Peter G. Bloomfield, President

The Calculation of the fuel charge shall be reported each month to the Public Utilities Commission and the charge so reported shall govern the billing for that month, but in no case shall the provisions of this clause apply except on the basis of the report filed with the Public Utilities Commission.

Flat Rate:

A flat unmetered rate may be charged wherever steam usage is low and is furnished for purposes other than space heating. If the appliances specified in the application for service and the probable amount of their use will result in an average consumption of less than 5,000 pounds of steam per month, service will be rendered without metering at a price equal to the bill for 5,000 pounds of steam per month. The Company will, at least once each calendar year, check the appliances and use. If in the Company's estimation the probable use will exceed an average use of 5,000 pounds per month, a meter shall be installed and the meter rate shall be applied.

Turn-On Charge:

When service has been shut off for just cause, the Customer will be charged for restoring service. If steam service has been shut off at the customers request between October and May, and if the customer subsequently requests that it be turned on again before the end of May, the customer will be charged for restoring service. The minimum service charge will be one hour of service technician's time at the Company's standard charge out rate, which is \$90/hr.

Terms:

Bills will be rendered within the first 15 days of each month for service during the previous month. The bills shall be payable upon presentation and shall bear interest at the rate of 1-1/2% per month from the first of the following month on the unpaid balance.
