

Dear Ms. Howland, I have been asked to relay for filing the following note from Stephen Heavener of the Capital Regional Development Council in DG 16-827. Thank you, Dan Feltes

Dear Dan:

Based on the fact that the Concord Steam conversion grant program has been denied by the PUC as originally contemplated by CRDC and the expectation that any program moving forward will require substantially more analysis based on costs savings and potential on-bill re-capture of funds extended to perform upgrades and connectivity, the Capital Regional Development Council is formally withdrawing participation in any program that does not conform to the original drafted program guidelines.

Please inform the appropriate parties of this determination.

Please also confirm your understanding of this position.

Thank you
