Re: Support Letter for Docket 14-155

Dear Mrs. Howland,

It is my understanding that Liberty Utilities (Energy North Natural Gas) Corp. is looking to acquire the New Hampshire Gas Corporation facility in Keene as suggested in NH PUC Docket 14-55. I am writing to suggest that if this proposed Liberty Utilities acquisition of the New Hampshire Gas facility in Keene, NH were to take place, this could possibly open the door to potentially constructing a compressed natural gas (CNG) fueling station in this part of NH.

Keene, NH is a market where there are some high volume fleets where CNG could benefit local businesses and residents with their vehicle fueling. If natural gas were available in this region, Clean Energy would conduct further market research and due diligence to determine the potential fuel volume loads along with the economics of building CNG fueling station infrastructure.

If you have any questions or would like additional information on CNG vehicle fueling, I would be glad to discuss further.

Sincerely,

A handwritten signature in blue ink, appearing to read "Drew Drummond", is written over a horizontal line.
