

THE STATE OF NEW HAMPSHIRE

BEFORE THE

PUBLIC UTILITIES COMMISSION

DT 12-_____

PETITION OF COMCAST OF MAINE/NEW HAMPSHIRE, INC. et al.
FOR GENERAL LICENSE TO CROSS OVER PUBLIC WATERS

NOW COME Comcast of Maine/New Hampshire, Inc. and its affiliates, Comcast of Connecticut/Georgia/Massachusetts/New Hampshire/New York/North Carolina/Virginia/Vermont, LLC, Comcast of Massachusetts/New Hampshire, LLC and Comcast of New Hampshire, Inc. (“Comcast”), the owners of a cable network located in approximately 100 cities and towns within the State of New Hampshire, and, pursuant to RSA 371:17, respectfully request that the New Hampshire Public Utilities Commission (“the Commission”) issue a general license to permit Comcast to maintain its existing cables and other wires over and across certain of the public waters of the State of New Hampshire. In support of this Petition, Comcast states as follows:

Background/Procedural History

1. By Order No. 25, 175 issued November 30, 2010 in Docket DT 10-239, the Commission directed Comcast of Maine/New Hampshire, Inc. to review all of its existing water crossings in New Hampshire to determine whether each crossing requires a license pursuant to RSA 371:17. In addition, the Order directed that “to the extent unlicensed crossings of public waters are discovered, Comcast is expected to comply with RSA 371:17 no later than July 1, 2011.”

2. Pursuant to Order No. 25, 175, Comcast coordinated with Commission Staff to determine the public water bodies over which Comcast's facilities cross. In December 2010, Staff provided to Comcast a list of all New Hampshire waterways ("Waterway List") in a format compatible with Comcast's Geographical Information System ("GIS") facilities mapping system.

3. Led by Mr. Glenn Fiore, Comcast undertook a lengthy and comprehensive evaluation of the more than 600 locations named in the Waterway List. This manually intensive effort began in early March 2011 and was completed on June 24, 2011. In total, approximately 2,500 hours were directed toward this initiative. Comcast summarized its work in a memo provided to Commission Staff on September 23, 2011. Comcast's comprehensive water crossing investigation included the following steps:

- Comcast utilized its internal GIS mapping database that is used to document Comcast's plant and facilities within its cable-franchised footprint in New Hampshire. Comcast also engaged a GIS mapping expert consultant to assist in the review.

- Comcast's internal "desktop review" consisted of using its GIS mapping and plant data information in conjunction with a second GIS Source ("Google Maps") to locate each waterway on the Waterway List within Comcast's New Hampshire cable-franchised service area.

- A town-by-town investigation determined where Comcast infrastructure or facilities came within close proximity to any waterway by tracing out each waterway to its extremities. This was a manual process that required review by Comcast of the various GIS screen shots and reference information. The manual desktop review

ultimately identified 465 potential waterway crossings within Comcast's New Hampshire cable-franchised areas which were flagged for further field survey review.

- Comprehensive on-site field surveys were performed at each of the 465 flagged locations. These surveys confirmed whether Comcast facilities crossed waterways in the flagged locations, inventoried the types of cables Comcast has in place over each crossing, and noted whether Comcast's facilities were aerial attachments to utility poles or placed in conduit on bridges. The field surveyors took measurements at every pole, noting clearance distances over the waterway, and the general health of the facilities to insure they were in compliance with all relevant codes. Field surveyors also took digital photographs of each location.

- The field surveys revealed that Comcast has a total of 380 crossings over 174 different bodies of water identified on the Waterway List. A list of these crossings was provided on a confidential basis to Commission Staff at a meeting held on August 18, 2011; sample field survey sketches were provided to Commission Staff with Comcast's September 23, 2011 memorandum.

4. On July 1, 2011, Comcast filed a Response and Motion for Enlargement of Time seeking an extension of the deadline established in Order No. 25, 175 so that Comcast and Commission Staff could explore the following issues raised in the Response and Motion:

A. Comcast's current foot print in New Hampshire was created by predecessor companies (Continental Cablevision, MediaOne and AT&T Broadband) and is the result of the acquisition of numerous unrelated cable companies over time, including but not limited to Adelphia, Colony Communications, Harron Communications, Mountain Cable,

American Cablesystems, Community TV Corporation, Time Warner Cable and others. Because the bulk of Comcast's New Hampshire cable network was initially constructed over thirty to forty years ago by these predecessors, it is not clear whether or when petitions for licenses relative to these facilities were filed with the Commission under RSA 371:17.

B. Comcast's (and its predecessors') cable systems in New Hampshire were built many years ago pursuant to an existing framework of federal law, which established a system of franchising for cable systems. All of Comcast's facilities in New Hampshire public ways are constructed, owned and maintained pursuant to its franchise agreements with municipalities. Federal law clearly establishes authority for franchised cable operators to occupy public rights of way and easements dedicated for compatible uses, and to deploy cable plant using existing utility poles, conduit and rights of way. *See* 47 U.S.C. § 541(a)¹; 47 U.S.C. § 224.² State or local requirements that are inconsistent with this federal regime are preempted.³

¹ Specifically, Section 621 of the Cable Act, 47 U.S.C. § 541, provides for a system of local franchising. Under the statute, a "franchise" is "an initial authorization, or renewal thereof," issued by a franchising authority to construct or operate a cable system. 47 U.S.C. §522(9). Section 621(a)(2) provides that cable franchises "shall be construed to authorize construction of a cable system over public rights-of-way, and through easements, which is [sic] within the area to be served by the cable system and which have been dedicated for compatible uses."

² Section 224 of the Cable Act establishes a legal framework for cable operators' use of existing utility poles, conduits and rights of way. Section 224(f) requires electric and telephone utilities give telecommunications carriers access to "any pole, duct, conduit, or right-of-way owned or controlled" by them. Until recently, pole attachments in New Hampshire were governed by federal laws, which dictated the rates, terms and conditions of attachment. The State of New Hampshire certified to regulate poles in 2010 and now the rates, terms and conditions of pole attachments are governed by state laws. *See* RSA 374:34-a; PUC Rules 1300 et seq. PUC rules include a similar obligation of non-discriminatory access to utility poles, ducts and rights of way. *See* PUC Rule 1303.01.

³ *See Office of Consumer Counsel and New England Cable and Telecommunications Association, Inc. v. Southern New England Telephone Company d/b/a AT&T Connecticut, Inc. and Department of Public Utility Control of the State of Connecticut*, 514 F. Supp. 2d 345 (D. Conn. 2007); *Qwest Broadband Services, Inc. v. City of Boulder*, 151 F. Supp. 2d 1236 (D. Colo. 2001) (finding statutory scheme that placed franchise approval process in hands of voting electorate to be preempted, and recognizing that "in establishing regulatory guidelines, Congress was concerned both with relieving the cable industry from

C. New Hampshire law authorizes municipalities to award cable television franchises. *See* N.H. RSA 53-C:3. Such municipal franchising authority includes the authority to construct or operate a cable system. *See* RSA 53-C:1, III. In 1974, all existing licenses, permits and other authorizations for a cable system in operation as of April 2, 1974 were deemed to be a franchise. *See* RSA 53-C:5.

D. Cable system plant in New Hampshire was largely built using existing pole infrastructure and the large majority of Comcast's water crossings are constructed aerially using existing poles owned by New Hampshire public utilities. Comcast has license agreements with utility pole owners that govern all of its pole attachments in New Hampshire, requiring all facilities to be built in compliance with specifications of the latest editions of the Bellcore Bluebook of Construction Practices, the National Electric Safety Code (NESC) and the National Electric Code (NEC). Upon information and belief, all of the utilities with whom Comcast has license agreements have been authorized by the Commission for their water crossings. In these circumstances, Comcast believes that all of its water crossings using the poles of New Hampshire public utilities comply with RSA 371:17.

E. In addition to its pole attachment agreements, Comcast holds franchises to serve all of the New Hampshire communities in which it has cable system facilities and in which its water crossings are located. Comcast's franchises in New Hampshire generally authorize Comcast to construct, operate and maintain facilities in "Public Ways," which are defined as public waterways, bridges and public waters located within

unnecessary, burdensome regulation, and with ensuring that cable systems remained responsive to the needs of the public.")

the franchise area. Accordingly, Comcast believes that these franchises and pole attachment agreements provide the requisite authority to cross public waterways.

5. The Commission issued a Secretarial letter on August 5, 2011 directing Comcast and Staff to collaborate on the issues filed in the Response and Motion and to provide a status report to the Commission no later than October 1, 2011. On August 18, 2011, representatives of Comcast met with Staff to discuss the issues set forth above. At that time, Comcast provided Staff with the list of 380 locations that Comcast had initially identified as those where its facilities crossed over water bodies named in the Waterway List provided by Staff in December 2010.

6. Staff and Comcast filed a status report on September 30, 2011, noting that Comcast had provided Staff with a list of 380 existing water crossing locations along with a written summary of the method Comcast used to undertake a comprehensive review and survey of all of these crossing locations within its New Hampshire cable-franchised territories. The report also indicated that Comcast and Staff agreed to the following: 1) Comcast will supplement its water crossing list with more detailed information about each crossing; 2) instead of litigating the issue of whether RSA 371:17 applied to Comcast's water crossings, Comcast will seek a general license applicable to all existing water crossings included in the above-referenced list; 3) Staff and Comcast will collaborate on developing an appropriate process for the filing and review of a petition for general license; 4) that such petition will be filed without Comcast conceding that that the Commission has authority to require such a filing and without prejudicing Comcast's right to seek a declaratory ruling in the future of the legal issue of whether the Commission has authority under RSA 371:17 over a cable provider; and 5) Comcast and

Staff will continue to discuss these issues with the intention of reaching a settlement agreement that will be filed with the Commission prior to December 31, 2011.

7. Comcast continued to collaborate with Staff to refine the initial list of 380 water crossings to include only those that Staff believed were subject to the Commission's review, i.e. crossings over water bodies classified at and above the 4th Order River level as set forth in the Official List of Public Waters compiled by the New Hampshire Department of Environmental Services. Comcast and Staff also agreed that Comcast would file with the Commission a petition for general licensure for these crossings, supported by documentation consisting of by survey documents prepared by Precision Valley Communications which include a waterways survey field sketch, location maps, and photographs for each eligible crossing. Comcast and Staff further agreed that such filing by Comcast would be made without conceding the Commission's authority to require such a filing for future crossings and without prejudicing Comcast's right to seek a declaratory ruling in the future on the legal issue of whether the Commission has authority under RSA 371:17 over a cable provider.

8. On December 27, 2011, Staff Attorney Lynn Fabrizio filed a letter with the Commission indicating that during the course of Comcast's further discussions with Staff, the parties realized there was a need to refine Comcast's initial list of 380 crossings, as a number of them did not appear to meet the criteria established by the Commission in prior orders for licenses issued under RSA 371:17. In addition, the December 27th letter stated that Comcast and Staff have agreed that: 1) Comcast will file a petition no later than February 29, 2012 for a general license covering all existing Comcast crossings in New Hampshire meeting criteria specified in prior Commission

orders, and that are classified at and above the 4th Order River level as set forth in the Official List of Public Waters compiled by the New Hampshire Department of Environmental Services; 2) the petition will be supported by survey documents prepared by Precision Valley Communications which include a waterways survey field sketch, location maps, and photographs for each eligible crossing; and 3) the petition will be made without conceding the Commission's authority to require such a filing for future crossings and without prejudicing Comcast's right to seek a declaratory ruling in the future on the legal issue of whether the Commission has authority under RSA 371:17 over a cable provider. The December 27th letter also indicated that given the need to refine Comcast's water crossing list, Staff and Comcast propose that they be granted additional time to work on finalizing that list for filing with a general petition by no later than February 29, 2012.

9. By secretarial letter dated January 3, 2012, the Commission extended the deadline to February 29, 2012 for filing the petition for general license as described in Staff December 27, 2011 letter.

Request for General License

10. In accordance with the above-described agreement with Staff, Comcast submits this Petition for a General License for all of the water crossings identified in Appendix A, submitted herewith. This filing is intended to resolve the issues raised in Order No. 25,175 without conceding the Commission's authority to require this filing, and without prejudice to Comcast's ability to assert in a future proceeding its position concerning the inapplicability of RSA 371:17 to Comcast's facilities.

11. In order to meet the reasonable requirements for service to their customers, Comcast and its predecessors, since the 1970's, have installed facilities (e.g. cables and wires) crossing public waters of the state. These facilities were installed within New Hampshire municipalities that have granted Comcast a franchise to construct and operate its cable facilities, and have been placed on the poles of New Hampshire public utilities pursuant to licenses granted by those utilities to Comcast, or within conduit or on bridges pursuant to authority granted by public utilities, municipalities or the New Hampshire Department of Transportation.

12. Pursuant to Order No. 25, 175, Comcast has worked with Commission Staff to determine the public water bodies that Staff has determined require the Commission's permission for crossing. As detailed above, Comcast worked diligently to identify its facilities that cross over those public water bodies. A list of the crossing locations for which Comcast seeks approval in this Petition is contained in Appendix A.

13. Because the Commission has not promulgated rules to implement the provisions of RSA 371:17, there are no regulatory requirements concerning the type of information needed by the Commission for its review of Comcast's water crossings. Accordingly, in the absence of regulations, Comcast has worked with Commission Staff to determine the information to be submitted with this Petition. Pursuant to its agreement with Staff, Comcast submits herewith, along with a motion for protective order and confidential treatment, two unredacted paper copies and one flash drive containing the following information for each of the water crossings listed in Appendix A: 1) a dated cover page identifying the municipality, water body, water body "order" or level, and street name; 2) Precision Valley Communications waterways field survey report (which

includes pole numbers, a description plant structure and a field survey sketch); 3) a map of the crossing location; and 4) a photograph of the crossing. Also submitted herewith is a third/public copy of the above-described documents containing redactions of very limited information on each Precision Valley Communications report.

14. Facilities at each of the crossings listed in Appendix A were constructed by Comcast or its predecessors and will be maintained and operated by Comcast, its affiliates and contractors.

15. Comcast submits that the requested license may be exercised without substantially affecting the rights, use of enjoyment of the public in the public water bodies identified in connection with each of the crossings listed in Appendix A. Minimum safe line clearances above the water surfaces and affected shorelines will be maintained at all times. In addition, Comcast is not aware that any party has objected to the water crossings listed in Appendix A. In these circumstances, the Commission may grant this petition without a hearing. *See* RSA 371:20.

16. Due to the number of documents submitted with this filing, Comcast respectfully requests, pursuant to N.H. Code of Admin. Rules Puc 201.05, that the Commission waive the requirements Rule Puc 203.02 (a)(1) and allow Comcast to submit one redacted and two unredacted paper copies of the supporting documents. This waiver serves the public interest as compliance with the rule requiring seven copies of the filed documents would be onerous given the unique circumstances presented by the instant proceeding. In addition, the waiver will not disrupt the orderly and efficient resolution of matters before the Commission and may actually promote orderly and efficient resolution

by not inundating the Commission with excessive and duplicative documents.

Commission Staff Attorney Lynn Fabrizio has consented to this waiver request.

WHEREFORE, Comcast respectfully requests that the Commission:

- A. Grant to Comcast a license authorizing Comcast to maintain its existing facilities identified in Appendix A over the corresponding public water bodies identified in said Appendix.
- B. Find that said license may be exercised without substantially affecting the public's rights in the public waters that are the subject of this petition;
- C. Issue an Order *Nisi* and orders for its publication; and
- D. Grant a waiver of N.H. Code Admin. Rules Puc 203.02 (a)(1) as requested herein; and
- E. Grant such further relief as it deems appropriate.

Dated: February 29, 2012

Respectfully submitted,

Comcast of Maine/New Hampshire,
Inc. et al.

By their attorneys,
ORR & RENO, P.A.
