Subject: Rate hike again

Not understanding about this rate hike of 7% in Jan 2015 it's always the same thing....resources to make electricity are on the rise. Jan 2014 - 9.23 per KWH, July 9.87 per KWH now 10.56....let's see in July they will be asking for \$11.00...With the cost of health insurance going up again and now utilities...somehow people forget that 7% is far greater than most of us get in cost of living raises. Absolutely ridiculous to keep taken more and more from us. Now many people will have to chose again, utilities or health.
Thanks
