Re: DE 12-214, Public Service Company of New Hampshire
Constellation Request for Filtrine Manufacturing Company Load Data

Dear Attorney Donovan:

On July 11, 2012, our General Counsel, F. Anne Ross, received a telephone call from Robert Bersak, counsel for Public Service Company of New Hampshire (PSNH), concerning a request by Julie Leimone, on behalf of Constellation Energy Resources, LLC (Constellation), for customer load data for Filtrine Manufacturing Company (Filtrine). According to Mr. Bersak the customer signature for Filtrine did not match an earlier one received by PSNH in 2009. As a result of the questionable looking signature, a PSNH representative called Filtrine to confirm the validity of the request. On the call to Filtrine, PSNH was informed that the President, Peter Hanel, the purported signer, was out of the country and could not have signed a request on July 10, 2012.

I have attached the July 10, 2012 request forwarded by PSNH as well as the earlier 2009 request, also forwarded by PSNH. The Commission is treating this matter as a complaint pursuant to RSA 365:1 and :2 and will require that Constellation respond to the allegation that the customer load request for Filtrine contained a forged signature for the president, Mr. Hanel. Your response is due on or before August 1, 2012. Docket No. DE 12-214 has been assigned for future filings in this matter.

Sincerely,

A handwritten signature in cursive script that reads "Debra A. Howland".

Debra A. Howland
Executive Director

MDATA Online - EPO Energy Profiler Online - Service Agreement

PSNH will provide interval meter data via an access protected web site. The customer must be on rate GV or LG and have at least one interval-recording meter per account. PSNH, and any third party contracted by PSNH, will not disclose any customer-confidential information including, but not limited to, customer name and address, metering, billing and pricing, power usage, etc. without prior consent from the customer. PSNH may, at our discretion, cancel this agreement and return the unused pro-rated portion of fees received. All sections must be completed.

This form or a letter of authorization can be used to request non-interval usage history and icap tag data.

<input checked="" type="checkbox"/>	One time request, \$50.00 per account. All interval data available at the time of the request will be provided online. User id & password <u>expires</u> 30 days after access begins.
<input type="checkbox"/>	Annual subscription, \$300.00 per account - billed once yearly. All interval data available at the time of the request will be provided online. The subscription <u>automatically</u> renews each year.
<input type="checkbox"/>	Annual subscription, \$25.00 per account, per month. All interval data available at the time of the request will be provided online. The subscription <u>automatically</u> renews each year.

MDATA Online - EPO Energy Profiler Online - Service Agreement

PSNH will provide interval meter data via an access-protected web site. At least one interval-recording meter is required per account. PSNH, and any third party contracted by PSNH, will not disclose any customer-confidential information - including customer name and address, metering, billing and pricing, power usage, business activities, and down-line customer information - without prior consent from the customer. PSNH may, at our discretion, cancel this agreement and return the unused pro-rated portion of fees received.

This form must also be used for non-interval usage histories.

Service Options - select one:

One-Time request, \$50.00 per account
All interval data available at the time of the request will be provided online. The user id and password will expire 30 days after the start of the service.

Annual subscription, \$1,000.00 per account, billed monthly.
All interval data available at the time of the request will be provided online. For phone-accessed meters, data will be updated daily. Occasionally, data may be delayed due to meter or communication difficulties. PSNH will work with the customer to resolve any issues as quickly as possible. For manually-read meters, data will be updated approximately once a month.
