

THE STATE OF NEW HAMPSHIRE  
BEFORE THE  
NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION

**Public Service Company of New Hampshire  
Energy Service Rate – Preliminary Mid-Year Adjustment**

**Docket No. DE 11-215**

**Joint Technical Statement of  
Robert A. Baumann and Frederick B. White**

**May 2, 2012**

**A. Purpose of Technical Statement**

This Technical Statement is being submitted to explain the major changes to Public Service Company's proposed Default Energy Service (ES) Rate effective July 1, 2012. This filing updates the Company's ES filing that was submitted on December 14, 2011.

**B. Proposed Rate**

On December 14, 2011, PSNH filed the updated 2012 ES rate of 7.90 cents/kWh to be effective for the 12 month period January 1 through December 31, 2012.

Subsequently, per Order No. 25,346 in DE-11-250, PSNH's ES rate for the period April 16, 2012 through December 31, 2012 was revised to 7.77 cents per kWh. In this filing, PSNH is proposing an ES rate of 6.85 cents per kWh effective July 1, 2012, which is a decrease of 0.92 cents/kWh from the currently effective ES rate of 7.77 cents/kWh. The rates above do not include the approved temporary ES rate of 0.98 cents per kWh associated with the wet flue desulfurization system ("Scrubber Project") at Merrimack Station which was placed in service on September 28, 2011.

The decrease in this updated ES rate is attributable to a net decrease in actual and forecasted costs of \$46.3 million [a decrease of \$59.6 million in expense, net of a revenue decrease of \$13.3 million] which is contained in Attachment RAB-1.

The 2012 forecasted cost changes are contained in Attachment RAB-2, page 3, and are specifically referenced below. The forecasted cost and revenue changes are attributable to a significant decrease in forward electricity prices as of April 16, 2012, lower actual load due to lower actual sales and increased customer migration, the planned sell-back of inventoried oil, and other changes as noted below.

### **C. Changes to Attachment RAB-2, page 3 from December 14, 2011 Filing**

For the forecast period April through December 2012, the impact of power supply variable cost updates is to lower ES costs by \$43.9 million. Following is a discussion of the major changes:

1. Lines 4 and 5 – Projected coal generation decreased 647 GWh due to increased economic reserve shutdowns. Lower coal generation is offset primarily by purchases from energy markets (Item 6) and from independent wood-fired power producers (Item 5 – Wood IPPs). Coal fuel expense decreased \$20.9 million reflecting lower generation, net of an estimated \$1.8 million of expense relating to coal deliveries and inventory management, and net of the removal of an assumed coal sell-back (in the December filing) of \$5.0 million.
2. Lines 7-9 – Schiller 5 REC revenue credits increased \$2.8 million due to increased REC prices. Generation increased 7 GWh resulting from conducting a portion of its annual inspection prior to the forecast period.
3. Lines 17-19 – Newington generation decreased 34 GWh and fuel expense decreased \$2.8 million due to changes in forward electricity prices and fuel costs. Included on line 19 is an estimated \$8.0 million of benefit from the planned sale of oil.
4. Lines 21-23 – IPP expenses decreased \$4.0 million reflecting lower forward electricity prices. A table showing forecasted forward electricity prices as of April 16, 2012 is provided below.

Forward Electricity Prices for Delivery at Massachusetts Hub

2012	All Hours - \$/MWh		<u>Change</u>	
	December 14, 2011 (11/30/11 Closing Prices)	May 2, 2012 (4/16/12 Closing Prices)	\$/MWh	%
Jan				
Feb				
Mar				
Apr	38.2	25.2	(13.0)	-34.0%
May	38.1	23.3	(14.8)	-38.9%
Jun	39.2	26.9	(12.3)	-31.4%
Jul	44.5	31.9	(12.6)	-28.2%
Aug	44.8	32.2	(12.6)	-28.2%
Sep	38.9	28.5	(10.4)	-26.7%
Oct	40.8	29.5	(11.3)	-27.7%
Nov	42.6	31.8	(10.8)	-25.3%
Dec	52.6	43.2	(9.4)	-17.8%
Total	42.2	30.3	(11.9)	-28.2%

5. Lines 25-26 – Wood IPPs - purchases from five independent wood-fired generators per NHPUC's Order No. 25,305 in Docket DE 11-184 are included as new line items - 467 GWh purchased for \$13.9 million. Wood IPPs are priced at forward electricity market prices (same as for “traditional” IPPs).

6. Lines 28-38 – Net purchases increased 84 GWh and expenses decreased by \$17.9 million. The net increase in purchases is primarily due to lower coal and Newington generation offset by Wood IPP purchases and includes 86 GWh of forward monthly peak bilateral energy purchases during April and May. The decrease in expenses is due to lower forward electricity prices.

7. Line 42 – Total Energy decreased 121 GWh due to an increase in migration from 34% to 36%. Total ES sales are lower by 115 GWh. The table below shows forecasted sales and migration (Non-ES sales) measured at the customer meter, as filed in December, 2011 and for this filing. The amount of migration modeled in this update utilizes data thru March, 2012 and is 36.0% of forecasted total PSNH sales. Overall, 2012 ES sales are lower by 3.0% from the estimates used in the December, 2011 ES rate filing.

8. Other forecasted changes totaling a net \$1.5 million cost decrease include the following: cost decreases to capacity, RGGI, congestion & losses, and ISO ancillaries and expenses (together a \$3.1 million cost decreases); and a \$1.6 million cost increase to RPS expenses.

**D. Other Cost Changes (\$ 15.7 million cost decrease)**

9. All other actual and forecasted costs decreased by \$ 15.7 million. The decrease in other actual and forecasted costs was primarily due to lower market prices. The decrease of the forecasted expense changes noted in items 1-8 above totaled \$43.9 million plus the other cost changes of \$15.7 million resulted in a total expense decrease of \$59.6 million.

**E. Revenue Changes (\$ 13.3 million decrease)**

10. The updated ES revenues for 2011 and 2012 decreased by \$13.3 million due to lower sales caused by warmer weather through March 2012 and additional customer migration. The actual 2011 sales are lower by 18 GWh and the actual and forecasted 2012 sales are lower by 180 GWh.
