Electricity NH, LLC (“Electricity New Hampshire”)
Terms of Service

Purchase of Electric Generation Service. Electricity New Hampshire agrees to sell and you agree to buy, your full requirements for electric generation service (measured in kilowatt hours) at the price and on the terms and conditions specified in this agreement (the “Supply Contract”) throughout the term of this Supply Contract. The purchase and sale of energy hereunder shall commence at 00:00:01 EST on the first day that Electricity New Hampshire provides physical delivery to your facilities and shall end at 24:00:00 EST on the last day of the term.

1. Price Structures. You will be billed a fixed rate in cents per kilowatt hour (“kWh”) for your actual consumption of electricity. The Price Structures do not include any applicable taxes. In addition, the Price Structures do not include the price of transmission and distribution, the system benefits charge and stranded cost recovery. You are responsible for paying your local utility distribution and transmission charges as well as any other applicable charges. Electricity New Hampshire reserves the right to change its Price Structures at a minimum of once annually in March of each year and as market conditions may demand. We will notify you of any price change in writing, via your email address on file, with thirty (30) days prior notice.

Electricity New Hampshire offers two fixed rate price structures:

a. Prime Savings - Set annually based on the current Utility standard offer rate and market conditions at the time. This is the introductory rate offered by Electricity New Hampshire.

b. Basic Savings – Set annually based on the current Utility standard offer and market conditions at the time. It is a rate that is higher than the Prime Savings rate and less than the current Utility standard offer. This rate is reserved for accounts that do not wish to enter into an annual fixed rate supply contract and accounts that become more than thirty 30 days in arrears.

The current Prime Savings and Basic Savings rates are set forth in Appendix A.

2. Duration and kind of contract. This Supply Contract is a contract for your supply of electric generation service. The term of this Supply Contract is annual, beginning at the next meter read date after the Utility processes your enrollment with Electricity New Hampshire. Service commencement lead-time may vary depending on utility enrollment requirements, and your specific meter-reading schedule. Upon commencement of service, this Supply Contract will renew automatically on an annual basis at the then current Electricity New Hampshire Prime savings rate until terminated by you or Electricity New Hampshire, in which case this Supply Contract will terminate on the next utility meter read date for your account that is at least thirty (30) days after the notice of termination. You have the right under New Hampshire law to change electricity suppliers subject to the terms of this Supply Contract. If you terminate this Supply Contract prior to the completion of the initial 12 month period, Electricity New

Hampshire reserves the right to charge you a “Cost Recovery Fee” of \$100 which is intended not as a penalty, but simply to offset the cost of selling the unused portion of your electricity to others and estimated lost revenue that Electricity New Hampshire may incur from such a sale, if any, and related expenses.

3. Payment of Bills. The cost of your electric generation service will be included on your bill from the Utility (PSNH, Unitil, NGRID, or NH CO-OP), and is due and payable when your Utility bill is due and payable. You agree to accept the measurements as determined by the Utility for purposes of accounting for the electric power supplied under this Supply contract. You will be billed additional charges, including charges to transmit and distribute the electricity to you, from the Utility consistent with its filed tariffs. Electricity New Hampshire reserves the right to change billing methods.

When the Utility issues you a consolidated bill that includes charges for electric generation service supplied by Electricity New Hampshire, all invoiced balances not paid in full by the due date are subject to the Utility’s late payment policies and procedures, including assessment by the Utility of late payment fees and interest.

In the event you default in your payment or other obligations under this Supply Contract by more than fifteen (15) days, we may either (i.) move your account to the Basic Savings rate or (ii.) cancel this Supply Contract upon thirty (30) days written notice, at which subsequent time you will default to the Utility’s Standard Offer rate plan. You will be responsible for balances owed to Electricity New Hampshire for generation service and Electricity New Hampshire’s actual out-of-pocket expenses incurred in enforcing its rights under this Supply Contract, including reasonable attorney fees and actual court costs.

4. Credit Reporting. When you first apply for service and during the term of the Supply Contract with Electricity New Hampshire we may contact a credit reporting agency to obtain utility credit history and credit score. Once enrolled, Electricity New Hampshire reserves the right to report your payment history to a credit reporting agency.

5. Customer Deposits. Electricity New Hampshire does not require a customer deposit to enroll.

6. Warranty Disclaimer; Damages; Force Majeure.

No additional fees will be assessed to you by Electricity New Hampshire except as noted in this contract. Your account may be (i.) moved to the Basic Savings rate or (ii.) terminated by Electricity New Hampshire as a penalty for non-payment of your account in excess of fifteen (15) days.

You are responsible for settlement of any balances for generation service, late payment or interest charges owed to your Utility as per paragraph 3 of this agreement.

New Hampshire incurring additional costs and expenses in providing your electricity service, these additional costs and expenses shall be your responsibility and they will be assessed in your monthly bill as a pass-through charge.

8. Estimated Bills. In the event the Utility is unable to read your electric meter, the Utility will estimate your usage and your charges will be calculated accordingly and adjusted on a future bill.
