Subject: Electric rates

Dear Commission Members:

I'm appalled that our utilities are asking for such a massive increase in rates. To me as a citizen the whole matter reeks of backroom crafting that is an insult to the general public. I urge all commission members to reject these increases for something more in line with the inflation rate. A lengthy public statement is in order for the consuming public. As a nation we are flowing in excess fuel, and the prices are still high, and I would not blame the public for reacting assertively.

Respectfully,

Albert Franz, Wright Tavern Farm, Dorchester NH 03266
