Dear Debra, Re: Docket No. DW 14-165

I have been having difficulties with the governing board at Debra's Estates. I was investigating the possibilities of selling them water in as much as I had upgraded the system by completely renovating it. My lawyer finally convinced me that in as much I was in the right, it would be a 50-50 chance of winning the court case which would result in it would be expensive legal wise and costly to me because of my present indebtedness.

Therefore I have given them all of the land that the water comes from (wells), the reservoir and most all the system except the area of my 54 lots. So the case is mute and I withdraw what I started.

Thank you,
