Andrew Locke Vice President Hydro Management Group, LLC c/o Essex Hydro Associates, LLC 55 Union Street, 4th Floor Boston, MA 02108

Re: DE 12-182, Hydro Management Group, LLC's Eligibility Request for Mr. Mark Coulson's Wyandotte Hydroelectric Project to Produce Class IV New Hampshire Renewable Energy Certificates (RECs) Pursuant to RSA 362-F and Laws of 2012, Chapter 272

Dear Mr. Locke:

On June 29, 2012, Mr. Mark Coulson submitted an application requesting Class IV certification for the Wyandotte Hydroelectric (Wyandotte Hydro) project pursuant to RSA 362-F, New Hampshire's Renewable Portfolio Standard law and Laws of 2012, Chapter 272. Staff reviewed the application and requested additional information on July 11, 2012. Mr. Coulson requested that Hydro Management Group, LLC (Hydro Management Group) respond to the information request. Staff has reviewed the application and additional information provided by Mr. Coulson through Hydro Management Group and recommends approval, noting that the application was completed on July 18, 2012 in accordance with New Hampshire Code of Administrative Rules Puc 2500.

Pursuant to Laws of 2012, Chapter 272, existing small hydroelectric facilities with a total nameplate capacity of one megawatt (MW) or less are eligible for Class IV RECs if they are in compliance with applicable Federal Energy Regulatory Commission (FERC) fish passage restoration requirements, and are interconnected with an electric distribution system located in New Hampshire. Wyandotte Hydro is located on the Cocheco River in Rochester, NH.

Mr. Coulson provided FERC approvals for Wyandotte Hydro under project number (5563-000) as well as a copy of the interconnection agreement with Public Service Company of New Hampshire. The start date for commercial operation was listed

as 1985; FERC approvals and interconnection agreements provide dates back to 1982. The nameplate capacity generation is .117 MW of electricity.

The Commission has reviewed the Coulson application for Wyandotte Hydro and determined that all the necessary documentation has been provided to demonstrate that it is eligible for Class IV certification. Therefore, the Commission hereby certifies Wyandotte Hydro as a Class IV renewable energy source eligible to be issued New Hampshire Class IV RECs effective on July 18, 2012.

The facility's NEPOOL generation information system (GIS) facility code is MSS 903. Attached please find a copy of the notice of this certification provided to the GIS administrator. The New Hampshire Renewable Portfolio Standard certification code for Wyandotte Hydro is NH-IV-12-035.

Sincerely,

Debra A. Howland Executive Director

Re: **DE 12-182**, Hydro Management Group, LLC's Eligibility Request for Mr. Mark Coulson's Wyandotte Hydroelectric Project to Produce Class IV New Hampshire Renewable Energy Certificates (RECs) Pursuant to RSA 362-F and Laws of 2012, Chapter 272

New Hampshire Certification Code NH-IV-12-035

Dear Mr. Webb:

Please be advised that the New Hampshire Public Utilities Commission has certified Mr. Mark Coulson's Wyandotte Hydroelectric Project (Wyandotte Hydro), as a Class IV renewable energy source effective July 18, 2012 pursuant to NH RSA 362-F. Accordingly, Wyandotte Hydro is eligible to be issued New Hampshire Class IV RECs.

Wyandotte Hydro is located on the Cocheco River in Rochester, NH, and has a nameplate capacity of .117 MW of electricity. The start date for commercial operation was listed as 1985; FERC approvals and interconnection agreements provide dates back to 1982. Hydro Management Group and Mr. Coulson have provided evidence that Wyandotte Hydro operates in compliance with the Federal Energy Regulatory Commission fish passage restoration requirements (Project Number 5563-000), as well as a copy of the interconnection agreement with Public Service Company of New Hampshire. The facility's NEPOOL generation information system (GIS) facility code is MSS 903. The New Hampshire Renewable Portfolio Standard certification code is NH-IV-12-035.

Sincerely,

Debra A. Howland
Executive Director
