Docket No. DT 07-027
Company Responses
To Patnode Set 1 Data Requests
September 4, 2007

Patnode 1-10: Please identify the total number of residential customers, within each exchange area of each company, that use VoIP to communicate to persons within their exchange rather than basic local exchange service.

Response:

The way the Petitioners understand how VoIP service is provided and works, the Petitioners would have no idea or access to information that could possibly respond to this question. For example any customer with access to broadband, either using DSL, cable modem or satellite, could have service with a VoIP provider and we would have no way of knowing, nor would we know how they use VoIP service, nor would we know who they call.

Michael C. Reed is responsible for this response.
