Witness: Frederick White

Request:

Does Eversource include IPP generation as a source of power to meet Eversource's load requirements? Please explain your response.

Response:

PSNH has objected to this question. Notwithstanding, and without waiving that objection, PSNH provides the following response:

Eversource includes the energy and capacity of IPPs under short-term and long-term rate orders (see response to GSHA 1-018) to meet its ES load requirements per the Restructuring Settlement. Lemspter Wind and Burgess BioPower are modeled at contract prices and provide RECs in addition to energy and capacity.
