Subject: NH PUC Docket DG14-380

I found the FERC documents today for the Constitution Pipeline from Penn to NY! The approval from FERC and the EIS. I certainly hope this convinces the PUC Commissioners to deny the agreement sought by Liberty Utilities.

FERC's approval and reason for is not a pretty picture. It is one of ignorance, disregard and negligence.

Please review the attached and the EIS at the link below for a preview of what we are up against!!
