW. Follow-up meeting with IBEW scheduled for next week; preparing material for Open Enrollment meetings to be scheduled week of 3/19.

- **Pension**

- No new updates this week

- **Payroll**

- Reached agreement with USW to change payroll pay date from Thursday to Friday. Pending final meeting with IBEW, anticipate agreement with this change as well.

- **Training**

- Annual Expert Training (AET) for NH employees scheduled and in progress in Millbury, MA. Received training records from Learning & Development for all NH employees; currently being reviewed by Technical Trainers.

## Status Updates by Functional Area

- **Operations**
  - Meter Shop (Electric)
    - No further tasks required for day 1 – team is ready
  - Substation Maintenance
    - No further tasks required for day 1 – team is ready
  - Vegetation Management
    - No further tasks required for day 1 – team is ready
  - Damage Prevention (Electric)
    - No further tasks required for day 1 – team is ready
  - Compliance, Quality & Emergency Planning
    - No further tasks required for Compliance for day 1 – team is ready
    - No further tasks required for Quality for day 1 – team is ready
    - No further tasks required for Emergency Planning for day 1 – team is ready
  - IR Testing
    - No further tasks required for day 1 – team is ready
  - Rubber Goods Testing
    - No further tasks required for day 1 – team is ready

## Status Updates by Functional Area

- **Operations (con't)**
  - Engineering
    - User Acceptance testing for electrical material, work processing, and financial processing was completed on 3/7, 8, 9.
  - Gas & Electric Control and Dispatch
    - No further tasks required for day 1 – team is ready
  - Damage Prevention (Gas)
    - No further tasks required for day 1 – team is ready
  - Meter Shop (Gas)
    - No further tasks required for day 1 – team is ready

### Issue and Risks

- **Energy Procurement – Meter Data Services**
  - Demarcation lines are being addressed – where does Liberty Utilities start to own and where does NEP ownership end
- **Energy Procurement – New meter domain**
  - Design creates un-metered load value which may result in significant incremental costs to GSECo once the new meter domain is implemented
  - Update - Reached basic agreement with NEP, that NEP will continue as Host meter participant. National Grid legal is working on metering agreement which should be completed by mid-March.

## **APPENDIX - F**

### **Application Inventory**

NG Application Domain	Liberty Day 2-N Project Plan	Liberty Day 2-N Implementation	Application Name	Also Known As (AKA)	Description
Shared Services	Day 1	Accounts Payable	ACIS	Automated Contractor Invoicing System	Automated invoicing for Alliance Contractors based on tracking of completed contractor units (negotiated units of work)
Shared Services	Day 1	Accounts Payable	Apimg	Document Imaging / Microfilm	AP Invoices are sent to Records Center, where they are scanned and an image file (.TIF) created. A monthly Oracle extract is used to create metadata, which is imported into the Oracle database that supports the application. The invoice image is linked to the metadata. An MS-ACCESS application was built internally to act as the 'Front-End' for accessing the data and providing a means to open the linked image file.
Shared Services	Day 1	Accounts Payable	Oracle Financials - Accounts Payable	Oracle Supply Chain	Oracle Financials Accounts Payable module.
Shared Services	Day 1	Accounts Payable	Oracle Financials - Order Management	Oracle Supply Chain	Oracle Financials Order Management module.
Shared Services	Day 1	Accounts Payable	Peoplesoft - Accounts Payable		Accounts Payable, Expense Reporting and Procurement Card - included in Peoplesoft Financials Supply Chain 8.4
Shared Services	Day 1	Accounts Payable	Peoplesoft - Order Management		Order Management used to support the investment recovery process
Shared Services	Day 1	Accounts Payable	Peoplesoft - Purchasing		Purchasing, eProcurement - these are included in Peoplesoft Financials Supply Chain 8.9
Shared Services	Day 1	Accounts Payable	XignAccess		
Shared Services	Day 1	Accounts Payable	Xign-Einvoice	XignInvoicing Solution	This is an Order-to-Pay solution externally-hosted by JPMorgan/Xign that provides automation of order delivery, invoice processing and payment through ACH by integrating with existing Oracle ERP system, a 3-way match will occur.
Shared Services	Day 1	Environmental, Health & Safety	Dolphin	Dolphin MSDS	Material Safety Data Sheets (MSDS) Hotline/Online. OSHA requires manufacturers of hazardous chemical products to provide safety and health information on their products through the use of Material Safety Data Sheets.
Shared Services	Day 1	Finance	Oracle		

Shared Services	Day 1	Finance	Oracle Financials - G/L	Oracle Financial System Software-GL	Oracle Financials modules for include: General Ledger,
Shared Services	Day 1	Finance	Oracle Financials - Projects	Oracle Financial System Software	Oracle Financials modules which include: Projects
Shared Services	Day 1	Finance	Oracle Financials Access Request	Oracle Request for Access	Oracle Request for Access
Shared Services	Day 1	Finance	Oracle Financials Application Suite	Oracle Financials and Supply Chain	ERP Supply Chain and Financials packaged solution.
Shared Services	Day 1	Finance	Peoplesoft - Accounts Receivable/Billing		Peoplesoft Financials is a term uses to encompass all financial-related components (sub-systems) of the Peoplesoft application, including general ledger, PS Budgeting, accounts receivable, etc.
Shared Services	Day 1	Finance	Peoplesoft - Budgeting		Peoplesoft Financials is a term uses to encompass all financial-related components (sub-systems) of the Peoplesoft application, including general ledger, PS Budgeting, accounts receivable, etc.
Shared Services	Day 1	Finance	Peoplesoft - General Ledger	PeopleSoft GL	Peoplesoft Financials is a term uses to encompass all financial-related components (sub-systems) of the Peoplesoft application, including general ledger, PS Budgeting, accounts receivable, etc.
Shared Services	Day 1	Finance	Peoplesoft Application Suite		Application suite for PeopleSoft ERP package.
Shared Services	Day 1	Finance	Pillar	Pillar Corporate Direct Budget Input System	Corporate direct budget input system
Shared Services	Day 1	Finance	Power Plant - Fixed Assets - Asset Management	PowerPlant - Fixed Assets	PowerPlant fixed assets system - Asset Management module
Shared Services	Day 1	Finance	Power Plant - Fixed Assets - Cost Repository	PowerPlant - Fixed Assets	PowerPlant fixed assets system - Cost Repository module
Shared Services	Day 1	Finance	Power Plant - Fixed Assets - Project Management	PowerPlant - Fixed Assets	PowerPlant fixed assets system - Project Management module

Shared Services	Day 1	Finance	Power Tax	PowerPlant - Power Tax	PowerTax cases were implemented in production on 9/2009. Power plant system used to calculate various costs in the tax returns. Walks through assets , and closed work orders
Shared Services	Day 1	Finance	Powerplant - Plant Accounting		Plant Accounting uses PowerPlant to manage project cost accounting and the financial life cycle of all NG USA's assets. There is a key interface between PowerPlant and Storms, where PowerPlant provides new Work Order numbers.
Shared Services	Day 1	Finance	Powerplant - Powertax		Tax depreciation and deferred tax system for the utility industry. Deferred taxes are maintained for deferral accounting and FAS109 liability accounting. PowerTax processes tax depreciation, book tax basis reconciliation, and deferred income taxes.
Shared Services	Day 1	Finance	Powerplant - Property Tax		Used to calculate Real Estate property tax and verify incoming real estate tax bills. Will also replace PTARS to support NY's Property Tax Challenge program.
Shared Services	Day 1	Finance	Powerplant Application Suite		It is a financial system and used for Accounting & Tax Calculations. Capital Asset Tracking system.
Shared Services	Day 1	Finance	Powerplant-Ks	PowerPlant - Fixed Assets	KSE instance of Powerplant application Suite
Shared Services	Day 1	Finance	Powerplant-Ng		The legacy NG-US instance of Powerplant application suite
Shared Services	Day 1	Finance	PowerTax		part of the powerplant suite , additional module for federal tax returns -
Shared Services	Day 1	Finance	Property Tax	PowerPlant Property Tax	Provides functionality to manage KSE property tax renditions, allocations and bills.
Shared Services	Day 1	Finance	STS	STS Corporate	Sales and use tax determination system
Shared Services	Day 1	Finance	Vertex Sale Tax Q Series		This software is used in conjunction with the PeopleSoft Misc Billing application to calculate sales tax on the invoices we produce.
Shared Services	Day 1	HR & Payroll	Annual Salary And Bonus Review	GPCS	Supports the annual salary and bonus review process by providing managers with facility to enter performance ratings, salary and bonus recommendations as part of the annual

					review.
Shared Services	Day 1	HR & Payroll	Benefits Admin [KeySpan]	PeopleSoft - Benefits Admin	PeopleSoft Package for Benefits
Shared Services	Day 1	HR & Payroll	Benefits Admin [NGUS]	PeopleSoft - Benefits Admin	PeopleSoft Package for Benefits
Shared Services	Day 1	HR & Payroll	BONY / Retiree Payment	BONY/Retiree Payroll	Bank of NY is an external vendor responsible for retiree payroll pension for legacy Keyspan. System of record for the most up-to-date retiree info, such as addresses (home and mailing), payout data and deduction info. Receives information from Watson Wyatt (Pension Administrator) and Keyspan PS HR. Has multiple Interfaces with Keyspan PeopleSoft HR system.
Shared Services	Day 1	HR & Payroll	Candidate Gateway [KeySpan]	PeopleSoft - eRecruiting	PeopleSoft Package Candidate Gateway
Shared Services	Day 1	HR & Payroll	Criterion		Affirmative Action Plan - Employee level data is sent to this application via an interface from PS so I'm not sure that it needs to be included in the business criticality assessment. Ensuring that the interface from PS accommodates any changes or new data would need to be estimated with all other PS interfaces if the application is used in the new company.
Shared Services	Day 1	HR & Payroll	Erecruiting	PeopleSoft - eRecruiting	PeopleSoft Package eRecruiting
Shared Services	Day 1	HR & Payroll	Hr Admin [KeySpan]	PeopleSoft - HR Admin	PeopleSoft Package HR Admin
Shared Services	Day 1	HR & Payroll	Hr Admin [NGUS]	PeopleSoft - HR Admin	PeopleSoft Package HR Admin
Shared Services	Day 1	HR & Payroll	HR1FORM	Manage resourcing	This is an internal application for National Grid

Shared Services	Day 1	HR & Payroll	Manager Selfservice	PeopleSoft - Manager SelfService	PeopleSoft Package Manager SelfService
Shared Services	Day 1	HR & Payroll	Mercer Benefit Administration	Mercer Benefit Administration	Externally hosted system provided by Mercer. Responsible for Administration of medical, dental, FSA, legal, and other flexible benefits, including 3rd party vendors interfaces. Self-service tools provides employee with ability to enroll / change enrollment during enrollment period. Has interfaces to and from both PeopleSoft HR systems (eligibility data to Mercer, payroll deductions from Mercer). Interfaces are supported by DhalbirDhaliwal group.
Shared Services	Day 1	HR & Payroll	Payroll [KeySpan]	PeopleSoft - Payroll	PeopleSoft Package Payroll
Shared Services	Day 1	HR & Payroll	Payroll [NGUS]	PeopleSoft - Payroll	PeopleSoft Package Payroll
Shared Services	Day 1	HR & Payroll	Peoplesoft	PeopleSoft HR	Core HR system used for Ex Keyspan staff. Application that performs payroll processing; training Module tracks Safety&Tech courses required by specific job codes as well as tracks courses taken and courses required; HR/Benefits Admin , Payroll and Employee self-service; eProfile, eBenefits, ePayroll, eRecruit and eDevelopment.
Shared Services	Day 1	HR & Payroll	PeoplesoftHr Ng		Core HR, Benefits, Payroll system used by Legacy National Grid US staff. Application that performs payroll processing. Training Module tracks Safety & Tech courses required by specific job codes as well as tracks courses taken and courses required.
Shared Services	Day 1	HR & Payroll	Performance 4 Growth	P4G	P4G supports the performance for growth process within National grid which enables all employees to record and manage their objectives and performance online.
Shared Services	Day 1	HR & Payroll	Planned Salaries	PeopleSoft - Planned Salaries	PeopleSoft Package Planned Salaries

Shared Services	Day 1	HR & Payroll	Plateau Learning Management System	Plateau LMS	Externally Hosted System, provided by Plateau Inc., provides Professional Development and Technical Development group with ability to administer training. Self-Service tool provides employees an ability to register for the sources, as well as gives an opportunity for managers of others to review their subordinates training progress. Used for eLearning content streaming within US. Has Interfaces from both US PeopleSoft HR systems (employee data and organizational hierarchy).
Shared Services	Day 1	HR & Payroll	Salary Planning	Global Performance and Compensation System (GPCS)	Application used during the annual salary planning process. Used to determine merits, promotions and bonus amounts for ICP& non ICP personnel. Compensation Statements are also generated from the system. This app interfaces with PeopleSoft HR/Payroll.
Shared Services	Day 1	HR & Payroll	Smarti	SmartTime	Rule based process that converts Time Entry into Pay Details based on employee information and union contract agreements. Currently system handles 22 union contracts along with management rules for 32 companies.
Shared Services	Day 1	HR & Payroll	T.Rowe Price / PenAdmin Support	Pension Administrator - T.Rowe Price	External Service provider responsible for NG US employees' Pension Administration. Interfaces with legacy NG US PeopleSoft HR system.
Shared Services	Day 1	HR & Payroll	Tes	Time Entry System	System used by employees to record their time. Time Entry interfaces with the PeopleSoft HR System to provide hours for payroll processing. Time for certain groups-STORMS and IT personnel-are provided to Time Entry via the STORMS and Planview interfaces.
Shared Services	Day 1	HR & Payroll	Training Admin [Keyspan]	PeopleSoft - Training Admin	PeopleSoft Package Training Admin
Shared Services	Day 1	HR & Payroll	Training Admin [NGUS]	PeopleSoft - Training Admin	PeopleSoft Package Training Admin
Shared Services	Day 1	HR & Payroll	Turningpoint 2008		Application used to conduct interactive classroom session, utilizing Audience Response System (ARS).

Shared Services	Day 1	HR & Payroll	Turningpoint Anywhere		Application used to conduct interactive classroom session, utilizing Audience Response System (ARS).
Shared Services	Day 1	HR & Payroll	Vactrack	Vacation Tracking system	Application utilized to record Employee Data, Daily Attendance, Payroll History, Reference Data Maintenance, Business Rules Update and Reporting
Shared Services	Day 1	HR & Payroll	Vanguard	401(K) Administration	External Service Provider responsible for 401(K) Administration. Self-service tools allow employees to change deduction percentage, fund allocations, as well as set up / update loans against 401(k) funds. Interfaces (inbound / outbound) with PeopleSoft HR systems. Inbound - demographic changes, eligibility, deduction info, compensation base. Outbound - deductions/loans changes.
Shared Services	Day 1	HR & Payroll	Variable Comp	PeopleSoft - Variable Comp	PeopleSoft Package Variable Comp
Shared Services	Day 1	HR & Payroll	Welder Qualifier	Welder Qualifier	Client Build / Owned Application to support mandated gas qualification program for Welding Qualification. L&D Contact - Allison Brems.
Shared Services	Day 1	Inventory	Mobile Materials Assistant	MMA	Used for replenishing crew barns as well as printing labels includes RF devices - integrated with PeoplesoftI.M. This is a People Soft System link
Shared Services	Day 1	Inventory	MscA	Mobile Supply Chain Application	Oracle Financials Mobile Supply Chain Application (MSCA) module. Allows for remote receiving of inventory to warehouse, similar to MMA but this is an actual Oracle product
Shared Services	Day 1	Inventory	Oracle Financials - Inventory	Oracle Supply Chain	Oracle Supply Chain Inventory module.
Shared Services	Day 1	Inventory	Peoplesoft - Epm		This is the ERP Data Whse that receives data from Peoplesoft, PowerPlant and Storms. Using Business Objects, the business can run various reports from this data warehouse.

Shared Services	Day 1	Inventory	Peoplesoft - Inventory Managemt		Peoplesoft Supply Chain is a term uses to encompass all supply-chain related components (sub-systems) of the Peoplesoft application, including inventory mgmt, purchasing, order mgmt, etc.
Shared Services	Day 1	Inventory	Sma	Stock Material Authorization	Stock Material Authorization for purchasing dept, General Store items moved to store rooms, requests come from field
Shared Services	Day 1	Procurement	Oracle Financials - Enporion	EnporioniProcurement	Provides ability to shop or punchout from Enporion marketplace outside of KeySpan's system via Oracle iProcurement (front-end) and to send approved orders to Vendors and receive acceptance of orders via Enporion marketplace.
Shared Services	Day 1	Procurement	Oracle Financials - Purchasing	Oracle Supply Chain	Oracle Financials Purchasing module.
Shared Services	Day 1	Procurement	Oracle Financials - Web Iprocurement	Oracle Supply Chain	Oracle Financials iProcurement module.
Asset Management	Work Management	Service Mgmt / Equip Mgmt	Cascade		Asset Management & Maintenance Management system for Electric Substation, HVDC, Relay & Telecomm Assets
Asset Management	Work Management	Service Mgmt / Equip Mgmt	Corrosion	Bass Trigon / PCS (Pipeline Compliance System)	Bass Trigon / PCS (Pipeline Compliance System) Database used in the Central division to track data regarding test sections and record test results. Links to the geographic area in GIS via the test section number.
Asset Management	Work Management	Service Mgmt / Equip Mgmt	Curb Valve Data Extract	Local Law 30 Regulator inspections	Used to extract LL30 locations
Asset Management	Work Management	Service Mgmt / Equip Mgmt	FALLS [NGUS]	Lightning Tracking System, LTrax, Fault Analysis and Lightning Location System	An application that displays real-time and historical lightning data. FALLS is the replacement for LTrax.
Asset Management	Work Management	Service Mgmt / Equip Mgmt	Feeder Hardening	inspection and maintenance	Asset reliability project, inspections and maintenance, has a storms work request against it.
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Anywhere	Fleet Management System For Company Fleet	Provides tracking of all work that is performed on the Companies' Fleet vehicles, Work Orders and Charges..

Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Clearing Account Management		Used by the fleet personnel to adjust the monthly charges for a company across the board for Transportation Pricing
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Delivery And In-Service Form		Used to inform Fleet Management that a vehicle have been delivered or put in service in the field. Vehicle information is validated; stored, emailed, then manually added to Fleetfocus
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Fuel And Trip Permits		Used by the fleet personnel to request additional state permits from a permitting agency for vehicles to use to cross-state boundaries (e.g. during storms.)
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Garage Reports		Used by the fleet personnel to report on work order, road call, inspection and other garage metric information. The users can enter a number of selection fields, and then run one of the canned reports. These are easily exported to MS Excel for further customization
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Management Suite		Used by the fleet personnel for Work and Vehicle management activities
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Surplus Equipment		Used to inform Fleet Management that a vehicle has been pulled from service to be retired/sold. Vehicle information is validated; stored, emailed, hen manually added to Fleet focus
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet User Reports		Used by the field to report on vehicle, damage, monthly charges and other information. The users can enter a number of selection fields, and then run one of the canned reports. These are easily exported to MS Excel for further customization
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Vehicle Re-Assignment		Used to inform Fleet Management that a vehicle that has been assigned to a different person, dept or company. Vehicle information is validated; stored, emailed, hen manually added to Fleetfocus
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Web Link To Caterpillar Inc. Sis		Used by the fleet personnel to review maintenance information from Caterpillar
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Web Link To Freightliner		Used by the fleet personnel to review maintenance information from Freightliner

Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleet Web Link To Mitchell On Demand		Used by the fleet personnel to review maintenance information from Mitchell
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Fleetfocus	Fleet Upstate or Legacy National Grid Fleet	System to capture and analyze all costs associated with owning and operating a fleet of vehicles, including equipment tracking, work order processing, preventive maintenance scheduling, parts and fuel inventory, and vehicle component warranty costs.
Shared Services	Work Management	Service Mgmt / Equip Mgmt	Maximo-Facilities	Maximo Facilities System	Work Management system for Facilities in NY, LI, and NE.
Asset Management	Work Management	Service Mgmt / Equip Mgmt	Pipe Replacement Tool		Analysis program used to identify main segments for replacement
Asset Management	Work Management	Service Mgmt / Equip Mgmt	Relief Valve Inspections		Extract used to identify services with external relief valves for inspection
Asset Management	Work Management	Equipment Mgmt	Joint Pole Proposal	JPP	Tracks billing and other information on jointly owned (NG and Tel Co) poles in Legacy Grid (upstate New York and New England).
Meter Data Management	Work Management	Equipment Mgmt	Meter Statistics-Ne	MSS	This system keeps track of all information related to meter testing. This includes removal information and meter test results to determine accuracy percentages.
Meter Data Management	Work Management	Equipment Mgmt	MITs	Meter Inventory Tracking System, EMIT, GSHOP	To inventory and track electric and gas meters. This system interfaces to PowerPlant, CSS&PFT.
Meter Data Management	Work Management	Equipment Mgmt	Mss	MSS	The Meter Statistics System was developed in house to track NE meter testing. This application tracks meter removal and test data to determine accuracy percentages. The meter testing standards are determined by the Department of Telecommunications and Energy (in Massachusetts) and the Public Utilities Commission (in New Hampshire).
Meter Data Management	Work Management	Equipment Mgmt	Pft	Pick for Test; Advent	Meter selection system that supports regulatory mandated yearly meter testing requirements. This system picks meters to be tested in the field and creates a download file to be sent to CSS System for field order generation.
Meter Data Management	Work Management	Equipment Mgmt	Snap [US]	Sonic Nozzle Analytical Prover	Testing software and Test boards for large & residential gas meters

Asset Management	Work Management	Equipment Mgmt	Spipe	Service Pipe System	This system is the repository for Service Pipe information in the company. Data in this system can be edited via an Oracle Forms application. The data can be accessed in view-only mode from Oracle Forms, FMS Reports and SPIPE Host Inquiry (FDC).
Asset Management	Work Management	Job Cost / Service Mgmt	Engineering Outsourcing Database		Tracking of the design job performed by construction contractors.
Asset Management	Work Management	Job Cost	Gc-Ne	Government Construction System (NE)	This application is a high-level database of large government construction projects in the NE area.
Work Management	Work Management	Job Cost	Primavera [NGUS]		Project Management for Capital Projects Part of Edis
Work Management	Work Management	Mobile Tech	Mdsi-Ne	MDSI-NE/Field Data Capture System (FDC) MDSI New England	Field Data Capture System (FDC) used by NE gas crews. Prioritizes and Dispatches job to mobile devices via Verizon's CDMA communications network. There is an office component (WinDisp) and a field component (MobilePenAppl).
Asset Management	Work Management	Work Estimating	Pet	Project Estimating Tool	Project Estimation for Capital Projects. Project Engineers are able to build out material, labor, and overhead project cost estimates. interfaces with Primavera to load project resources Part of EDIS
Work Management	Work Management	Service Mgmt	Cwq	Common Work Queue	A common portal to manage and dispatch gas distribution and Gas service work across NY, LI, NE, in addition NE uses it for leak management , and NY & NE use it to manage and dispatch Credit & collections work
Work Management	Work Management	Service Mgmt	Digsafe	DigSafe-NE System	This system is the repository of DigSafe tickets (One-call) for the NE area (gas only).

Work Management	Work Management	Service Mgmt	Ischeduler	iScheduler - Core iScheduler	Schedule Work Requests. iContract is a simplified application for contractors to schedule their work via internet. It adheres to the constraints of an individual utility company for what is economical while optimizing customer service and resource management objectives. iScheduler employs state of the art constraints based on scheduling techniques to automatically generate an optimal schedule. The Schedule created respects operational constraints and practicalities, and measures of performance, such as cost, to enable a utility to achieve goals such as Meeting service level agreements, improving resource utilization, reducing travel time, raising customer satisfaction levels. With Scheduler, the user allocates the work to crews that have the appropriate skill to the job. Skills are matched to jobs to give the best possible use of resources. Crew information such as availability, skills, performance factors and geographical preferences are extracted from the Work Management System.
Work Management	Work Management	Service Mgmt	Maximo-Ne	Maximo NE Field Work Management	Work Management system for New England Gas.
Work Management	Work Management	Service Mgmt	Storms	Storms - Core Storms	Track customer orders and projects, report on statuses, PSC reporting, performance reporting, ESCO's, GSO's, Pal's, Meter Orders and miscellaneous orders. Includes both capital and maintenance (limited capability) work for Electric and Gas.
Work Management	Work Management	sms	Resource On Demand	ROD	Resource on Demand is a crew logistics software program. RoD tracks crews at a macro level to aid in summarizing crew counts by restoration area and crew contingent. The crew counts are in turn used to lodge and feed crew members.
Shared Services	Work Management	sms	Riskmaster		A system to track the claims made by external entities against the company and to track claims by the company against external entities (damage to company property).

Work Management	Work Management	sms	SEAL		Maintains employee information regarding storm emergency assignments - provide additional personnel to deal with storm related incidents & facilitating restoration subsequent to storm damage
Work Management	Work Management	sms	TrackstarAVLS	AVLS	AVLS stands for Automated Vehicle Locator System. AVLS receives GPS coordinates from the field vehicles and feeds this information back into the office application for viewing and reporting. It is also the mechanism used to transmit Code Blue safety alerts to SOD and is a critical item to the core safety standards of the business.
Work Management	Work Management	sms	UG Inspection		Inspection of UG assets in NE, mainly Manholes
Work Management	Work Management	Service Mgmt / Equip Mgmt	AIMMS	Asset Information & Maintenance Management System (MAXIMO)	An application that provides functionality to manage planned and unplanned maintenance work on equipment in substations, on Relay and Telecommunications equipment and in the HVDC installations.
Work Management	Work Management	Service Mgmt / Equip Mgmt	Arcos	Automated Roster Callout System	Roster Callout system (ASP Solution) used in Dispatch to callout crews.
Work Management	Work Management	Service Mgmt / Equip Mgmt	Computapole	T&D Pole Maintenance	Inspection Management system used to manage asset inspections. Also manages Elevated Testing results for various regulatory bodies.
Work Management	Work Management	Service Mgmt / Equip Mgmt	Forestry IVR		An interactive voice response application that provides a vehicle for forestry work crews to provide work locations and other associated information in an automated fashion.
Work Management	Work Management	Service Mgmt / Equip Mgmt	lid	Interruption, Incident & Damage Tracking System	Tracks the resolution of interruptions, incidents, and damage to our assets by 3rd parties. This can be either electric or gas. Currently this system serves the NY (Niagara Mohawk) Service territory.
Work Management	Work Management	Service Mgmt / Equip Mgmt	Jpp/Eon Tracking System		Tracking system for Joint Pole Proposal (JPP-NY) and Exchange of Notice (EON-NE) contracts between National Grid and Telco's in National Grid franchise. Interfaces with STORMS for Work Requests that have JPP/EON activities.
Work Management	Work Management	Service Mgmt / Equip Mgmt	Lms-Ne	Leak Management System - NE	This is the repository of all leak records in NE.

Work Management	Work Management	Service Mgmt / Equip Mgmt	Srvy	Gas Survey System	Tracking and inquiring all leak surveys performed with the ability to update add, modify
Shared Services	Work Management		Xrt	Treasury Work Station	Manages the Corporations cash and cash bank accounts and submit treasury related transactions to our banking partners.
Shared Services	EHS&S	Environmental, Health & Safety	E-Cap		
Shared Services	EHS&S	Environmental, Health & Safety	EMIS		
Shared Services	EHS&S	Environmental, Health & Safety	Incident Management System	IMS	US SHEs system for recording and managing safety incidents as well as recording details of safety visits etc.
Shared Services	EHS&S	Environmental, Health & Safety	Wems	Waste Environmental Management Database System	Client/Server and web based system used for tracking and managing environmental waste.
Shared Services	EHS&S	Physical Security	Amag	AMAG	Facility Intrusion Detection (Enterprise Wide), Facility Access Control (Enterprise Wide)
System Operation - Commercial	Energy Management	GasStar	Bms [KeySpan]	Broker Management System	This is a transportation management system that handles all communications and interactions between National Grid and New England gas marketers (brokers). BMS provides functionality necessary to support the conditions of the current operating tariffs and is updated periodically to stay in compliance as regulations change. Keeps track of all marketer related transactions including customer information, broker nominations, billing and receivables.
System Operation - Commercial	Energy Management	GasStar	Cmcs	Company Managed Contract Services	This system keeps track of all information related to the release of pipeline contracts to gas marketers including capacity allocation, contract information and billing.

System Operation - Commercial	Energy Management	GasStar	Ebb	Electronic Bulletin Board/Gas Transportation System	Electronic Bulletin Board/Gas Transportation System - Internet application managing all gas supplies for LI and NY and RI city gate deliveries. Includes KeySpan gas supply, KeySpan and LIPA generation. Additionally provides two way communications between KeySpan and suppliers for the Natural Choice program. Functions include deliver requirements, nomination and confirmation reconciliation and SCADA interface of deliveries.
CIS	Energy Management	GasStar	Energy Markets Web	Esco Web	Part of CIS (NY) - Tech Management. Energy Suppliers can perform a variety of retail access functions: enrollments and drops, requesting usage history, viewing and downloading reports and billing maintenance.
System Operation - Gas	Energy Management	GasStar	Gtbb	Gas Transportation Bulletin Board	Gas supplier nominations, confirmation and reconciliation of deliveries, including under-delivery and under-nomination.
System Operation - Electric	Energy Management	GasStar	Isis Reports		An application that automates a compilation of monthly spreadsheet data for energy purchase transaction files obtained from ISO-NE
System Operation - Commercial	Energy Management	GasStar	ISO Settlement Information Systems	ISIS	Transfers and decompresses files from ISO-NE and stores them on a National Grid server where they are available to several internal National Grid operating departments for their analytical and reporting needs.
System Operation - Commercial	Energy Management	GasStar	Nucleus	Allegro	
System Operation - Commercial	Energy Management	GasStar	Pipeline Nominations		Internally developed application for tracking daily pipeline nominations (MS Excel).
System Operation - Commercial	Energy Management	GasStar	Supply Planning Excel Spreadsheets		Excel Spreadsheet models for: Supply Planning's Monthly GAC filings; Computing the city gate delivered price of gas; deal summary model; financial statements; pricing memos from KeySpan's gas suppliers(NEGM'sANE pricing) ; forecast models; oil & gas futures prices; Retail Marketer Model; Monthly Dispatch Strategy "Monthly set-up"; Daily Dispatch Strategy "Natset"; Storage Inventory & Ratchet Model

System Operation - Electric	Energy Management	GasStar	Transp	Transportation System	Manages transportation accounts
CIS	Energy Management	GasStar	TwS	Transportation Work System	Front end system that permits access to limited number of personnel to update marketer / customer relationships. Interfaces with CRIS.
System Operation - Electric	Energy Management	Meter Data Mgmt	Pulse	Process Underlying Settlement	Supplier load estimation and reporting, balancing and ISO settlement calculations, ICAP Support for NE. The system also supports NY ICAP processes
Asset Management / MDM Solution	Energy Management	Meter Data Mgmt	RAPR	Remote Access Pulse Recorder	An application used to calculate and retain electrical ratings of transmission circuits under different environmental conditions
System Operation - Electric	Energy Management	Meter Data Mgmt	Wholesale Settlement Application	WSA	Wholesale Settlement Application (WSA) is a vendor supplied application used by the Meter Data Services department. WSA is currently a PC based Oracle 10g application designed to handle the New England wholesale settlement process.)
System Operation - Commercial	Energy Management		Gisb/Naesb		Product allows us to exchange customer transactions with energy suppliers over the internet. As of 4/3/06, protocol is used for NY and MA choice transactions.
System Operation - Commercial	Energy Management		MBS [KeySpan]	Marketer Billing System	Provides capability for billing marketers which provide gas commodity to Keyspan Energy customers.
CIS	Engineering & Operations	Control Room & Outage Management	21Century	21st CENTURY - UCS (Universal Communications System)	System used for 'augmenting' our in-house customer storm outage requests and allows for the ability of Customer Callbacks for Power ETR - estimated time of restoration
Work Management	Engineering & Operations	Control Room & Outage Management	Event Based Resource Management Tool		Will be used to coordinate resource requirements on large scale emergency response
System Operation - Electric	Engineering & Operations	Control Room & Outage Management	Omsweb	OMSWeb	Web based home for PowerOn Admin Support and enhanced applications (ex: Critical Customer; Life Support, ETR).
System Operation - Electric	Engineering & Operations	Control Room & Outage Management	Pord	PowerOn Remote Dispatch	PowerOn Remote Dispatch is a web based outage tool used in barns when supporting decentralized storm.
System Operation - Electric	Engineering & Operations	Control Room & Outage Management	Portis	PowerOn Real Time Information System	PowerOn Real Time Information System is a web based application that provides real-time reporting of Outage Information 7x24x365.

System Operation - Electric	Engineering & Operations	Control Room & Outage Management	Poweron Application Suite	PowerOn Application Suite - Core PowerOn Application Suite	PowerOn is an Outage Management System used by Dispatch and Regional Control to manage Customer Outages. Thick client used to manage outages in control rooms.
CIS	Engineering & Operations	Control Room & Outage Management	Storm Central Web	Storm Central	Web based system that provides customer self-service for power outages. Functionality includes reporting an outage, determining if a customer's power is out, and current outage information across the territory.
Work Management	Engineering & Operations	Control Room & Outage Management	Storm Damage Assessment	SDA	A survey for storm related damage can be requested and initiated at any time where significant damage to our facilities is known or assumed to have occurred. This system is used to help manage the assessment process.
GIS	Engineering & Operations	Engineering Design & Plant	Analysis Models	Analysis Models (Water Intrusion/Active Leak; Synergee/GIS Analysis)	Analysis uses data from IID and Synergee to provide a visual map of water intrusions, active leaks as well as pressure information from Synergee (ESRI\IDB) / GIS Analysis
GIS	Engineering & Operations	Engineering Design & Plant	Arcfm	ArcFM - NE GIS Mapping System	ESRI GIS based map editing/viewing system used in NE.
GIS	Engineering & Operations	Engineering Design & Plant	Asset Management Spatial Analysis	ArcGIS, ArcSDE, ESRI, Environmental	ESRI Arc Suite of GIS products with data exported from Smallworld GIS to support Asset Management Analysis and Reporting. Also, used by Environmental Department.
Asset Management	Engineering & Operations	Engineering Design & Plant	Autocad [KeySpan]	AutoCad	CAD / CAE system used by designers and engineers to create, view, and manage drawings.
Asset Management	Engineering & Operations	Engineering Design & Plant	Autocad [NGUS]		A computer aided design software package
Meter Data Management	Engineering & Operations	Engineering Design & Plant	Checkmeter	Check Meter	Wholesale load data validation and load data management

GIS	Engineering & Operations	Engineering Design & Plant	Construction Orders	Construction Sketch	Allows viewing and printing of construction sketches produced from GIS Designs.
GIS	Engineering & Operations	Engineering Design & Plant	Corridor Manager	CM	A commercially available geospatial application that is built on GE Smallworld core technology. Its primary focus is to support the management of transmission rights-of-way and property corridors.
Elec Network Analysis	Engineering & Operations	Engineering Design & Plant	Cymdist	Primary Distribution Analysis Software	Primary distribution analysis software used for voltage, short circuit, load forecasting, load balancing, contingency planning, and capital program justification.
Elec Network Analysis	Engineering & Operations	Engineering Design & Plant	Cyme	Cymdist	Application to perform various electrical analysis studies on feeders. Facility data is supplied from an on-demand interface with GIS, along with load information.
GIS	Engineering & Operations	Engineering Design & Plant	Distribution GIS	GIS, Smallworld	Applications built on Smallworld GIS product to support Distribution Facility Management, Graphical design and mapping: STORMS Interface for estimating, ACES (Automated Construction Engineering), Map Products, Gas Corrosion Gas Valve Zone Management.
System Operation - Commercial	Engineering & Operations	Engineering Design & Plant	ERS	ERS Energy Resource System, ERS2000	ERS is used for data management and analysis of gas and electric load data. Data contained in ERS includes: System data including Generation (NM, NUG/UG's), Bulk Power through distribution including feeders, Inter-connecting tie points, Municipalities, and Large Commercial/Industrial customers. ERS is also used in billing customers through the Customer Service System.
Elec Network Analysis	Engineering & Operations	Engineering Design & Plant	Feedpro/Supplypro/Feeder-Health		Allow the entry of metered readings, project peak demand into the future. Feeder health matches interruption information against loading to weight relative 'health'
Asset Management	Engineering & Operations	Engineering Design & Plant	Field Sketch Library		Repository of scanned images of as-built drawings
GIS	Engineering & Operations	Engineering Design & Plant	FmMapviewer Lite	FDC Maps (NE)	Lightweight field map view and query application used primarily in NE by the mobile workforce (FDC crews, field supervisors, marketing, engineers, etc.).
GIS	Engineering & Operations	Engineering Design & Plant	FME	Feature Manipulation Engine	Export Electric and Gas objects from Smallworld and load into ArcSDE for Asset Management Analysis and other uses.

Asset Management	Engineering & Operations	Engineering Design & Plant	Fortis-Ne	Scanned Records, Fortis Imaging System for NE & LI	This application is the repository of scanned asset records for the entire NE & LI territory. This data is available to all clients via a web interface.
Work Management	Engineering & Operations	Engineering Design & Plant	Fsd	Field Smart Design	Provides the ability for Work Order design from workstation or handheld device in field to feed Maximo.
GIS	Engineering & Operations	Engineering Design & Plant	Geo-Analysis Tools		Various ESRI and Map Info projects used for facility and data analysis
GIS	Engineering & Operations	Engineering Design & Plant	Gis Aerial Images	GIS Photos	Aerial Photos of NY (NYS Clearinghouse website... <a href="http://www.nysgis.state.ny.us/">http://www.nysgis.state.ny.us/</a> ) and NE service territories
GIS	Engineering & Operations	Engineering Design & Plant	GSA [KeySpan]	Gas Sales Application	Used to identify the distance of new customer from the main
GIS	Engineering & Operations	Engineering Design & Plant	IDS-DVD'S	GIS Field DVD's	Provides read-only GIS data on DVD for use in mobile units. Smallworld data is sent to the vendor who converts it to another format and copies onto Cd's/DVD's.
Work Management	Engineering & Operations	Engineering Design & Plant	Mapframe		Provides two primary functions for the field workers through the Mwork application. First, it provides street level routing for the meter services workers. Second, Mapframe provides asset (GIS) and facilities data to the operations workers and supervisors
Asset Management	Engineering & Operations	Engineering Design & Plant	Microstation / Virtual Print Room	CADD, Engineering Drawings	Computer Aided Drafting and Design software for design of Substations, Regulator Stations, large gas meter installations, transmission, etc. Also the printing function to send schematic .tif images to be printed and folded on the Oce Printers in SOC D1
Elec Network Analysis	Engineering & Operations	Engineering Design & Plant	PSS/E	Power System Simulator for Engineering	Power flow modeling for transmission networks
System Operation - Commercial	Engineering & Operations	Engineering Design & Plant	Retail Price Generation System	RPGS, Price Transmission System, PTS, Electric Price Generation System, EPGS	Calculation of hourly prices
Gas Network Analysis	Engineering & Operations	Engineering Design & Plant	Stoner-Ne	Stoner Gas Workstation - NE (Synergee)	Models and analyzes networks of pipes, regulators, valves and compressors.

Gas Network Analysis	Engineering & Operations	Engineering Design & Plant	Synergee (Stoner or Advantica) [NG US]		SynerGEE-Gas models and analyzes closed conduit networks of pipes, regulators, valves, compressors, storage fields and production wells. SynerGEE serves as a general purpose-modeling tool for piping networks.
Gas Network Analysis	Engineering & Operations	Engineering Design & Plant	Synergee Customer Module (Cmm)		Software used in conjunction with Synergee. Customer load data is provided from CICS/CRIS and then used to produce Synergee models.
GIS	Engineering & Operations	Engineering Design & Plant	Transmission Linear Vision		Aerial images and software to view the images of transmission and sub-Transmission lines. Used to determine if there are any issues with the lines ( <a href="http://www.linearvision.com">www.linearvision.com</a> ) This is a user supported application and should be removed from the list.
GIS	Engineering & Operations	Engineering Design & Plant	Under Ground Facility Indexing Applications (To Support Ug Locating)	Underground facility indexing	This is an application built in ESRI (using ESRI Model Builder) that will pull data out of the SDE tables and generate shape files for Dig Safely (NY), Dig Safe (NE), and Premier Locating Company to facilitate Locate Ticket screening and processing. A contractor is building the model, but we (Scott, Jeff, or me) will need to maintain it going forward.
Meter Data Management	Engineering & Operations	Engineering Design & Plant	WECO		High-end testing software for large electric meters
System Operation - Electric	Engineering & Operations	Energy Control - SCADA	Ems		Energy Management System
System Operation - Electric	Engineering & Operations	Energy Control - SCADA	Ems Ne - Abb Spider	ABB Spider	ABB SPIDER System. It is a real-time system that provides power system monitoring, remote switching, tagging and contingency analysis capability.
System Operation - Gas	Engineering & Operations	Energy Control - SCADA	Gas Control-Sop	Gas Control-SOP	The application is used to electronically record, distribute and track all SOP's for the New York City (NYC), Long Island (LI) and New England (NE) territory. Users will create SOP records and the operating areas will be able to review/ approve the records within the application

System Operation - Electric	Engineering & Operations	Energy Control - SCADA	IDS [NGUS]	IDS - Core IDS	Application captures and tracks Distribution Interruptions, Transmission events and Local Disturbances, in near real time automatically informs MA DTE about significant outages.
Asset Management	Engineering & Operations	Energy Control - SCADA	Se And Ocean State Capacitor Database		Database of Capacitor settings and inspections
System Operation - Electric	Engineering & Operations	Energy Control - SCADA	Sir	System Interruption Reporting	Mainframe based system used to collect and report Service Interruptions to the Regulatory Agencies
System Operation - Electric	Engineering & Operations	Energy Control - SCADA	Transmission Loss Analysis	TLA	Calculates hourly transmission losses
System Operation - Gas	Engineering & Operations	Energy Control - SCADA	Us Gms	US GMS	The US GMS provides supervisory control and data acquisition (SCADA) for the US gas distribution system, used by Gas Control of Long Island, New England, New York, and Syracuse. (Includes GDO, OASyS, and Reportweb)
Meter Data Management	Engineering & Operations	Meter Data Mgmt	Epo Real Time Transfer	EPO Transfer	Background process on Windows server scheduled to run every two hours to read an LS file created by MV90 with meter reading data, reformats header 4 of the data file, and copies the new file to the outbound Slinger folder where EPO Slinger will read and FTP to Schnieder Electric EPO data site.
System Operation - Commercial	Engineering & Operations	Meter Data Mgmt	Epo Tracking		A small system used to manage/track EPO users of NE data and the associated billing of the service.
Meter Data Management	Engineering & Operations	Meter Data Mgmt	Internet Based Communication System	IBCS / 5 Minute Data Transfer / NE Winter LRP	2-Way Communications between ISO New England and the Customer -- Scheduled process that runs in the background on a windows server that reads data from MV90, reformats and aggregates the data and then uses EDI process to forward transformed data to the NE ISO.
System Operation - Electric	Engineering & Operations	Meter Data Mgmt	Iso Retail		Transmission owner load collection, calculation, and ISO reporting
System Operation - Electric	Engineering & Operations	Meter Data Mgmt	Load Response Program	LRP	Retail load response program for customer load reduction during critical periods of time. This is a menu option from the PC PULSE Application.

CIS	Meter To Cash	Customer	Account Initiation Customer Validation	AI Credit Validation	Internal web based system that enables Contact Center Reps to validate customers via Experian using an address and either date of birth or driver's license.
CIS	Meter To Cash	Customer	Ace		On line address standardization used by Onyx
CIS	Meter To Cash	Customer	Ciac	Contributions in Aid of Construction	Calculates cost distribution of electric service.
CIS	Meter To Cash	Customer	Cisdocs	CISDOCS Archive	CISDOCS is an in-house system to provide NE-Customer Service the ability to view the customers' documents such as Bills, Fiche, Notations, and Summary Bills. Currently NE-Customer Service uses a vendor, Anacomp, product called TascCold to view the Customers' Bills, Fiche, Notations, and Summary Bills. CISDOCS is a replacement system for TascCold system as it is no longer supported by the vendor.
CIS	Meter To Cash	Customer	Code-1		Address validation & correction software packages which provides validation, correction and standardization of customer address data produced out of CSS. It is also CASS-certified by the USPS.
CIS	Meter To Cash	Customer	Crдем	Cash Receipts Data Entry Manager	The Data Entry VB Application provides the capability to data enter cash batches for Teller Cash, HSP, Boston Housing Authority, Boston University, Fuel Assistance, Salvation Army and Welfare cash.

CIS	Meter To Cash	Customer	Crisiii	Customer Related Information System	Customer Related Information System - Core system used to manage customers' (residential, commercial, industrial) financial, service and contact experience, including accounts, billing, payment, and credit and collections transactions (including all revenue reporting), and field service orders, as well as customer participation in regulated (low income, special needs, etc.) programs/services, customer and marketer participation in retail choice , as well as company discretionary and marketing programs/initiatives for gas only customers in three regulatory and 6 franchise areas of new York (Brooklyn, Queens, and Staten Island), Massachusetts (Boston Gas, Colonial Cape, Colonial Lowell and Essex Gas franchises), and Energy north (new Hampshire) franchise. Keeps track of all customer attributes, including service orders, cash, credit, billing, and meter reading.
CIS	Meter To Cash	Customer	Css Suite	Customer Service System	Customer Service System - Core system used to manage customers' (residential, commercial, industrial) financial, service and contact experience, including accounts, billing, payment, and credit and collections transactions (including all revenue reporting), field service order initiation, as well as customer participation in regulated (low income, special needs, etc.) programs/services, customer and marketer participation in retail choice, and company discretionary and marketing programs/initiatives for gas only, electric only, and combined service customers in (four regulatory and five franchise/tariff areas) the Niagara Mohawk franchise area, and electric only customers in the Granite State (New Hampshire), Narragansett (Rhode Island), Massachusetts Electric, and Nantucket franchise areas. CSS also manages all street lighting and outdoor lighting accounts. NY and NE electric Customer Service System. Integrated Service orders, billing, collections,

					financials for residential, commercial, industrial, street lights/outdoor lighting. Major interfaces include MWork, GIS, and ERP.
CIS	Meter To Cash	Customer	Dialogue		Bill and letter composition tool.
Shared Services	Meter To Cash	Customer	Dsm	Demand Side Management	DSM allows management of MA, NH and RI State regulated energy efficiency programs, tracking program implementation workflow, construction tracking, recycling vendors and client/vendor payments through Peoplesoft. Support for regulatory reporting.
CIS	Meter To Cash	Customer	E-Correspondence	Accent Capture	This system captures all customer correspondence received by the company and attaches it to the customer's account, to be viewed via the Customer Contact dialog.
CIS	Meter To Cash	Customer	Equality	Witness eQuality	The Witness eQuality application is used by Customer Service and Collections to record and monitor Customer Service Representative phone transactions with customers. (audio & video of screen navigation)
CIS	Meter To Cash	Customer	Experian		Credit agency used on online system to identify a customer by social security number and name

GIS	Meter To Cash	Customer	Gcdb	Gas Customer Database	Database that is updated with customer data as reported from CSS. Allows users to identify the number of customers and their data in an emergency. Impacted areas can be determined either by using an interface to GIS or manually.
CIS	Meter To Cash	Customer	lavenue - Client	CRM, iAvenue NE	This is a CRM application for supporting Account Managers dealing with our Large commercial and Industrial customers in NE
CIS	Meter To Cash	Customer	IC Verify		The IC Verify application allows company personnel to process credit card authorizations for equipment or service purchases that any of our customers may want to make.
CIS	Meter To Cash	Customer	lex		Captures historical call volume information from various systems and enables the contact center to develop call volume forecasts and associated schedules to meet demand and maintain service level objectives
Shared Services	Meter To Cash	Customer	Legal Recovery System		A monthly dump of customer data from CRISS III is loaded into the Legal Recovery System. The Collections NY/NE area searches through these customers finding prime candidates to issue a demand letter and final a sue letter if the customer does not settle their outstanding bill. Demand/Collection letters and Sue Letters are generated by the legal department using this system. Customers that are sued are tracked through the system.
CIS	Meter To Cash	Customer	Mailstream Plus [Keyspan]		Perform PAVE processing on addresses for CAS and CRIS (postal discounting)
CIS	Meter To Cash	Customer	Mailstream Plus [NGUS]		Mail preparation software package that sorts mailing lists according to USPS standards for every class and type of mail to facilitate prompt and accurate delivery while attaining the highest postal discounts from the USPS.
System Operation - Gas	Meter To Cash	Customer	MercomAudiolog System	MercomAudiolog System	NY, NE, LI - VTELCO Recording System Proprietary Software - Vendor Supported

Work Management	Meter To Cash	Customer	MWork (FFE)	MWork (FFE) - Core MWork (FFE)	Delivers orders (work) to the field workers. Enables wireless transfer of work from a number of host systems to the field worker in virtual real time. It also allows the completion information to be transferred back to the host system. There is an office component (Mwork office) and a field component (Mwork field).
CIS	Meter To Cash	Customer	Onyx	Onyx Sales Force Automation	ONYX is a Customer Relationship Management (CRM) application built on Microsoft Windows and Web application technologies. Onyx Corporation (Now Consona) is the developer of this software. Onyx is a CRM software package used by Gas Sales & Marketing in support of Marketing and Sales GAS efforts throughout the Company's service territories. Onyx is used to support the selling cycle beginning with the recording of marketing efforts to the creation of sales opportunities & scheduling of sales rep and or plumber appointments, as well as tracking and managing leads through the sales closing process leading to the eventual adding of the new or increased gas load.
CIS	Meter To Cash	Customer	Payment Agent Maintenance Application		Windows based application for maintaining locations where customers can pay their bills. Also, batch application for ingesting weekly Western Union updates.
Shared Services	Meter To Cash	Customer	R&S	Revenue & Statistics	Provides a number of functions including: bill check capabilities for most accounts (recalculates the bill), provides revenue and tax reports, creates entries for the general ledger and journal voucher system.
CIS	Meter To Cash	Customer	Remedy - Customer Relations	Kexec - Executive Inquiries	Record customer correspondence to Keyspan executives and track work related to the correspondence. Used by customer relations group. Includes executive inquiries, Gas inquiries and complaints and Large Electric customer complaints.
CIS	Meter To Cash	Customer	Revenue Protection Case Load Tracking	Revenue Assurance	Track reported diversions including amount of electricity diverted, the dollar amount recovered and the monetary rewards made to employees.

Shared Services	Meter To Cash	Customer	Special_Ledgers	Special Ledgers	Maintains account information (payable and receivable) on accounts which cannot be billed properly in CRIS II. This is special accounts that cannot be handled by CHRIS alone
CIS	Meter To Cash	Customer	Summary Billing	Summary Billing	Manage the accounts with services in more than one locations
CIS	Meter To Cash	Customer	Tcr	Dual Entry of Rates	Provides the ability to enter new rate structures on-line for certain rate classifications (usually those which change monthly)
CIS	Meter To Cash	Customer	Trillium		Address standardization and integration of data across multiple sources. Integrated with Microstrategy warehouses
CIS	Meter To Cash	Customer	Verimove		Perform Move update processing on addresses for CAS and CRIS (mail forwarding)
Meter Data Management	Meter To Cash	Interval Meter Reading	Epo	EPO Energy Profiler Online	Interval data accessible via web interface. A hosted application. Used by NY customers to get access to daily unedited data. Used by NE internal and external customers to get access to edited data.
Meter Data Management	Meter To Cash	Interval Meter Reading	Mds Web	EDS Web, MDS Intranet	Web site to communicate issues with meter reads that the Meter Data Services Group is responsible for. This is used internally.
Meter Data Management	Meter To Cash	Interval Meter Reading	Metretek [NGUS]		Gathers customer usage data on a daily basis by reading meter electronically. Supports gas customer transportation.
Meter Data Management	Meter To Cash	Interval Meter Reading	Metretek- NE [KeySpan]	Metretek (NE) Meter Reading, DC2000	This system keeps track of all information related to daily metered customers with Metretek devices installed, in NE.
Meter Data Management	Meter To Cash	Interval Meter Reading	Mv90	Itron MV90	Interval meter data collection system. Validation, Editing, and Estimating (VEE) for wholesale and retail interval data. Client supported application.
CIS	Meter To Cash	IVR	Avaya - Ir	(Avaya) Interactive Voice Response	Provides customers with self-service options and collects account specific information prior to transferring to a Customer Service Rep

CIS	Meter To Cash	IVR	CSS IVR	VRU	CSS IVR--Interactive Voice Response used in upstate New York and New England by customers in CSS. Customers enter the IVR and can perform certain real time self-serve transactions against the CSS: obtain information such as balance due, next meter reading
CIS	Meter To Cash	IVR	Verint Web Review System		Record Gas Ops and Customer Field Support dispatchers, radio lines in MetroTech, fire lines, police lines, call center agents in MetroTech and Waltham, marketing and KHES agents in MetroTech.
CIS	Meter To Cash	ivr/website	Bms [NGUS]	Broadcast Message System	Web based application that provides additional outage information to CSS and IVR for planned and large scale outages.
Meter Data Management	Meter To Cash	Non Interval Meter Reading	Arcs	Automated Route Control System	Part of CIS(NY) - Billings. ARCS manages meter-reading routes and change meter read sequences within a route. and collects read time information from meter readers devices to accomplish this. This system interfaces directly with CSS to control all the meter routes
Meter Data Management	Meter To Cash	Non Interval Meter Reading	Itron	ITRON Meter Reading System - ITRON PP4	Itron Meter reading system - ITRON PP4 is the most recent version of ITRON meter reading system. which controls the upload and download of meter reading information to and from the CSS system for billing.
Meter Data Management	Meter To Cash	Non Interval Meter Reading	Mvrs-Ne	Multi Vendor Reading System-NYNE	MV-RS-NEis a meter reading field collection system used to support the obtaining of gas meter readings in the legacy Keyspan territories in MA and NH. The readings are used for billing, customer support and other purposes. The system supports normal (cycle) reading and reading for soft locks/unlocks (ons and offs). Cycle reads are obtained and returned to CRIS throughout the meter reading window. Soft lock/unlock reads are generally obtained and returned within 2 days.
CIS	Meter To Cash	Website	Siebel KED	National Grid E-Customer Self Service	Allow National Grid (Former KeySpan) customers to perform various self-account services online on the web (eService).

CIS	Meter To Cash	Website	Your Account Web	Your Account	Web based system that provides customer self-service for their accounts. Functionality includes bill payment, bill viewing, contact maintenance, start and stop service, and account and usage viewing.
Data Warehouse & Reporting	N/A	N/A	Business Objects		Data Warehouse serving the vast majority of reporting needs for Granite State
Asset Management	N/A	N/A	Fade	Field Accounting Data Entry	Application utilized to report Project Status', Equipment Usages, Rental Validations, Work Order Summaries, Blanket PO's as well as Long Term Disability Listings
Gas Network Analysis	N/A	N/A	FERC 720		FERC 720 provided gas transportation estimated vs. actual usage statistics on a publicly accessible website. This satisfies a regulatory requirement.
Data Warehouse & Reporting	N/A	N/A	Microstrategy		Data Warehouse serving the vast majority of reporting needs for Energy North
System Operation - Commercial	N/A	N/A	Pipeline Bulletin Boards		Tetco Link; Transco 1 Line; Dominion E-SCRIPT, Tennessee Passkey; Texas Gas GasQuest; Iroquois Online; Hattiesburg StarWeb
Shared Services	N/A	N/A	Strohl	STROHL Software	Vendor Package for managing disaster recovery and business continuation planning , now LPRPS a Sunguard System
Shared Services	Regulatory	Rates & Regulatory	CFMS		
Knowledge Mgmt& Collaboration	Regulatory	Rates & Regulatory	Dream	Dream	DREAM is a web based Docket Management system allowing the preparation, management and storage of regulatory filings for utilities. The application and database run on servers hosted outside the KeySpan/National Grid firewalls.
CIS	Regulatory	Rates & Regulatory	Gasrates NE	Gas Rates New England	This application collects gas rates and displays them by rate and date.

System Operation - Commercial	Regulatory	Rates & Regulatory	Tfms	Tariff Filing Management System	Tariff filing mgmt system used for filing FERC tariff's for NE Gas (KLNG)
Knowledge Mgmt& Collaboration	TBD	KM & C	Acidsee		Application used by claims investigators to organize their digital content
Knowledge Mgmt& Collaboration	TBD	KM & C	Documentum	Content Management System	Document and content management product providing services to over 16 National Grid applications. Part of EDIS
Knowledge Mgmt& Collaboration	TBD	KM & C	Versatile (Recmgmt)	Versatile	Client server application for the management and of hard copy documents
Shared Services	TBD	Legal	Legal EbillingAp Interface	LEAP Interface	This application is an interface between LEX and New England AP. It receives data from LEX processed through ETL, and produces an ASCII text output file which is processed into AP. It also produces summary reporting for all New England as well as Keyspan legal invoices.
Shared Services	TBD	Legal	Legal Exchange	LEX, Legal Exchange	This is a vendor hosted solution, which Legal Services arranged, that captures law firm invoices and tracks them through to payment. An Interface has been developed in ASP.NET between this application and the PeopleSoft Accounts Payable application.
Shared Services	TBD	Risk Mgmt	Rcts	Risk Control Tracking System	Client managed application for SOX controls monitoring and certification.
Meter Data Management			Alarm		Load sample design and retail load data management
Meter Data Management			Analyze-It		Sample design and analysis tool. Class load shapes development is used in production.
Meter Data Management			Lookup		Retail billing support
