Dear Mike,

As per our phone discussion, I feel I have several issues over the replacement of my 30' water line bill with Lakes Region Water. As I mentioned to you earlier, Lakes Region Water (Tommy Mason) told me twice that from the road to my water shut off is Lakes Region Water's responsibility. I read both your comment and Jake Dawson's comment that you emailed to me. Thank you.

There is an inconsistency in the way Lakes Region Water is conducting business. I have issues and concerns with questions

- 1) L.R.W. Tommy Mason told me if the water line from the road to our shut off should leak, which is considered the hot side, L.R.W. will replace at no charge to me. (I am requesting a letter from L.R.W. to that fact). I was told at that time L.R.W. will decide if they will run a new water line for next door. (81 Sunrise Dr.)
- 2) Why am I being charged \$40 a linear ft. while for a job up the street L.R.W. charged \$12 per ft. My job took less time & material?
- 3) Another resident up the road (same week) was charged nothing.
- 4) L.R.W. had increased the water pressure. Existing piping has a maximum 85 psi. Pressure was increased by L.R.W. to approx. 120 psi, causing water piping to leak, especially at connections.
- 5) Out of my 30 ft. section, I feel my portion of this bill should be from my original gate valve to my house which is 6 feet.

I am requesting a hearing to discuss these and other matters.

Thank you,

Ed Cammarata
