Public Service Company of New Hampshire
2012 Energy Service/Stranded Cost Recovery Charge Reconciliation
OCA's Responses to PSNH's Data Requests - Set #1

Date Received: November 25, 2012
Request No.: PSNH 1-25

Date of Response: December 9, 2012
Witness: Stephen R. Eckberg

Request: If a "used and useful fraction" is used to calculate the return on generation rate base, would that same calculation apply to the revenues received for capacity and ancillary services payments from ISO-NE? If no, why not?

Response: The OCA's proposal regarding the application of the "used and useful fraction" did not include application of that same fraction to revenues received for capacity and ancillary services. The OCA's initial thoughts on the matter are that the "used and useful fraction" would not apply to revenues received from ISO-NE for capacity. The OCA understands that those payments are based on the rated capacity of the asset and are paid regardless of whether it is called on to run.
