Debra A. Howland Executive Director New Hampshire Public Utilities Commission 21 S. Fruit Street, Suite 10 Concord, NH 03301-2429

Re: DE 17-136 – 2018-2020 New Hampshire Statewide Energy Efficiency Plan

Dear Director Howland:

On December 31, 2018, the Commission issued Order No. 26,207 in the above docket approving a settlement agreement relating to the implementation of the 2019 Update to the Energy Efficiency Resource Standard ("EERS") in New Hampshire. That Order approved a settlement agreement which modified the 2019 Update plan that had been submitted by the New Hampshire Electric and Natural Gas Utilities: Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty Utilities; New Hampshire Electric Cooperative, Inc.; Public Service Company of New Hampshire d/b/a Eversource Energy; Unitil Energy Systems, Inc. (UES); Liberty Utilities (EnergyNorth Natural Gas) Corp d/b/a Liberty Utilities; and Northern Utilities, Inc. (Northern) (collectively, the "NH Utilities") on September 15, 2018. As part of the Order, the Commission required the NH Utilities to file an updated version of the 2019 Update plan reflecting the changes necessitated by the settlement agreement within 15 days of the date of the Order.

In line with the Commission's requirement, enclosed for filing is an updated version of the 2019 Update plan reflecting the changes required under the settlement agreement. The NH Utilities look forward to implementing the 2019 Update in line with this revised plan and to working with the Commission, its Staff, and other stakeholders, on further enhancements for the benefit of New Hampshire and its utility customers. Please contact me if there are any questions about this filing. Thank you.

Very truly yours,

Matthew J. Fossum

Senior Counsel, Eversource Energy o/b/o the Electric and Natural Gas Utilities

1.0 Introduction

The New Hampshire electric and natural gas utilities are pleased to submit our 2019 Statewide Energy Efficiency Plan Update ("2019 Update") for approval by the New Hampshire Public Utilities Commission (the "Commission"). The 2019 Update is being filed jointly by Liberty Utilities (Granite State Electric) Corp. d/b/a Liberty Utilities, New Hampshire Electric Cooperative, Inc. ("NHEC"), Public Service Company of New Hampshire d/b/a Eversource Energy, and Unitil Energy Systems, Inc. ("UES") (referred to throughout the remainder of this document as the "NH Electric Utilities") and Liberty Utilities (EnergyNorth Natural Gas) d/b/a Liberty Utilities and Northern Utilities, Inc. ("Northern") (referred to as the "NH Natural Gas Utilities") or collectively as the "NH Utilities". The NH Utilities appreciate the opportunity to build upon our long history of providing energy efficiency programs in New Hampshire. We look forward to working with our customers¹ and all of the energy efficiency stakeholders to increase energy savings and achieve the significant economic and environmental benefits that energy efficiency delivers to New Hampshire.

2019 is the second year of New Hampshire's first 3-year, Energy Efficiency Plan under the Energy Efficiency Resource Standard ("EERS"). The 2018-2020 Statewide Energy Efficiency Plan ("2018-2020 Plan") was approved by the Commission on January 2, 2018 in Order no. 26,095. The 2019 Update provides information regarding changes or adjustments from the information provided for 2019 in the 2018-2020 Plan. The information contained in the original 2018-2020 Plan that is not updated in the 2019 Update, remains in its original form as approved by the Commission.

Direct Energy Savings, Demand and Emissions Reductions

Since 2002, New Hampshire natural gas and electric customers have installed energy efficiency measures that have or will save more than 14 billion electric kilowatt-hours ("kWh") and 30 million natural gas million British Thermal Units ("MMBtus"), resulting in cumulative customer savings in excess of \$2.4 billion.

The 2019 Update will lead to savings of more than 1.3 billion electric kilowatt-hours and 2.8 million natural gas MMBtus over the lifetime of the measures. In addition, the program will save 1.8 million MMBtus from other fuels.

The measures implemented as part of the 2019 Update will reduce summer peak demand by 12.5 MW and winter peak demand by 16 MW, which in turn will reduce costs for all electric

¹ Hereinafter, the word "customer" will be understood to mean both customers and New Hampshire Electric Cooperative members.

customers.

The 2019 Update energy savings will result in customer energy cost savings of more than \$289 million over the lifetime of the measures. In addition, the 2019 Update will support 678 full time equivalents ("FTEs") or 1.4 million work hours (using 2,080 hours for each FTE).² Efficiency investments support the New Hampshire economy in other ways. When energy bills are lowered, residents and businesses have more money to spend on operations, materials, labor and other productive investments. The lower energy costs that result from efficiency projects in municipal buildings lead to a more efficient use of taxpayer dollars in the community.

The 2019 Update will also lead to a lifetime reduction of more than 927 thousand tons of greenhouse gas emissions, the equivalent of taking 260,065³ passenger vehicles off the road for one year.

2019 Overview

Table 1.1: Comparison to 2018

| ELECTRIC PROGRAMS | 2018 | 2019 Update |
|--|--------------|--------------|
| Lifetime MWh Savings | 1,046,970 | 1,327,457 |
| Annual MWh Savings | 86,589 | 109,897 |
| Annual Savings as a % of 2014 Delivery Sales | 0.80% | 1.0% |
| Program Budget | \$36,623,566 | \$47,079,203 |
| Program Cost per Lifetime kWh Savings | \$0.035 | \$0.035 |
| | | |
| NATURAL GAS PROGRAMS | 2018 | 2019 Update |
| Lifetime MMBtu Savings | 2,306,693 | 2,841,037 |
| Annual MMBtu Savings | 163,616 | 174,787 |
| Annual Savings as a % of 2014 Delivery Sales | 0.70% | 0.75% |
| Program Funding | \$9,157,813 | \$9,896,499 |
| Program Cost per Lifetime MMBTU Savings | \$3.97 | \$3.48 |

²According to a study from the Political Economy Research Institute (PERI) of the University of Massachusetts at Amherst (2012), every million dollars spent on energy-efficient measures, such as building retrofits, supports 7 direct jobs and 4.9 indirect jobs.

2.0 2019 Program Goals

Commission Order No. 25,932⁴ set statewide energy savings goals for the 2018-2020 NHSaves Programs based on a percentage of the NH Utilities' 2014 delivery sales. For 2019, the NH Utilities propose energy efficiency measures, tools, and programs designed to achieve energy savings of 1.0 percent of retail electric sales and 0.75 percent of retail natural gas sales, relative to the 2014 delivery sales baseline.

FIGURE 2.1: Energy savings goals as a percentage of 2014 retail sales

The annual energy savings goals increase incrementally between 2018 and 2020.

⁴ New Hampshire Public Utilities Commission (2016, August 8), Order No. 25,932, "Energy Efficiency Resource Standard – Order Approving Settlement Agreement". Retrieved from http://www.puc.state.nh.us/Regulatory/Orders/2016orders/25932e.pdf

Tables 2.2 and 2.3 summarize the specific statewide energy savings goals for the 2019 NHSaves Electric and Natural Gas Programs.

Table 2.2: Electric Program Annual Statewide Savings Goal

| | Electric A | Annual Statewide Goal (MWH) |
|---------------|------------|-----------------------------|
| 2014 Delivery | | 2019 |
| Sales (MWH) | | 1.0% |
| 10,782,973 | | 107,830 |

| Residential | 43,156 | 25% |
| Income Eligible | 9,584 | 5% |
| Total | 174,787 | 100% |

Additional Fuel Neutral Savings

The NH Electric Utilities programs also generate energy savings from other fuels including oil, propane, kerosene and wood. These energy savings are in addition to the statewide EERS electric and natural gas savings goals and are an important part of the comprehensive energy savings programs, contributing significant benefits to NH customers and reducing greenhouse gas emissions. These savings are particularly important to reduce the energy cost burden of residential customers, especially those who qualify for the income-eligible programs, as well as municipal customers whose costs are borne by local taxpayers. These savings also contribute to the programs' cost-effectiveness and are reflected in Table 2.8 by customer sector in MMBtu's.

Table 2.8: 2019 Expected Savings from Other Fuels, by Sector

| Annual Savings From Other Fuel Sources, by Sector (MMBtu) | | | | | | |
|---|--------|------|--|--|--|--|
| Percentage of 2019 Sector MMBtu MMBtu savings | | | | | | |
| Income Eligible | 27,890 | 31% | | | | |
| Residential | 58,819 | 65% | | | | |
| Municipal | 3,964 | 4% | | | | |
| Total | 90,672 | 100% | | | | |

2.2 Program Funding

Electric Energy Efficiency Funding

The NHSaves programs offered by the NH Electric Utilities are funded through three main sources: 1) a portion of the System Benefits Charge (SBC) that is applied to the electric bills of all customers receiving delivery service through one of the NH Electric Utilities; 2) a portion of the Regional Greenhouse Gas Initiative (RGGI) auction proceeds; and 3) proceeds earned by each of the NH Electric Utilities from ISO-NE for participation in ISO-NE's Forward Capacity Market (FCM). All electric utility FCM revenues are derived from demand reductions from the energy efficiency programs and support the NHSaves Electric Programs.

Additionally, the balance of funds from prior program years is carried forward to future years, including interest applied on the monthly balance at the prime rate.

The 2019 SBC revenues are estimated based on a forecast of each utility's 2019 sales and a proposed SBC energy efficiency program rate of \$0.00373 per kilowatt-hour. The proposed SBC rate is a \$0.00098 increase from the 2018 SBC energy efficiency program rate of \$0.00275 per kilowatt-hour. The proposed SBC rate is 12 percent lower than the estimated 2019 SBC energy

efficiency program rate of \$0.00425 that was included in the Settlement Agreement that led to the Commission's Order No. 25, 932⁵ in the EERS proceeding.

The estimated RGGI revenues to be made available to the NHSaves programs are provided to the NH Electric Utilities by the Commission's staff. The FCM revenues are estimated based on forecasted prices for the energy efficiency on-peak summer and winter demand resources. These differ by electric company and are subject to adjustment based on future performance.

Tables 2.9-2.11 summarize the original 2018-2020 Plan estimated electric program funding for 2019, the updated estimated program funding for 2019 and the difference between the 2019 Update and original by source and utility. The overall estimated level of funding for 2019 increased by \$818thousand from the estimated funding included in the 2018-2020 Plan. The increase consists primarily of carry forward and estimates of forward capacity market funding.

Table 2.9: Annual Funding Source, Electric Original 2019 Estimate

| Source | Origina | Original 2019 Estimated Electric Funding (\$) | | | Total |
|--|------------|---|-----------|-----------|------------|

| Total | (437,777) | 216,986 | 82,935 | 956,335 | 818,480 |

Liberty carried forward \$163,024 from 2017 and will utilize \$150,000 as capital for additional commercial on-bill financing. These funds will be allocated to the revolving loan pool and tracked within the revolving loan section of the Quarterly Reports. The remaining \$13,024 of carry forward is included in the 2019 Program Budget. Please see section 6.0 for more details about the NH Utilities on-bill finance offerings.

Unitil carried forward \$751,289 from 2017. Of that, \$375,000 will be transferred to the existing revolving loan fund as capital for commercial on-bill financing offerings. These funds will be tracked within the revolving loan section of the Quarterly Reports. \$206,071 will be utilized for programs in 2019, and the remaining \$116,218 will be held until 2020 and utilized during that

program year. Because the energy efficiency portion of the SBC rate is identical for each of the utilities, and due to the fact that Unitil anticipates starting 2019 with a significant overcollection, the Company does not anticipate expending all revenues carry forward during the 2019 program year.

At the end of 2017, NHEC had a carry forward balance of \$171,532. Seventeen percent was allocated to the HEA program to be spent on additional projects during 2018. The remaining balance was split between the residential and commercial sectors by sales allocation. The residential portion of \$85,423 was allocated to be utilized for HPwES projects during 2018, in response to a high demand for the program. The remaining \$56,949 was included as carry forward, shown in Table 2.10, and will be utilized for the 2019 commercial program budgets.

Natural Gas Energy Efficiency Funding

The NHSaves programs offered by the NH Natural Gas Utilities are funded by a portion of the Local Distribution Adjustment Charge (LDAC), which is applied to bills of natural gas customers in New Hampshire [Table 2.14]. As with the electric programs, the balance of funds from prior program years is carried forward to future years, including interest earned on monthly balances applied at the prime rate.

The NH Natural Gas Utilities determine the overall budget requirements to meet the required energy savings targets. LDAC rates are then set by sector by each of the gas utilities based on a forecast of sales. Energy efficiency rates for 2019 can be found in Attachments I3 and J3 for the NH Natural Gas Utilities.

Liberty has a carry forward and interest balance of \$2,448,333 from 2017 and will utilize \$875,000 as capital for a residential and commercial on-bill financing offering. These funds for

on-bill financing will be tracked within the revolving loan section of the Quarterly Reports. The remaining \$1,573,333 of carry forward and interest is included in the 2019 Program Budget.

2.3 Annual Program Budgets

Table 2.16: Annual Electric Budget, by Utility

| Company | Original 2019 Electric Budget | Updated 2019 Electric Budget | Difference | Percentage of 2019 Updated Budget |
|------------|----------------------------------|---------------------------------------|------------|---|
| Eversource | 35,059,623 | 34,644,667 | (414,956) | 74% |
| Liberty | 3,997,374 | 4,060,868 | 63,494 | 9% |
| NHEC | 2,916,271 | 2,994,883 | 78,612 | 6% |
| Unitil | 4,937,916 | 5,378,785 | 440,869 | 11% |
| Total | 46,911,184 | 47,079,203 | 168,019 | 100% |

Figure 2.17: Electric Budget, by Sector

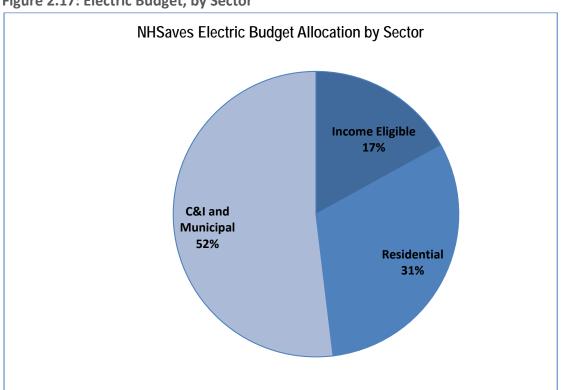

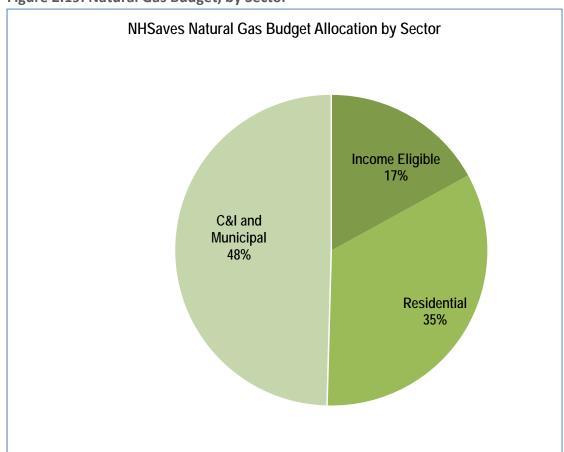

Table 2.18: Annual Natural Gas Budget, by Utility

| Company | Original 2019 Natural Gas Budget | Updated 2019 Natural Gas Budget | Difference | Percentage of Updated 2019 Budget |
|---------|---|--|------------|---|
| Liberty | 7,828,394 | 7,707,894 | (120,500) | 78% |
| Unitil | 2,200,150 | 2,188,606 | (11,544) | 22% |
| Total | 10,028,543 | 9,896,499 | (132,044) | 100% |

Figure 2.19: Natural Gas Budget, by Sector

Budget allocations by sector are informed by the source of the funds, and each utility's forecasted delivery sales to each sector. The income-eligible Home Energy Assistance ("HEA") program budget is not less than 17 percent of each utility's total portfolio budget.

There are several factors that may impact budget levels. Any difference between the actual spending in each program year and the actual energy efficiency funds received based on customer usage, is carried forward into future year program budgets. This value may be positive or negative. Monthly interest at the prime rate is applied to fund balances. Funding estimates from the SBC and LDAC are based on each company's sales projections. Actual sales may differ, resulting in more or less SBC or LDAC revenue available for energy efficiency programs. In addition, RGGI and FCM proceeds are estimated and are also subject to change.

3.0 Residential Program Changes

3.1 Home Energy Assistance ("HEA")

Program Changes

In implementing the Home Energy Assistance program, the NH utilities remain focused on working with the Community Action Agencies ("CAAs") to provide comprehensive weatherization services to income-eligible customers. The program design remains as described in the 2018-2020 Plan.

As the NH Utilities, the CAAs, and the Office of Strategic Initiatives ("OSI") work together to serve income-eligible customers, utilizing a combination of utility, federal and other funding sources, we are reviewing workforce training needs. Knowledgeable and capable workers who can perform energy audits and safely install energy efficiency measures are a key element to effectively delivering the HEA program. The NH Utilities will coordinate with the CAAs and OSI to identify training needs and provide workforce training opportunities during 2019.

Program Budget and Goals

Table 3.1: Home Energy Assistance Energy Savings and Budget

| | <u> </u> | | | | | | |
|---|---------------|-------------|--|--|--|--|--|
| Annual Home Energy Assistance Program | | | | | | | |
| | 2019 Original | 2019 Update | | | | | |
| Electric | | | | | | | |
| Budget | 7,974,902 | 8,184,964 | | | | | |
| kWh savings | 1,036,792 | 1,170,363 | | | | | |
| kW reduction | 148 | 153 | | | | | |
| | | | | | | | |
| MMBtu savings | 25,622 | 27,890 | | | | | |
| Electric participants | 1,004 | 1,115 | | | | | |
| Natural gas | | | | | | | |
| Budget | 1,704,868 | 1,684,368 | | | | | |
| MMBtu savings | 9,679 | 9,584 | | | | | |
| | | | | | | | |
| 0 | 000 | 207 | | | | | |
| Gas participants | 339 | 307 | | | | | |
| Note: kWh = kilowatt-hours; kW = kilowatt, reflecting reduction during ISO-NE summer on-peak hours; MMBTu = million British thermal units | | | | | | | |

The NH Utilities work with the CAAs to estimate the number of income-eligible participants to be served each quarter and by county to ensure the services are being delivered throughout the state. Tables 3.2 and 3.3 display the 2019 HEA Quarterly Project Schedule and the 2019 HEA Project Distribution by county. Quarterly targets are considered benchmarks and typically vary in practice.

Table 3.2: 2019 HEA Quarterly Project Schedule

The project schedule reflects the expected number of homes served ("Jobs") by the HEA Program by quarter.

| | | 1st. Qtr. | 2nd. Qtr. | 3rd. Qtr. | 4th. Qtr. |
|------------------|------------|-----------|-----------|-----------|-----------|
| Utility | Total Jobs | 23% | 29% | 29% | 19% |
| LU-Electric | 72 | 12 | 23 | 25 | 12 |

Recent or Planned Evaluations

A process and impact evaluation for the HEA Program began in 2018. Opinion Dynamics Corporation ("ODC") is the third party evaluation consultant conducting the evaluation under the direction of the NH EM&V Working Group. Initial results are expected in spring 2019 and will follow the review and finalization process described in the 2018-2020 Plan, Section 10, Evaluation, Measurement & Verification. An additional scope of work regarding specific Non-Energy Impacts ("NEIs") for the HEA programs is also underway and results are expected to be incorporated into the 2020 Update Plan.

3.2 Home Performance with ENERGY STAR® ("HPwES")

Program Changes

The program design remains as described in the 2018-2020 Plan.

In 2019, the NH Utilities will explore the feasibility of offering a package of energy saving measures for electric customers who do not meet the Home Heating Index ("HHI") threshold. This offering will be informed by the experience from the natural gas visual audit offering and will allow the program to capture electric savings in homes where full weatherization services would not be cost effective. As with the natural gas visual audit, if the contractor indicates that there is an opportunity for additional energy savings while on site, auditing software can be used to test for cost-effectiveness. If sufficient opportunity exists, the customer will have the opportunity to receive HPwES weatherization measures.

The Natural Gas Utilities will offer a new opportunity for on-bill financing of up to \$4,000 to customers participating in the HPwES program. Additional details are included in Section 6.1. Additionally, as described in Section 6.1, NHEC and Unitil Electric have increased the on-bill loan offering from a maximum of \$2,000 to a maximum of \$4,000 to help cover the customer's portion of the weatherization job. By increasing the maximum loan amount, NHEC and Unitil expect to increase the number of customers assisted in overcoming the upfront cost barrier, including customers of more moderate income levels.

Program Budget and Goals

Table 3.4: Home Performance with ENERGY STAR Energy Savings and Budget

| Annual Home Performance with ENERGY STAR | | | | | | | |
|---|---------------------------|-----------|--|--|--|--|--|
| | 2019 Original 2019 Update | | | | | | |
| | Electric | | | | | | |
| Budget | 5,157,513 | 5,387,205 | | | | | |
| kWh savings | 821,233 | 930,709 | | | | | |
| kW reduction | 147 | 116 | | | | | |
| MMBtu savings | 37,747 | 41,658 | | | | | |
| Electric participants | 1,290 | 1,431 | | | | | |
| Natural gas | | | | | | | |
| Budget | 1,025,088 | 1,239,988 | | | | | |
| MMBtu savings | 9,799 | 12,480 | | | | | |
| Gas participants | 615 | 792 | | | | | |
| Note: kWh = kilowatt-hours; kW = kilowatt, reflecting reduction during ISO-NE summer on-peak hours; MMBTu = million British thermal units | | | | | | | |

Recent or Planned Evaluations

A process and impact evaluation for the HPwES Program began in 2018. As with the review of the HEA program, ODC is performing the evaluation of HPwES. Initial results are expected in spring 2019 and will follow the review and finalization process described in the 2018-2020 Plan, Section 10, Evaluation, Measurement & Verification.

3.3 ENERGY STAR Homes

Program Changes

The program design remains as described in the 2018-2020 Plan. The NH Utilities are developing an incentive structure for ENERGY STAR manufactured homes in order to reach an additional subset of the new home construction market.

Certification for HVAC contractors is an important element of the ENERGY STAR program and was identified as a barrier to increasing the number of ENERGY STAR certified homes in a recent evaluation of the program.⁶ In 2018 the NH Utilities initiated the 'Drive to ENERGY STAR' offering as a pathway into the program for new builders and HVAC contractors. In 2019 the NH Utilities will continue to enhance this pathway by providing training and certification assistance

⁶ERS, New Hampshire ENERGY STAR Homes Program Impact Evaluation (2014–2015) Final Report, December 7, 2017. See

http://www.puc.state.nh.us/Electric/Monitoring%20and%20Evaluation%20Reports/NH ESHomes Report Final v 4-2017.pdf

to facilitate certification of HVAC contractors that are currently installing systems properly but have not yet gone through the credentialing process.

Program Budget and Goals

Table 3.5: ENERGY STAR Homes Energy Savings and Budget

| Annual ENERGY STAR Homes | | | | | | |
|---|-----------|-----------|--|--|--|--|
| 2019 Original 2019 Update | | | | | | |
| Ele | ectric | | | | | |
| Budget | 2,805,646 | 2,697,699 | | | | |
| kWh savings | 1,194,124 | 1,448,919 | | | | |
| kW reduction | 267 | 328 | | | | |
| MMBtu savings | 12,871 | 13,672 | | | | |
| Electric participants | 945 | 1,220 | | | | |
| Natural gas | | | | | | |
| Budget | 434,751 | 612,751 | | | | |
| MMBtu savings | 3,305 | 4,017 | | | | |
| Gas participants | 121 | 164 | | | | |
| Note: kWh = kilowatt-hours; kW = kilowatt, reflecting reduction during ISO-NE summer on-peak hours; MMBTu = million British thermal units | | | | | | |

Recent or Planned Evaluations

Energy & Resource Solutions, Inc. ("ERS"), working on behalf of the EM&V Working Group completed a process and impact evaluation study of the ENERGY STAR Homes program in December 2017.⁷ The evaluation study found "a program that is well run from an administrative standpoint and is valued by stakeholders and participants, with those surveyed giving the program high marks."

The study also found some reluctance among HVAC contractors to go through the ENERGY STAR v3.0 certification requirements for administrative and design tasks. Further, the study identified spillover effects indicating that contractors participating in the program utilized high efficiency practices in all new homes that they build, not just those that are participating in the program and receiving an incentive. As a result of the study, the NH Utilities made several changes to the program in 2018, including updating the baseline home against which savings are claimed and adding an incentive tier for homes that are built to the higher expectations of ENERGY STAR v3.1. The full list of recommendations and responses from the NH Utilities are

⁷ ERS, New Hampshire ENERGY STAR Homes Program Impact Evaluation (2014–2015) Final Report, December 7, 2017. See

http://www.puc.state.nh.us/Electric/Monitoring%20and%20Evaluation%20Reports/NH ESHomes Report Final v 4-2017.pdf

tracked on the EM&V Working Group's webpage.8

2018 Awards

Chinburg Properties of Newmarket, NH received EPA's 2018 ENERGY STAR Partner of the Year—Sustained Excellence recognition for its dedication to the ENERGY STAR Certified Homes program and its longstanding partnership with Home Energy Raters and utilities that also collaborate with the Certified Homes program in New Hampshire. The NH Utilities are extremely proud to see a New Hampshire homebuilder receive this special recognition.

The NH Utilities were also recognized by the EPA in 2018, receiving the ENERGY STAR Partner of the Year–Sustained Excellence recognition for the successful implementation of the ENERGY STAR Certified Homes program. The New Hampshire Utilities were specifically recognized for their collaboration and partnerships with Homebuilders, Home Energy Raters and trade associations to successfully implement the ENERGY STAR Certified Homes program across the state. 2018 was the 6th consecutive year that the NH Utilities have been recognized by the EPA as an ENERGY STAR Partner of the Year Award recipient.

3.4 ENERGY STAR Products ("ESProducts")

Program Changes

The program design remains as described in the 2018-2020 Plan.

The NH Utilities continue to focus on ways to make the ENERGY STAR Products program easily accessible to our customers. In 2019 we will work with our vendor partners to develop and test a point of sale e-rebates platform that will allow eligible customers to access rebates for appliances applied at the time of purchase. This type of offering allows the vendor to confirm customer and product eligibility via the customer's smart phone. The mail-in and on-line rebate application forms will remain available for customers who prefer those options to e-rebates. The NH Utilities may also utilize special promotions and short-term appliance markdowns as an enhancement to the appliance offering.

Due to the low avoided cost of natural gas and expense of high efficiency water heaters, the gas companies are de-emphasizing or eliminating incentives for certain water heating products in 2019.

⁸ See https://www.puc.nh.gov/EESE%20Board/EERS Working Groups.html#em&v and https://www.puc.nh.gov/EESE%20Board/EERS WG/nh-emv-eval-of-recommendations-tracker-060018.pdf.

Program Budget and Goals

Table 3.6: ENERGY STAR Products Energy Savings and Budget

| Annual ENERGY STAR Products | | | | | | |
|---|------------|------------|--|--|--|--|
| 2019 Original 2019 Update | | | | | | |
| | | | | | | |
| | Electric | | | | | |
| Budget | 4,921,565 | 5,025,263 | | | | |
| kWh savings | 12,598,436 | 13,250,764 | | | | |
| kW reduction | 1,584 | 1,818 | | | | |
| MMBtu savings | 3,515 | 3,489 | | | | |
| Electric participants | 175,569 | 280,769 | | | | |
| Natural gas | | | | | | |
| Budget | 1,501,137 | 1,240,237 | | | | |
| MMBtu savings | 19,100 | 16,022 | | | | |
| Gas participants | 2,327 | 1,972 | | | | |
| Note: kWh = kilowatt-hours; kW = kilowatt, reflecting reduction during ISO-NE summer on-peak hours; MMBTu = million British thermal units | | | | | | |

Recent or Planned Evaluations

The Cadmus process and impact evaluation of the ENERGY STAR Products program began in December 2017 but was not complete in time for incorporation into the 2019 Update Plan. Final results are expected in the Fall of 2018. As noted in the 2018-2020 Plan, final evaluations must be completed two months prior to the date the Plan filing is due in order for results to be incorporated. Given this, the EM&V Working Group reached consensus on continuing with the savings assumptions included in the original 2018-2020 Plan for 2019 and considering the study results for incorporation in the 2020 Plan Update.

3.5 Home Energy Report ("HER") Program

Program Changes

Eversource plans to leverage the results of tests conducted in its MA and CT territories to optimize its HER programs in New Hampshire. Randomized control trials gauged the impacts of modifying report language (e.g., using the term "similar homes" instead of "neighbors"), and alternative representation of comparison data in order to educate and motivate customers to take action.

The Liberty Home Energy Report program remains as described in the 2018-2020 Plan.

Due to unforeseen delays in launching its behavioral program, Unitil expects to send out the first paper HER reports to customers in the fourth quarter of 2018. Costs and savings for 2019 have been updated to reflect the number and usage of participants in the treatment pool, as well as the later than anticipated start of the program.

Program Budget and Goals

Table 3.7: Home Energy Reports Energy Savings and Budget

| Annual Home Energy Reports | | | |
|---|---------------|-------------|--|
| | 2019 Original | 2019 Update | |
| | | | |

| Gas participants | 48,000 | 49,600 | |
| Note: kWh = kilowatt-hours; kW = kilowatt, reflecting reduction during ISO-NE summer on-peak hours; MMBTu = million British thermal units | | | |

3.6 Customer Engagement Platform

Program Changes

Eversource's Customer Engagement Platform ("CEP") has a number of enhancements scheduled for 2019 including:

- Incorporation of kW demand data (Commercial and Enterprise)
- Incorporation of interval data for Commercial customers wherever applicable (currently interval data is only available in the Enterprise module)
- Solar production interval data integration with CEP
- Additional integration with the behavior program

Marketing & Outreach Updates

The following items are in process to increase marketing and usage of CEP:

• Implementation of Ex Machina, a machine learning tool that helps Eversource to determine the most appropriate message for targeted customers and further increase energy efficiency program participation. This tool is currently available in a testing environment and will be implemented in late 2018.

- In order to track customers' footprint within CEP, a tool called Google Tag Manager ("GTM") is currently in testing and will be available in late 2018.
- Additionally, to increase usage of CEP, Eversource is working to embed various CEP charts and graphs directly into the customers' account page on Eversource.com. For example, the CEP disaggregation wheel, which is a tool within CEP for analyzing and displaying customer's usage break-down, will be integrated with Eversource.com in 2018. This integration is intended to drive more traffic to CEP.

4.0 NHSaves Commercial and Industrial Program Changes

4.1 Large Business, Small Business and Municipal Programs

Program Changes

The Large Business, Small Business and Municipal Programs have similar structures that provide prescriptive incentives (i.e., applied based on average costs and savings) and custom incentives (based on the specific site conditions). These incentives reduce the customers' up-front costs for high-efficiency equipment for retrofit and new construction projects. The program design for all three customer segments remains as detailed in the 2018-2020 Plan.

The utilities began exploring a point-of-sale approach at the distributor level for LED lighting in 2018. The distributor point-of-sale approach allows lighting distributors to sell LED products to Large, Small and Municipal customers with the incentive applied to the price. The point of sale approach streamlines the rebate transaction for customers, as they receive the rebate through discounted pricing without the need to fill out paperwork or submit a rebate application to the utility or vendor. The electric utilities will continue exploring this model with other technologies in 2019. The gas utilities deployed this approach in 2017 for water heaters and will explore adding heating equipment in 2019.

The NH Utilities continue to pursue avenues to motivate business and municipal customers to undertake more comprehensive energy efficiency projects, including those with longer pay-back periods. The utilities are encouraging energy efficiency contractors to expand their portfolio of measures. One effort includes having direct install vendors streamline the installation of more comprehensive measures for midsize business customers, those that do not qualify for the Small Business program due to their average monthly peak demand being higher than 200 kW but are not the highest users. The utilities continue to work with distributors, installation contractors and direct install vendors to recommend and install comprehensive energy efficiency projects.

Program Budget and Goals

TABLE 4.1: Large Business Energy Solutions Energy Savings and Budgets

| Annual Large Business Energy Solutions | | | |
|---|---------------|-------------|--|

Recent or Planned Evaluations

An Impact Evaluation for the lighting measures within the Small Business and Municipal Programs was completed by the third-party evaluator DNV-GL in June 2018. Updated realization rates and coincidence factors from the study results have been incorporated into the benefit cost model for 2019. A Non-Lighting Measure Impact and Process Evaluation for the Small Business and Municipal Programs began in 2018 with the third-party evaluator Cadmus, which is scheduled for completion in the third quarter of 2019.

4.2 Energy Rewards Request for Proposals ("RFP")

Program Objective

The program design for the Eversource Energy Rewards RFP remains as described in the 2018-2020 Plan.

Program Budget and Goals

Table 4.4: Energy Rewards Energy Savings and Budgets

| Annual Energy Rewards RFP Program | | | |
|---|-----------|-----------|--|
| 2019 Original 2019 Update | | | |

5.0 Marketing

The overall strategy and objectives for Marketing remain as outlined in the 2018-2020 Plan. During 2018, the NHSaves website was redesigned with improvements to navigation that makes it easier for customers and partners to find the information that they are looking for. The website was re-launched in April. Development of phase one of the fully integrated umbrella marketing campaign began during the third quarter of 2018. Overarching objectives include:

- Increasing customer awareness of energy efficiency
- Encouraging and facilitating participation in energy efficiency programs
- Fostering behavior changes
- Identifying customer values related to energy efficiency and developing tactics to bridge the gap between awareness and action
- Outlining the benefits of energy efficiency and the value of going beyond simple actions to deeper savings
- Create a more streamlined customer experience and build trust

The campaign will launch during the fourth quarter of 2018 and continue into 2019. The campaign will focus on deploying engaging content through traditional, digital and social activities. As part of the campaign, the NHSaves logo will be updated.

A market assessment evaluation study was launched in 2018 and is being conducted by Navigant Consulting. The primary goal of the study is to gather information to better understand and characterize New Hampshire residents, businesses and municipalities in regards to energy efficiency, which will help inform the development, implementation and marketing of the New Hampshire energy efficiency programs.

Specific study objectives include:

- 1) Assess overall knowledge and awareness of energy efficiency
- 2) Identify general attitudes, perceptions and behaviors concerning energy efficiency
- 3) Develop a deeper understanding of the drivers of energy efficiency participation and the barriers that impede or prevent participation
- 4) Identify the means for most effectively communicating with customers and different customer segments
- 5) Establish a benchmark awareness level of the New Hampshire utilities' statewide energy efficiency program brand, NHSaves®.

The final report should be completed by the end of 2018 and the utilities will leverage this research to inform its specific marketing campaign strategies in 2019.

6.0 NHSaves Financing

6.1 Residential Financing Changes

On-Bill Offerings

In 2018 NHEC and Unitil Electric increased their on-bill offerings for residential financing from a maximum of \$2,000 to a maximum of \$4,000. The new level will remain in effect in 2019.

Liberty Gas and Unitil Gas will offer a new on-bill financing option for natural gas customers in 2019. On-bill loans will be available for Home Performance program customers to help cover their portion of a weatherization project up to \$4,000. Loans larger than \$4,000 will continue to be available through the third-party financing option as described in the 2018-2020 Plan.

Expanded Accessibility for Moderate Income Customers

The NH Utilities have explored options for expanding accessibility to financing for moderate income customers during 2018. These options include: an approach based on the VT Heat Saver Loan as described in the 2018-2020 Plan, a partnership with the Capital Good Fund utilized by National Grid in MA and RI as well as utilities in NY, and a rebate-focused Moderate Income program offering utilized in MA. Based on this review, the NH Utilities intend to re-focus on creating a 0% Moderate Income offering with existing third-party lenders as described in the 2018-2020 Plan. Items to be finalized in the fall of 2018 and early 2019 include lender interest rates, underwriting standards, process for income verification by the lenders and whether to utilize a virtual loan loss reserve mechanism.

The expansion of 0% on-bill loans for NHEC, Unitil Electric, Liberty Gas and Unitil Gas will also provide additional loan access to moderate income customers. While the utilities do not request or verify income levels, (on-bill approval for these four utilities is based on bill payment history), it is logical to assume that some moderate income customers have and will continue to utilize the on-bill offering. The utilities will survey customers in 2020 to determine income level distribution of loans initiated in 2019 in order to determine at what level moderate income customers are participating.

6.2 Commercial and Municipal Financing Changes

On-Bill Financing for Municipal Customers

The NH Electric Utilities will continue to offer loan options for municipal customers as described in the 2018-2020 Plan, including on-bill offerings for Liberty and Unitil and Smart Start for

Eversource and NHEC.

The Natural Gas Utilities will create a new on-bill offering for municipal customers, matching their existing offerings for electric customers.

On-Bill Financing for Commercial Customers

The NH Utilities will expand the on-bill offerings for commercial and industrial customers in 2019. Eversource, Liberty Gas and Unitil Gas will create a new on-bill mechanism for business customers. Liberty Electric and Unitil Electric will utilize their existing on-bill offerings for business customers. NHEC will continue to offer Smart Start to its commercial members during 2019.

Depending on program and market needs, the utilities may focus the on-bill offering on those customers that are pursuing comprehensive efficiency measures, or otherwise focus the offering to meet customer needs. Availability of this offering and maximum loan amounts will depend upon available capital for the on-bill loans and may differ between utilities.

Capital for On-Bill Loan Offerings

Eversource: For the Commercial on-bill offering Eversource will utilize its existing RGGI Revolving Loan Fund. Originally capitalized at \$690,000, the RGGI Revolving Loan Fund is currently utilized for residential loans of \$2,000 or less. As of the 2018 Second Quarter Report⁹ the Fund has an available balance of \$482,400. Utilizing the RGGI Revolving Loan Fund for commercial loans as well as residential will allow Eversource to create a new option for commercial customers while maintaining the existing residential offering.

Liberty Electric: Liberty will utilize \$150,000 of its \$163,024 carry forward funds from 2017 to add to its balance for the On-Bill Financing program. As of the 2018 Second Quarter Report, the program has an available balance of \$132,421. Adding \$150,000 for loans will allow Liberty to serve more municipal and small commercial customers through the program.

Liberty Gas: Liberty will utilize \$875,000 of its \$2,448,333 carry forward funds to introduce an On-Bill Financing program offering for residential, municipal and commercial customers. Program terms for the On-Bill Financing offering will parallel that of the existing On-Bill Financing offerings for Liberty Electric customers, helping to create consistency between customer fuel types.

⁹ http://www.puc.state.nh.us/Electric/NH%20EnergyEfficiencyPrograms/17-136/17-136-CORE-Energy-Efficiency-Programs-2nd-Quarter-Report.pdf

Unitil Electric: In order to serve the increasing demand for low cost financing from our commercial customers, and drive interest in energy efficiency programs to meet the increased energy saving goals under the EERS, Unitil will be adding \$375,000 to its existing commercial and industrial on-bill financing program in 2019. This will raise the total pool of funding in the Commercial On-Bill financing program to approximately \$832k. The current balance of available funds, before the injection of an additional \$375,000, is approximately \$160,000. The focus of activity will be on small and medium businesses without access to low-cost capital, for which a zero-percent interest rate loan can overcome the upfront cost barrier that the installation of high efficiency equipment or controls might present. The commercial loans will be made available to those customers needing smaller loans that are not available from the CDFA Clean Energy Fund.

Unitil Gas: Unitil will seed its on-bill financing program for the first time in 2019 with \$30,000 for residential customers undertaking weatherization and \$53,000 for commercial and industrial customers investing in energy efficiency projects. Residential loans will be offered up to \$4,000 to offset the customer costs associated with weatherization. This will provide a similar offering and experience for gas customers that our electric customers have had access to through the electric on-bill financing offer, providing a seamless experience for our customers as well as the weatherization contractors that serve them. The commercial loans will be made available to those customers needing smaller loans that are not available from the CDFA Clean Energy Fund.

Table 6.1: 2019 Capital for On-Bill Financing

| Company | Source of 2019 Funding | 2019 new funding (\$), or change | Total Capital Pool for On-Bill Financing (\$) |
|-----------------------|---|---|--|
| Electric | | | |
| Eversource Liberty | RGGI Revolving Loan Fund 2017 Carry Forward | Adjust fund for use in Residential or C&I | 690,000 431,345 |
| Unitil | 2017 Carry Forward | 375,000 | 832,000 |
| Total | | 525,000 | 1,953,345 |
| Natural Gas | | | |
| Liberty | 2017 Carry Forward | 875,000 | 875,000 |
| Northern | 2019 LDAC | 83,000 | 83,000 |
| Total | | 958,000 | 958,000 |

Community Development Finance Authority Partnership

The NH Utilities will continue to partner with the Community Development Finance Authority ("CDFA") to make loan offerings available for business, non-profit, and municipal customers. CDFA, through its Clean Energy Fund, offers loans to business, non-profit and municipal customers at low interest rates. There is natural alignment between the goals of the NHSaves programs and the goals of the CDFA Clean Energy Fund with regard to facilitating energy efficiency projects in the state. Typically, the smallest loan amount offered by CDFA is \$30,000. If there is a gap between the maximum utility on-bill loan offering and CDFA's typical loan offering, the NH Utilities and CDFA will work to develop a partnership to fill that gap and create a loan option for customers.

For loans greater than \$30,000, municipal, commercial and industrial customers can access the existing CDFA Clean Energy Fund loan products. The NH Utilities will work with CDFA to ensure customers and contractors are aware of the loan options. In addition to covering the customer co-pays for NHSaves projects, loans from CDFA can also help to finance additional measures, such as fuel neutral weatherization, renewable energy systems, and health and safety measures related to the energy project.

6.3 Additional Program Funding Sources

NHSaves Partnership Initiative

As described in the 2018-2020 Plan, the NH Utilities have a track record of accessing additional funding to supplement or enhance the NHSaves energy efficiency programs. This funding has typically come from state or federal funding sources, which the NH Utilities will continue to pursue when it is available. In addition, the NH Utilities will develop the NHSaves Partnership Initiative in order to pursue and access untapped foundation funding for energy efficiency.

The NH Utilities will work in 2019 to identify potential foundation funding sources that align with the goals of the energy efficiency programs, and also to identify non-profit partner(s) whose mission(s) align with one or more of the goals of the energy efficiency programs. Once potential resources and partners have been identified, the NH Utilities will form the initial partnership(s) and work with the non-profit partner(s) to apply for identified foundation or grant funding.

The partnership(s) will focus on particular areas of need and interest as determined by the NH Utilities and the non-profit partner(s). The chosen area of focus will ideally have strong alignment with potential foundation funding sources, support the mission of the non-profit partner and further the energy efficiency goals of the NHSaves programs. The NH Utilities intend to hire a consultant to assist with identifying funding sources, identifying areas of alignment with potential non-profit partners and submitting grant applications. Successful NHSaves Partnerships will supplement, rather than replace, existing NHSaves programs and funding.

7.0 Planning Elements

7.1 Benefit - Cost Testing

The NH Utilities use a Total Resource Cost ("TRC") test to screen programs for cost-effectiveness. The TRC test estimates benefits via the net present value of energy and non-energy impacts over the life of program measures (numerator) and compares that to the total costs, defined as the net present value of program costs plus out-of-pocket added costs that customers pay to install energy efficiency measures versus a standard efficiency measure (denominator). Thus, a program or measure with a benefit/cost ratio of 1.0 or greater is cost effective, which is to say that there are more benefits than costs over the life of the measure(s). Further, the use of a common set of avoided energy supply costs by the NH Utilities ensures that the value of programs and services are considered on an equal basis for all New Hampshire customers, preserving equity throughout the state.

The NH Utilities strive to ensure each individual program exceeds a benefit cost ratio of 1.0, with exceptions for income-eligible, education or start-up programs such as the initial years of a new program. Each sector (Residential and Commercial) is designed to meet a benefit cost ratio of 1.0 or greater.

For the 2019 Update, the New Hampshire TRC test uses a nominal discount rate of 4.75 percent¹⁰ and a general inflation rate of 1.86 percent¹¹ within the TRC test to estimate future benefits resulting in a real discount rate of 2.84 percent¹² used for benefit calculations.

For the purposes of estimating the benefits resulting from the energy efficiency programs, the New England utilities reference a regional avoided energy supply cost study in benefit-cost modelling. The *Avoided Energy Supply Components in New England: 2018 Report* ("AESC 2018") was completed in June 2018¹³ and includes avoided costs associated with electricity, natural gas, other fossil fuels and wood for each of the New England states. In addition, the report provides estimates of Demand Reduction Induced Price Effect ("DRIPE"), embedded and non-embedded environmental costs associated with emissions of CO2 and NOx, and avoided costs

¹¹Based on the inflation rate from Q1 2017 to Q1 2018, Retrieved from https://fred.stlouisfed.org/data/GDPDEF.txt

¹² Real Discount Rate = [(1 + Nominal Discount Rate)/(1 + Inflation Rate)] - 1

¹³Synapse Energy Economics, Resource Insight, Les Deman Consulting, North Side Energy, Sustainable Energy Advantage. (2018, June 1). "Avoided Energy Supply Components in New England: 2018 Report." Retrieved from http://www.synapse-energy.com/sites/default/files/AESC-2018-17-080-June-Release.pdf

of transmission. The AESC study is undertaken by a competitively procured, independent consultant whose work is supervised by a Study Group comprised of regulators, utility staff and energy efficiency consultants from throughout New England. The final work product serves as the source of most avoided costs for the calculation of energy efficiency program benefits for New England states.

Updates to Current Assumptions

The benefit cost model for the New Hampshire energy efficiency programs in 2019 includes updated values from AESC 2018 for the avoided energy supply costs that were included in the 2018-2020 Plan. Notable changes compared to the AESC 2015 estimated avoided costs, which were utilized in the original NH Energy Efficiency 2018-2020 Plan, include a decrease in the value of electric capacity benefits, a non-zero estimate of capacity DRIPE, as well as decreases in the value of winter and summer peak and off-peak electricity benefits. AESC 2018 updates include an increase in estimated benefits for both electric and natural gas DRIPE as well as increased value of fuel oil, propane and wood.

In addition to updating previous values, AESC 2018 included several new elements that are incorporated into the benefit cost model for 2019 and are briefly described below. A full discussion of these benefits is included in the study itself, which can be referenced on the Synapse website¹⁴.

Pooled Transmission Facilities (PTF)

AESC 2018 includes calculation of benefits related to avoided costs for Pool Transmission Facilities ("PTF") which all electric load in New England pays for. AESC 2018 estimated this value to be \$94/Kw-year. Because summer peak load dominates ISO New England's transmission planning, this value is applied to the reduction in summer peak load.

In addition to avoided PTF costs, AESC 2018 explains that local distribution companies may also have avoided costs related to *local* transmission investments. Prior to 2019, the NH Utilities have included in the TRC an estimate of avoided transmission benefits originally calculated in 2014. That earlier calculation likely included some elements of PTF and some elements related to local transmission. Because AESC 2018 includes a much more recent analysis of PTF, the NH Utilities have applied this value instead of the previous estimate of transmission benefits. At this time the NH Utilities do not have additional benefits related to avoided local transmission in the benefit cost model. If benefits specifically related to avoided local transmission are developed at a future date, they may be included in future Plan updates.

¹⁴Synapse Energy Economics, AESC 2018 Materials. Retrieved from http://www.synapse-energy.com/project/aesc-2018-materials

Non-Embedded Environmental Benefits for Fossil Fuel

As described in the AESC 2018, some environmental costs are "embedded" in the price of the energy due to regulations that require expenditures by generators or other energy suppliers to reduce emissions (e.g., the Regional Greenhouse Gas Initaitive or ("RGGI"). "Non-embedded" environmental costs are externalities associated with energy production and supply that are not directly reflected in energy prices. AESC 2018 electric energy avoided costs include embedded avoided emissions costs. However, there are not comparable embedded emissions values associated with fossil fuels. In order to treat electric and fossil fuel emissions consistently in benefit-cost screening, the NH 2019 Update incorporates comparable fossil fuel avoided emissions with a conservative calculation based on the AESC 2018 forecast of RGGI values and standard emissions output factors for those fuels.¹⁵

Oil DRIPE

AESC 2018 for the first time calculated a value for Oil DRIPE, which has been included in the New Hampshire benefit cost model for 2019. The New Hampshire intrastate ("zone-on-zone") value for Oil DRIPE is approximately \$0.01 per MMBtu which translate to a negligible increase in the avoided cost of oil.

7.2 Low Income Non-Energy Impacts (NEI)

Based on input from multiple stakeholders, discussions within the Benefit-Cost Working Group and the preponderance of evidence from other states, the NH Utilities increased the NEI adder for the Home Energy Assistance program for income-eligible customers from 10 percent to 20 percent, to more fully reflect the substantial benefits to participants and utilities resulting from low-income programs. This adder will be applied to the value of all electric, gas, and other fuel benefits for HEA. Historically, New Hampshire's TRC test has included all energy efficiency program and participant costs, but not all benefits. This adder will help ensure balanced, symmetrical treatment of costs and benefits of low-income programs, and is a reasonable proxy to reflect the significant benefits unique to these programs for 2019 while New Hampshire-specific non-energy impacts are being studied by third party evaluators.

There is substantial evidence from research both nationally and in neighboring states regarding the substantial non-energy benefits low-income energy efficiency programs provide to customers as well as the utilities themselves, above and beyond those provided by other efficiency programs. The average low-income household spends three times more of its income

¹⁵ AESC 2018, Table 149, page 369.

¹⁶ The proposed low-income adder would be in addition to the portfolio-wide 10 percent NEI adder adopted in the 2018-2020 Plan in DE 17-136.

on energy bills than non-low-income households, ¹⁷ and these high energy burdens are due in part to inefficient housing stock, appliances, and heating and cooling systems. ¹⁸ High home energy costs result in a variety of negative impacts for low-income households. For example, according to the National Energy Assistance Survey, unaffordable energy costs resulted in nearly a quarter of households surveyed going without food for at least one day, and about a third of households using their kitchen stove or oven to provide heat. ¹⁹ The survey also found that nearly a quarter of respondents were unable to use their main source of heat in the prior year because, for example, they could not pay for fuel delivery, or their heating system was broken and they could not afford to fix it. The greater the energy burdens that these customers face, the greater the potential benefits associated with the low-income energy efficiency programs that serve them.

Over 20 states plus Washington D.C. recognize the additional benefits of low-income programs in their cost effectiveness tests. For example, Massachusetts, Connecticut, and Rhode Island use measured NEI values from evaluations²⁰, and states including Colorado, Idaho, New Mexico, and Vermont, as well as Washington, D.C. use low-income NEI adders to account for participant benefits associated with these programs.²¹ In states using measured NEIs, the values for particular NEIs are greater for low-income participants than for non-low-income participants. For example, Massachusetts' current NEI values for improved health, safety, comfort, and other

¹⁹National Energy Assistance Directors' Association, *2011 National Energy Assistance Survey, Final Report,* November 2011. Findings were based on 1,768 interviews of Low-Income Home Energy Assistance Program recipients across 13 states, with a response rate of 56 percent. http://www.appriseinc.org/reports/Final%20NEADA%202011%20Report.pdf.

²⁰ See, for example, Three³ and NMR, *Massachusetts Special & Cross-cutting Research: Low-Income Single Family Health & Safety Related Non Energy Impacts (NEIs) Study,* August 2016, available at http://ma-eeac.org/wordpress/wp-content/uploads/Low-Income-Single-Family-Health-and-Safety-Related-NonEnergy-Impacts-Study.pdf; NMR, *Project R4 HES/HES-IE Process Evaluation and R31 Real-time Research,* April 2016, available at https://www.energizect.com/sites/default/files/R4 HES-HESIE%20Process%20Evaluation,%20Final%20Report 4.13.16.pdf.

²¹ACEEE, *Guidelines for Low Income Energy Efficiency Programs*, June 2017. https://database.aceee.org/state/guidelines-low-income-programs.

benefits from single-family weatherization measures are \$67 for non-low-income participants and \$558 for low-income participants.

In addition to participant NEIs, there is substantial evidence of benefits from reduced gas and electric utility costs associated with low-income programs. For example, the Maryland Public Service Commission reviewed ten studies of utility arrearages, focusing on the most comprehensive and recent studies potentially applicable to Maryland. Based on this review, the Commission determined that an NEI of 2 percent of kWh savings should be applied to low-income programs to reflect lower utility costs associated with reduced arrearages. Similarly, Massachusetts applies NEI values of over \$7.00 per low-income participant to account for reduced arrearages, bad debt write-offs, terminations and reconnections, customer notices, calls and collections.

The low-income NEI values from neighboring states provide points of comparison with the NH Utilities' proposed 10 percent adder:

- Vermont's cost effectiveness test includes a 15 percent low-income NEI adder, which
 the Public Service Board determined was a conservative estimate of the unique benefits
 of low-income programs.²³
- Based on Massachusetts-specific evaluations, Massachusetts utilities reported total NEIs
 associated with low-income residential programs in 2016 equivalent to 80.6 percent of
 the programs' electric, gas, and other fuel benefits.
- Based on Connecticut-specific evaluations, Connecticut utilities reported total NEIs
 associated with low-income residential programs in 2017 equivalent to 88.2 percent of
 the programs' electric, gas, and other fuel benefits.

The New Hampshire EM&V Working Group initiated an evaluation of the Home Energy Assistance program in 2018 that will include primary research on low-income NEIs associated with the New Hampshire programs. When complete, this evaluation will provide quantified, New Hampshire-specific values for low-income NEIs that will inform the 2020 Plan Update. The NEIs being considered for this study include, but are not limited to, improvements in health and safety, changes in hardship faced by participants due to bill savings, reduced missed days of employment and school, reduced arrearages, reduced bad-debt write-offs and reduced reliance

²²Itron, Inc. Development and Application of Select Non-Energy Benefits for the EmPOWER Maryland Energy Efficiency Programs, August 2014, available at https://rpsc.energy.gov/sites/default/files/publication/0C-1411 NonEnergyBenefitsReport-Itron-022415.pdf.

²³This adder is in addition to a 15 percent portfolio-wide adder incorporated in Vermont's cost effectiveness test to account for the hard-to-quantify benefits that factor into participant decision-making.

on utility assistance programs. The study is planned for completion in Spring of 2019

7.3 Benefit Cost Tables

The following tables depict overall benefit cost ratios for each program from the original Plan and the 2019 Update.

Table 7.1: Commercial Benefit-Cost Ratios

| Commercial Prog Re | grams Benefit sults | t-Cost |
|------------------------------------|------------------------|----------------|
| | 2019 Original | 2019 Update |
| Ele | ctric | |
| Large Business Energy Solutions | 2.36 | 2.15 |
| Small Business Energy Solutions | 1.81 | 1.56 |
| Municipal Energy Solutions | 1.43 | 1.18 |
| Energy Rewards RFP Program | 1.77 | 1.72 |
| Natu | ral gas | |
| Large Business Energy Solutions | 1.72 | 1.80 |
| Small Business Energy Solutions | 1.74 | 1.72 |

Table 7.2: Residential Benefit-Cost Ratios

| Table 7121 Residential Beller | it cost mati | |
|-----------------------------------|------------------|----------------|
| Residential Programs Be | nefit-Cost | Results |
| | 2019 Original | 2019 Update |
| Electric | ; | |
| Home Energy Assistance Program | 1.43 | 1.74 |
| ENERGY STAR Homes | 2.09 | 2.81 |
| Home Performance with ENERGY STAR | 1.82 | 2.14 |
| ENERGY STAR Products | 1.77 | 1.79 |
| Home Energy Reports | 1.44 | 1.63 |
| Natural g | jas | |
| Home Energy Assistance Program | 1.16 | 1.15 |
| ENERGY STAR Homes | 1.42 | 1.20 |
| Home Performance with ENERGY STAR | 1.31 | 1.34 |
| ENERGY STAR Products | 1.15 | 1.15 |
| Home Energy Reports | 1.20 | 1.03 |

7.4 Lost Base Revenue ("LBR") Calculation

In accordance with Commission Order No. 26,095 in Docket DE 17-136, the LBR Working Group worked throughout 2018 to consider the general impact of customer peak and the general impact of demand charge ratchets on the kW values to be used in calculating LBR for the Commercial and Industrial sectors for upgrades installed in 2019 and thereafter. This process included several iterations and revisions to LBR calculations based on input from Commission Staff, the NH Office of Consumer Advocate, and other stakeholders, and resulted in a final report reflecting a largely consensus document.²⁴ The NH Utilities will calculate LBR as described in the Working Group report, including the derivation of kWh savings as detailed in Section IV, and the 2019-2020 LBR savings calculation templates for each utility included in Appendix A of the report.

7.5 Capacity Demand Management

Note: The discussion of Capacity Demand Management is also updated by the Settlement Agreement filed on December 13, 2018, and will be additionally updated by a separate filing to be made in early 2019 regarding the Demand Reduction Demonstration Pilot.

In New Hampshire, the measures included in the energy efficiency programs achieve significant reductions in demand (kW), as well as achieving reductions in kWh. The 2019 measures will result in reduction of 12.5 MW during the ISO-NE summer on-peak hours and 16 MW during the ISO-NE winter on-peak hours. Demand reductions achieved through traditional energy efficiency measures are sometimes referred to as "passive" demand reduction.

"Active" demand reduction more typically refers to measures or initiatives that are designed specifically to reduce kW, rather than kWh. The NH Utilities have been monitoring and participating in a number of activities and discussions related to active demand management during 2018 including; review of energy efficiency program demonstration projects in other New England states and project proposals submitted outside of the energy efficiency programs. Even in those states, such as Massachusetts, that are pursuing active demand reduction initiatives, the overwhelming majority of kW reduction achieved still comes as passive demand reduction from traditional energy efficiency measures.

Demonstrations in other States: There are several active demand reduction technologies

²⁴ See https://www.puc.nh.gov/EESE%20Board/EERS WG/2018-08-29-2018wg-report-on-lbr.doc for the August 29, 2018 working group report, and

https://www.puc.nh.gov/EESE%20Board/EERS Working Groups.html#lostbaserevenues for agendas and other supporting documents developed and reviewed by the Working Group.

being tested as part of energy efficiency program demonstrations that the NH Utilities have been closely monitoring. The following list includes demonstrations that the NH Utilities have been reviewing and their current status:

- Wireless Thermostats for Small Business Customers:
 - The Massachusetts Program Administrators ("PA's") are working with a vendor to install Wi-Fi thermostats at small businesses. Customers under certain load conditions will have their thermostat temperatures raised or turned off for several hours (2-4 hours per event). The goal of the Wi-Fi thermostat project is to reduce monthly demand peaks and reduce load on the grid which would lower customer's bills, help the distribution system, as well as help manage the customer's ICAP tag.
- Control System Software:
 - The PA's are working with an energy management platform vendor to test the ability to manage multiple demand response and demand management vendors under one utility driven software/web-based program. The goal is to have one vendor control the dispatching of customers from all of the various demand resources. Multiple different resources are currently being controlled by the software system.
- Software and controls:
 - The PA's are working with two vendors that provide different approaches. The software has been installed at two sites and another fourteen sites are in the sales pipeline. The aim of these projects is to reduce monthly demand peaks that would lower customer's bills, as well as help manage the ICAP tag for the following year.
- Demand Response:
 - The PA's are working with a large Demand Response vendor to bring customers that currently are enrolled in an ISO-NE DR program into a demonstration project that would provide customers an added revenue stream by enrolling in our program that would include additional hours to respond to a called event, as well as trigger events for ICAP notification and Winter price responsive curtailment.
- Battery Storage (Lithium Ion):
 - The MA battery storage demonstration includes behind-the-meter batteries at commercial and industrial customer facilities. Eversource is working with two battery storage vendors that will provide different dispatch approaches: Daily Dispatch and Targeted Dispatch. Eversource has two sites installed and another ten sites in the sales pipeline. The daily dispatch strategy will cost-effectively reduce year-round peak loads. In comparison, the targeted dispatch strategy will focus on reducing four specific types of demand peaks: Summer ICAP, Summer Utility, Winter Price, and Monthly Customer Peaks.
- Thermal Energy Storage:
 - There are two separate technologies being evaluated via two, separate vendor contracts.

- Air conditioning ice storage systems with energy management software to create ice at night that will then draw on that thermal mass during the day to reduce AC peak loads. Nineteen (19) target sites have been identified with equipment installed at one facility to date. The goal of this measure is to cost-effectively reduce Summer air conditioning peak loads.
- Phase change material installed in refrigerated/freezer spaces with controls on a facility's HVAC system in order to cost-effectively reduce year-round peak loads in accordance with a peak demand reduction schedule. Eleven (11) customer sites have been targeted with equipment installed at one facility to date.

In addition to learning from the demonstrations happening in other states, the electric utilities have the opportunity to leverage vendor relationships that deliver demand reduction services. Eversource has recently issued a multi-state RFP to bring together a set of vendors that can provide a holistic set of services for demand management. These include C&I curtailment service providers, residential demand response management systems, electric vehicle load management and Distributed Energy Resource Management Systems ("DERMS"). With this vendor pool in place, the New Hampshire programs will be well positioned to begin implementing demand reduction efforts when ready.

The demand reduction activities that the NH Utilities are monitoring in other states are included as part of the energy efficiency programs in those states. While each state has its own unique policy directives in this area, there are a number of overarching elements that can be part of the decision to include demand reduction efforts with energy efficiency. Demand reduction aligns with energy efficiency goals related to helping customers to reduce their energy costs. It also aligns with the structure of measure and service offerings provided by EE, using existing outreach methods and channels. Additionally, demand reduction aligns with the broader goal of energy efficiency to use funds in a way that reduces costs to all customers, and it is administratively efficient to include the two efforts together in a single docket and suite of program offerings. Conversely, demand reduction efforts could reduce the amount of funding available for traditional energy efficiency efforts.

 Additional Demand Reduction Activity in NH: Several of the NH Utilities have demand reduction proposals currently under discussion in New Hampshire outside of energy efficiency.

Liberty Utilities has a proposal for a battery storage offering in DE 17-189, which is currently an open docket at the Commission. The program is designed to use behind-themeter battery storage to reduce peak usage each month.

Eversource has included an alternative load control pilot as part of its Time of Use Rate Pilot proposal in DE 16-576. The proposal for that pilot program is still under discussion with stakeholders and Commission Staff. Unitil has also made a Time of Use Rate program proposal to stakeholders and Commission Staff.

NHEC currently offers the Peak Days program which is designed to engage members in voluntarily reducing energy usage during periods of high electric demand. In April 2018, NHEC introduced an electric vehicle time of day rate, and is also conducting a limited residential battery storage pilot. NHEC also continues to operate its legacy space heat and water heater control programs.

During 2019 the NH Utilities will continue to learn from the demand reduction initiatives being conducted in other states and will also engage in the demand reduction discussions and activities that are ongoing in NH. The NH Utilities will work with colleagues, Commission Staff, and stakeholders to determine whether a demand reduction initiative will be included in the 2020 Update Plan and what form it will take if included.

7.6 DE 17-136 Working Groups

Note: The discussion of the DE 17-136 Working Groups is updated by the Settlement Agreement filed on December 13, 2018.

The Settlement Agreement in DE 17-136 created four Working Groups on specific topics.

- (1) A Performance Incentive ("PI") Working Group to review potential performance incentive methodologies with the goal of promoting achievement of NH's EERS goals, and making recommendations for implementation in the 2020 Plan update.
- (2) A Financing and Funding Working Group to research potential funding and financing mechanisms. If viable options are found, the Working Group shall work with the utilities to test procurement strategies and will make recommendations for incorporation in annual Plan Update filings and in the 2021-2023 Plan.
- (3) A Benefit/Cost Working Group to discuss elements and issues related to NH's Benefit/Cost test as well as results from the 2018 Avoided Energy Supply Cost study, and will make recommendations for adjustments in future annual Plan Updates or three-year plans. The BC Working Group and the EM&V Working Group shall share information, especially with regard to NEIs and DRIPE.
- (4) A Lost Base Revenue Working Group to determine the appropriate kW values to be used

for calculating Lost Base Revenues, and make recommendations for the 2019 Plan Update.

The four Working Groups have met a combined total of 27 times from January to July 2018. During these meetings the Working Groups have made progress, providing a forum for discussion and education on the identified topics. During the course of the 2018 meetings, it became clear that some areas of conversation cut across multiple Working Groups resulting in overlapping conversations in different meetings with slightly different attendees. Moving forward and in 2019, the existing DE 17-136 Quarterly Meetings should serve as a venue to discuss cross-cutting topics.

Performance Incentive Working Group

Meetings focused on the review of PI methodologies and approaches used in NH and other jurisdictions through presentations and discussions. The utilities have developed a draft proposal for the consideration of the Working Group, which can serve as the basis for the remainder of the discussions. The Working Group should complete its review by the end of the first quarter of 2019, providing enough time for any recommendations to be considered for the 2020 plan.

Funding and Finance Working Group

Meetings focused on reviewing funding and finance mechanisms, existing utility offerings, goals for financing and funding within the EERS, loan offerings in other jurisdictions and by other state funding institutions. Lending partners and contractors were invited to provide additional perspective.

The utilities have incorporated modifications or expanded loan offerings and initiatives, which are discussed in more detail in Section 6 of the 2019 Update. These include on-bill small business and municipal loans, a moderate income offering and a partnership with CDFA. Contractor training and marketing materials will be developed and distributed. The utilities are also exploring a NHSaves Partnership Initiative in order to identify and pursue untapped foundation funding for energy efficiency.

Going forward, a quarterly meeting of this working group will be appropriate, to allow time for implementation and to review progress of the initiatives.

Benefit Cost Working Group

The scope of the discussions of the Working Group as determined at the first meeting included:

- Which Non-Energy Impacts (NEIs) to study, and when and how to include New Hampshire-specific, evidence-based NEIs into the annual update for 2020 and future plans.
- Adoption of an income-eligible adder separate from the 10% NEI adder.
- Whether a separate, evidence-based, income-eligible NEI study should be undertaken
- Should any adder adopted in this proceeding be extended through the 2020 program
 year until such time as the NEI studies are complete and the New Hampshire-specific
 NEI has been adopted or rejected by the Commission.
- Review Rest of Pool DRIPE to determine if any adjustments should be made to the benefit/cost test assumptions.
- Review results from the 2018 AESC study to determine if any adjustments should be made to the benefit/cost test assumptions.

The Working Group vetted the items in the scope over the six months through presentations by the utilities and other experts and through discussions. As an outcome of the working group meetings, the utilities received formal feedback from staff and parties that was incorporated into the 2019 update plan.

Two evaluation studies are currently in process that are addressing NEIs, a Crosscutting NEI evaluation and an evaluation of the HEA program that includes a Low Income NEI component. The Benefit Cost Working Group has provided input into the scope of the study. The 2018 Strategic Evaluation Plan (developed to guide the work of the EM&V Working group) was designed to incorporate a formalized process for input to evaluations, through the independent expert hired and supervised by the Commission and the representative of the EESE Board, who both represent the interests of stakeholders and the settling parties as members of the working group. It is specified that subsequent year plans will be developed collaboratively incorporating feedback from stakeholders. Final evaluation results will be presented in public meetings open to all stakeholders. In addition, it was agreed that the EM&V Working Group would provide regular updates at Quarterly Meetings and also to the EESE Board. Now that this process has been finalized, the EM&V working group is well positioned to effectively manage any remaining items while also minimizing duplication of effort. A final meeting will be held in September 2018.

Lost Base Revenue Working Group

The activity of the LBR Working Group was discussed in Section 7.4. This Working Group has completed its mission for the 2019 Plan Update and does not need to continue in 2019.

7.7 Stakeholder Process for 2021-2023 Plan

Note: The discussion of the Stakeholder Process for 2021-2023 is updated by the Settlement Agreement filed on December 13, 2018

The NH Utilities will participate in a stakeholder process regarding the 2021-2023 Plan starting in the fall of 2019, as anticipated by the DE 17-136 Settlement Agreement. This process will include attending meetings of the EERS Committee of the EESE Board, and discussion with other stakeholders and the independent planning expert when hired by the Commission. During the fall of 2019 the stakeholder process should focus on setting goals for the 2021-2023 Plan, so that development of that Plan can begin in 2020. The NH Utilities look forward to the opportunity for continued discussion on moving the energy efficiency programs forward into the second Three-Year Plan under EERS.

8.0 Evaluation, Measurement and Verification (EM&V)

Evaluation, Measurement and Verification ("EM&V") has been an integral component of the efficiency programs in New Hampshire since their inception. EM&V has many objectives, including verifying portfolio energy savings, estimating future energy savings of specific measures and behaviors, and identifying ways to improve program delivery and results. The 2018-2020 Plan established a formalized NH EM&V Working Group, consisting of Commission Staff members, independent EM&V consultants hired and supervised by the Commission, representatives of the Utilities, and a representative of the EESE Board. As agreed by the settling parties for the 2018-2020 Plan, the EM&V Working Group has worked expeditiously to build upon ongoing evaluation work and has transitioned to the new accelerated framework for 2018 as described in the Plan.²⁵

As the first task under this framework, the EM&V Working Group developed a multi-year Strategic Evaluation Plan ("SEP") to identify evaluation work currently in process and the studies to be initiated in the coming program years. The SEP identified five priority studies to begin in early 2018, and three others to begin in later 2018 and 2019. Studies were prioritized based on several criteria, including the length of time since the most recent evaluation of a program, the relative contribution of program savings to the portfolio, the degree of innovation within the program or shifts in markets or technologies, and regulatory requirements or stakeholder interest. For example, two priority studies that include analysis of non-energy impacts (NEI) were prioritized in part to address stakeholder and regulatory interest in developing evidence-based, New Hampshire-specific NEIs to be applied to the TRC for the 2020 Plan Year.

The EM&V Working Group issued competitive solicitations and awarded contracts for five priority studies as follows:

| Evaluation | Vendor | Estimated Date for Final Report |
|--|-------------|---------------------------------|
| Home Energy Assistance Impact, Process, and Low-Income | Opinion | Q1 2019 |
| NEI Evaluation | Dynamics | |
| | Corporation | |
| Home Performance with Energy Star Impact and Process | Opinion | Q1 2019 |
| Evaluation | Dynamics | |
| | Corporation | |

²⁵EM&V Working Group agendas, the evaluation recommendations tracking spreadsheet, and the 2018 Strategic Evaluation Plan are posted at https://www.puc.nh.gov/EESE%20Board/EERS_Working_Groups.html#em&v.

| Non-Lighting Impact and Process Evaluation for Multiple C&I | Cadmus | Q2 2019 |
|---|----------|---------|
| Programs | | |
| Crosscutting Non-Energy Impacts Study (phase 1) | DNV-GL | Q4 2018 |
| Energy Efficiency Market Assessment | Navigant | Q4 2018 |

In addition, the Strategic Evaluation Plan identified the following three efforts, to begin in late 2018—early 2019:

- Energy Efficiency Potential Study, to be conducted Q4 2018–Q4 2019
- Technical Reference Manual, to be developed in Q1 2019–Q1 2020
- Large Business Impact and Process Evaluation, to be conducted Q2 2019–Q2 2020

The Strategic Evaluation Plan will be updated in Q1 2019 to include scopes of work for these three efforts, scopes of work for primary research on NEIs as part of phase 2 of the Crosscutting Non-Energy Impacts Study, and other planned studies and activities to be determined by the EM&V Working Group.

The Settlement Agreement filed on December 13, 2018 identified two additional studies that will be undertaken in 2019 in coordination with the Benefit Cost Working Group.

- A review of the Benefit Cost Test undertaken utilizing the framework of the National Standards Practice Manual. To be conducted Q1 - Q2 2019
- A review of Energy Optimization approaches to be conducted Q1 Q2 2019

In 2017 and 2018, independent third-party evaluators working on behalf of the EM&V Working Group completed evaluations of the ENERGY STAR Homes program, Small Business and Municipal lighting measures, and the ENERGY STAR Products program. In coordination with EM&V Working Group members, the utilities reviewed and implemented the studies' recommendations as described in chapters 3.3 ENERGY STAR Homes, 3.4 ENERGY STAR Products, and 4.1 Large Business, Small Business, and Municipal Programs. The full list of specific recommendations and responses from the NH Utilities are tracked on the EM&V Working Group's webpage. In addition, all completed evaluation studies are posted on the PUC website at http://www.puc.state.nh.us/Electric/Monitoring Evaluation Report List.htm.

NHSaves Energy Efficiency Programs NHPUC Docket No. DE 17-136 2019 Update – January 15, 2019 Attachment A Page 1 of 2

Attachment A: Summary of Material Changes

| Topic | Description of Change |
|---|--|
| Program Design Changes | |
| ENERGY STAR Products Program (Lighting, Appliances and Electric Heating/Cooling and Hot Water Systems) | ■ Develop a point of sale e-rebates platform |
| ENERGY STAR Homes | Developing an incentive structure for ENERGY STAR Manufactured Homes Training and certification assistance to facilitate certification of HBAC contractors. |
| Home Performance with ENERGY STAR | Explore an offering for a package of energy saving measures for electric customers who do not meet the Home Heating Index threshold. |
| Commercial, Industrial and Municipal Programs | Explore a distributor point-of-sale approach for lighting and other technologies. |
| Large Business Demand Response Initiative | Eversource and Unitil will explore the potential for active demand response strategies within the Commercial and Industrial sector |
| Changes in Savings Assumptions | |
| Small Business and Municipal Lighting | Updated Realization Rates, Summer and Winter Peak Coincident Factors and kW Realization Rates based on 2018 DNV-GL Impact Evaluation. |
| Other Changes | |
| Avoided Energy Supply Costs | Incorporated changes from the 2018 AESC Study completed in June 2018. Included Pool Transmission Facilities value from AESC 2018 and removed prior transmission benefit Included Non-Embedded Environmental Benefits for Fossil Fuel based on AESC forecast of RGGI values. Increased the nominal discount rate from 4.0 to 4.75 percent. Increased inflation from 1.56 to 1.86 percent. |

NHSaves Energy Efficiency Programs NHPUC Docket No. DE 17-136 2019 Update – January 15, 2019 Attachment A Page 1 of 2

| Торіс | Description of Change |
|----------------------------------|---|
| | |
| Low-Income Non-Energy Impacts | ■ Incorporated an additional 10% adder to all energy related benefits (all benefits excluding water) within the Home Energy Assistance Program to reflect nonenergy impacts. |
| Lost Base Revenue Calculation | Updated calculation of Lost Base Revenue for 2019 and forward. |
| Home Energy Assistance Education | An additional \$200,000 in funding has been incorporated in Education for the specific purpose of increasing training opportunities and other capacity building needs for contractors serving the HEA program |

NHSaves Energy Efficiency Programs NHPUC Docket No. DE 17-136 2019 Update - January 15, 2019 Attachment D Page 2 of 5

NHSAVES ELECTRIC PROGRAMS SBC¹ and RGGI Funding Allocation 2019 Budget

Program Allocation Summary

| Program | RGGI | SBC ¹ | TOTAL |
|------------------|------------|------------------|------------|
| HEA ² | | | |
| Liberty | 5.30057% | 94.69943% | 100.00000% |
| NHEC | 6.17029% | 93.82971% | 100.00000% |
| Eversource | 5.26998% | 94.73002% | 100.00000% |
| Unitil | 4.95546% | 0.950445372 | 100.00000% |
| Municipal | | | |
| Liberty | 100.00000% | 0.00000% | 100.00000% |
| NHEC | 100.00000% | 0.00000% | 100.00000% |
| Eversource | 100.00000% | 0.00000% | 100.00000% |
| Unitil | 100.00000% | 0.00000% | 100.00000% |

| A | Б | C | U |
|---------|---------------|-----------------------|----------------------|
| Utility | HEA Budget | RGGI HEA ³ | SBC HEA ⁴ |
| Liberty | \$ 690,348 | \$36,592 | \$653,755 |
| | | | |

| Utility | HEA Budget | RGGI HEA | SBC HEA |
|------------|-----------------|-----------|--------------|
| Liberty | \$ 690,348 | \$36,592 | \$653,755.22 |
| NHEC | \$ 499,416 | \$30,815 | \$468,600 |
| Eversource | \$ 6,015,107 | \$316,995 | \$5,698,112 |
| Unitil | \$ 980,094 | \$48,568 | \$931,526 |
| Total | \$ 8,184,964 | \$432,971 | \$7,751,993 |

Notes:

RGGI HEA = RGGI HEA (C) /Total HEA Funds (B)

SBC HEA = SBC HEA (D) /Total HEA Funds (B)

3 17.0% of Total RGGI Funds including SB 268 funding less RGGI HEA Performance Incentive ((\$2,566,784 x .17) - (\$432,970 x .055))

¹ SBC = System Benefits Charge, Forward Capacity Market and Carryforward/Interest

² HEA Allocation

⁴ SBC HEA = Utility's total HEA program budget (B) less RGGI HEA (C)

Performance Incentive Calculation 2019

| | <u>Planned</u> | <u>Actual</u> |
|---|----------------|---------------|
| Commercial/Industrial Incentive | | |
| 1. Benefit/Cost Ratio | 1.78 | |
| 2. Threshold Benefit / Cost Ratio ¹ | 1.00 | |
| 3. Lifetime kWh Savings | 917,474,919 | |
| 4. Threshold Lifetime kWh Savings (65%) ² | 596,358,697 | |
| 5. Implementation Expenses | \$18,116,857 | |
| 6. Benefit / Cost Percentage of Implementaton Expenses | 2.75% | |
| 7. Lifetime kWh Percentage of Implementation Expenses | 2.75% | |
| 8. Commercial & Industrial Performance Incentive | \$996,427 | |
| 9. Maximum Commercial & Industrial Performance Incentive (6.875%) | \$1,245,534 | |
| Residential Incentive | | |
| 10. Benefit / Cost Ratio | 1.93 | |
| 11. Threshold Benefit / Cost Ratio ¹ | 1.00 | |
| 12. Lifetime kWh Savings | 122,570,992 | |
| 13. Threshold Lifetime kWh Savings (65%) | 79,671,145 | |
| 14. Implementation Expenses | \$16,475,809 | |
| 15. Benefit / Cost Percentage of Implementation Expenses | 2.75% | |
| 16. Lifetime kWh Percentage of Implementation Expenses | 2.75% | |
| 17. Residential Performance Incentive | \$906,170 | |
| 18. Maximum Residential Performance Incentive (6.875%) | \$1,132,712 | |
| 19. TOTAL PLANNED / EARNED INCENTIVE | \$1,902,597 | |

Notes

- 1. Actual Benefit / Cost Ratio for each sector must be greater than or equal to 1.0.
- 2. Actual Lifetime kWh Savings for each sector must be greater than or equal to 65% of projected savings.
- 3. Benefit Cost ratios are Nominal\$/Nominal\$

^{*}Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumptions

^{1.} All Annual Energy Savings and Measure Lives were updated for 2018-2020 to reflect more current information based on 2016 participation results. LED Measure Life updated to 5 years.

US DOE WAP Collaboration: The federal Weatherization Assistance Program is expection.

^{3.} For gas heated homes, customer may be served by both gas and electric utilities in this program, but gas companies will pay for the weatherization project up to their cap first and will claim associated MMBTU savings.

*Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumption:

^{1.} For LED Annual kWh savings, we assumed the same weighted average energy savings as the lighting program but longer hours use (3 hours/day vs. 2 hours/day as the program requires retrofit lights to be on 3 or more hours/day). The measure life for LEDs has been updated to 5 years

^{2.} Ancillary kWh Savings are no longer separated as they are included in the weatherization measure savings as approporiate.

*Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

- Planning Assumptions

 1. The Energy Star Homes Heat Pump Program was merged in to the Energy Star Homes program for 2015-2016. The new single family homes with heat pumps are listed at the bottom of the table, broken down by savings type (heating, cooling, hot water, lights & appliances)
- 2. Measure Life Changes:
- > LEDs measure life changed to 5 years.
- 3. Lighting & Appliance Energy Savings have been updated per the EPA Energy Star Appliance Calculators and NH evaluation results.

Program Summary* 26
*Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumptions

^{1.} The Annual kWH Savings for LEDs were adjusted to reflect the weighted average of bulbs they are intended to replace (using halogen wattages, per the Energy Security & Independence Act of 2007).

^{2.} Measure Life Changes:

> LEDs measure life changed to 5 years.

3. Appliance Energy Savings have been updated per the EPA Energy Star Appliance Calculators and NH evaluation results.

^{*}Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumptions

1. Expanded New, Retrofit and Direct Install into detailed measures for 2018 and beyond. Used data from past years to develop 2018-2020 plan by measure type.

^{2.} Other Sales: Customer may still purchase bulbs through catalog, but the quantities have been very small so did not plan for any in 2018-2020.

*Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumptions

1. Used data from past years to develop 2018-2020 plan by measure type.

2. Since this is funded by RGGI, the 2018-2020 Plan includes some Weatherization Projects and as well as incentives for customers replacing heating systems to upgrade to more efficient models.

Performance Incentive Calculation 2019

| | <u>Planned</u> | <u>Actual</u> |
|---|----------------|---------------|
| Commercial/Industrial Incentive | | |
| 1. Benefit/Cost Ratio | 2.12 | |
| 2. Threshold Benefit / Cost Ratio ¹ | 1.00 | |
| 3. Lifetime kWh Savings | 98,424,088 | |
| 4. Threshold Lifetime kWh Savings (65%) ² | 63,975,657 | |
| 5. Implementation Expenses | \$2,379,917 | |
| 6. Benefit / Cost Percentage of Implementaton Expenses | 2.75% | |
| 7. Lifetime kWh Percentage of Implementation Expenses | 2.75% | |
| 8. Commercial & Industrial Performance Incentive | \$130,895 | |
| 9. Maximum Commercial & Industrial Performance Incentive (6.875%) | \$163,619 | |
| Residential Incentive | | |
| 10. Benefit / Cost Ratio | 2.33 | |
| 11. Threshold Benefit / Cost Ratio ¹ | 1.00 | |
| 12. Lifetime kWh Savings | 19,420,600 | |
| 13. Threshold Lifetime kWh Savings (65%) | 12,623,390 | |
| 14. Implementation Expenses | \$1,680,951 | |
| 15. Benefit / Cost Percentage of Implementation Expenses | 2.75% | |
| 16. Lifetime kWh Percentage of Implementation Expenses | 2.75% | |
| 17. Residential Performance Incentive | \$92,452 | |
| 18. Maximum Residential Performance Incentive (6.875%) | \$115,565 | |
| 19. TOTAL PLANNED / EARNED INCENTIVE | \$223,348 | |

Notes

- 1. Actual Benefit / Cost Ratio for each sector must be greater than or equal to 1.0.
- 2. Actual Lifetime kWh Savings for each sector must be greater than or equal to 65% of projected savings.
- 3. Benefit Cost ratios are Nominal\$/Nominal\$

*Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumptions

- 1. The Annual kWH Savings for LEDs were adjusted to reflect the weighted average of bulbs they are intended to replace (using halogen wattages, per the Energy Security & Independence Act of 2007).
- 2. Appliance Energy Savings have been updated per the EPA Energy Star Appliance Calculators and NH evaluation results.
- 3. Program Summary quantity total divides LED Lighting Products by 4, plus all other quantities; Note Heat Pumps are split into two measure lines to account for different load shapes. As such, the quantities are only counted once for Air Source & Ductless Mini-Split systems

^{*}Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

^{1.} For LED Annual kWh savings, we assumed the same weighted average energy savings as the lighting program but longer hours use (3 hours/day vs. 2 hours/day as the program requires retrofit lights to be on 3 or more hours/day). The measure life for LEDs has been updated to 5 years

^{2.} Ancillary kWh Savings are no longer separated as they are included in the weatherization measure savings as approporiate.

^{*}Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

Planning Assumptions

- 1. Annual Savings were updated based on recent trends and reflect expected project sizes.
- 2. Since this is funded by RGGI, the 2018-2020 Plan includes some Weatherization Projects and as well as incentives for customers replacing heating systems to upgrade to more efficient models.

| Total Commercial and Industrial | \$ | 7,343,205 | \$ 4,992,426 | \$ | 12,335,631 | 945,482 | 572,681,339 | \$ | 7.77 | \$ | 0.00872 | \$ | 0.02154 |

^{*} Excludes the outdoor lighting Rate OL and the Customer/Meter charge revenue from each rate

⁽a) For Rate G-2, the demand charge is excluded from the average rate calculation as ratchet for rate class is under internal review.

Liberty Utilities (Granite State Electric) d/b/a Liberty Utilities NHPUC Docket No. DE 17-136 Revised Attachment F3 Page 8 of 11

Bill Impacts of Changes in System Benefits Charge - Liberty Utilities (Granite State Electric) d/b/a Liberty Utilities

| | Cur | rent Rates* | 2 | 2019 |
|---|-----|-------------|-------|--------|
| System Benefits Charge (\$/kWh) | \$ | 0.00457 | \$ 0 | .00535 |
| Bill per month, including PSNH default energy service | | | | |
| Residential Rate D (650 kWh/month) | \$ | 123.44 | \$ | 123.95 |
| Rate G-2, 25 kW, 9,000 kWh per month | \$ | 1,428.36 | \$ 1, | 436.20 |
| Change from previous rate level - \$ per month | | | | |
| Residential Rate D (650 kWh/month) | | | \$ | 0.51 |
| Rate G-2, 25 kW, 9,000 kWh per month | | | \$ | 7.84 |
| Change from previous rate level - % | | | | |
| Residential Rate D (650 kWh/month) | | | | 0.41% |
| Rate G-2, 25 kW, 9,000 kWh per month | | | | 0.55% |

^{*} Stated at Liberty's most recent rate levels (effective August 1, 2018). Rate G-2 energy service rate is based on December 1, 2018 rate.

Performance Incentive Calculation 2019

| | <u>Planned</u> | <u>Actual</u> |
|---|----------------|---------------|
| Commercial/Industrial Incentive | | |
| 1. Benefit/Cost Ratio | 1.67 | |
| 2. Threshold Benefit / Cost Ratio ¹ | 1.00 | |
| 3. Lifetime kWh Savings | 94,678,039 | |
| 4. Threshold Lifetime kWh Savings (65%) ² | 61,540,725 | |
| 5. Implementation Expenses | \$2,672,168 | |
| 6. Benefit / Cost Percentage of Implementaton Expenses | 2.75% | |
| 7. Lifetime kWh Percentage of Implementation Expenses | 2.75% | |
| 8. Commercial & Industrial Performance Incentive | \$146,969 | |
| 9. Maximum Commercial & Industrial Performance Incentive (6.875%) | \$183,712 | |
| Residential Incentive | | |
| 10. Benefit / Cost Ratio | 1.73 | |
| 11. Threshold Benefit / Cost Ratio ¹ | 1.00 | |
| 12. Lifetime kWh Savings | 18,315,887 | |
| 13. Threshold Lifetime kWh Savings (65%) | 11,905,327 | |
| 14. Implementation Expenses | \$2,706,617 | |
| 15. Benefit / Cost Percentage of Implementation Expenses | 2.75% | |
| 16. Lifetime kWh Percentage of Implementation Expenses | 2.75% | |
| 17. Residential Performance Incentive | \$148,864 | |
| 18. Maximum Residential Performance Incentive (6.875%) | \$186,080 | |
| 19. TOTAL PLANNED / EARNED INCENTIVE | \$295,833 | |

Notes

- 1. Actual Benefit / Cost Ratio for each sector must be greater than or equal to 1.0.
- 2. Actual Lifetime kWh Savings for each sector must be greater than or equal to 65% of projected savings.
- 3. Benefit Cost ratios are Nominal\$/Nominal\$

^{*}Program Summary Total Savings Values are Net (Multiplied by the Realization Rate)

- 1. Annual Savings based on recent trends and reflect expected project sizes.
- 2. US DOE WAP Collaboration: The federal Weatherization Assistance Program is expected to fund additional work and achieve additional MMBTU Savings.
- 3. For gas heated homes, customer may be served by both gas and electric utilities in this program, but gas companies will pay for the weatherization project up to their cap first and will claim associated MMBTU savings.

Docket No. DG 18-XXX

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara

Page 3 of 17

explains the Company's proposed firm sales cost of gas rates for the 2019 Summer (Off-Peak) Period.

3 II. WINTER 2018/19 COST OF GAS FACTOR

- 4 Q. What are the proposed firm Winter sales and firm transportation cost of gas rates?
- 5 A. The Company proposes a firm sales cost of gas rate of \$0.7411 per therm for residential
- 6 customers, \$0.7403 per therm for commercial/industrial high winter use customers, and
- 50.7456 per therm for commercial/industrial low winter use customers as shown on
- 8 Proposed First Revised Page 92 (Bates 050). The Company proposes a firm
- 9 transportation cost of gas rate of \$0.0005 per therm as shown on Proposed First Revised
- 10 Page 94 (Bates 052).
- 11 Q. Please explain tariff page Proposed Original Page 92.1 (Bates 051) and Proposed
- First Revised Page 92.
- 13 A. Proposed Original Page 92.1 and Proposed First Revised Page 92 contain the calculation
- of the 2018/19 Winter Period Cost of Gas Rate and summarize the Company's forecast of
- firm gas costs and firm gas sales. As shown on Page 92, the proposed 2018/19 Average
- 16 Cost of Gas of \$0.7411 per therm is derived by adding the Direct Cost of Gas Rate of
- \$0.7056 per therm to the Indirect Cost of Gas Rate of \$0.0355 per therm. The estimated
- total Anticipated Direct Cost of Gas, derived on Page 92.1 and repeated on Page 92, is
- 19 \$61,003,856. The estimated Indirect Cost of Gas, also derived on Page 92.1 and repeated
- on Page 92, is \$3,070,244. The Direct Cost of Gas Rate of \$0.7056 and the Indirect Cost

Page 5 of 17

| 1 2 3 4 5 | | Fuel Inventory Revenue Requirement Broker Revenues Transportation COG Revenue Capacity Release Margin Fixed Price Administrative Cost 351,017 (497,759) (26,381) (1,877,737) Fixed Price Administrative Cost |
|-----------------------|----|---|
| 6 | | Total Adjustments \$656,690 |
| 7 | | These allowable adjustments are standard adjustments made to the deferred gas cost |
| 8 | | balance through the operation of the Company's cost of gas adjustment clause. We |
| 9 | | discuss the factors contributing to the prior period under collection later in this testimony. |
| 10 | Q. | How does the proposed average cost of gas rate in this filing compare to the average |
| 11 | | cost of gas rate approved by the Commission in Docket No. DG 17-135 for the |
| 12 | | 2017/18 Winter Period? |
| 13 | A. | The average cost of gas rate proposed in this filing of \$0.7411 per therm is \$0.0966 per |
| 14 | | therm more than the initial rate of \$0.6445 ¹ per therm approved by the Commission in |
| 15 | | Order No. 26,066 (October 31, 2017) in Docket No. DG 17-135. The \$0.0966 per therm |
| 16 | | increase in the rate reflects a \$2,530,984 increase in the Total Unadjusted Cost of Gas. |
| 17 | Q. | How does the proposed firm transportation winter cost of gas rate compare to the |
| 18 | | rate approved by the Commission for the 2017/18 winter period? |
| 19 | A. | The proposed firm transportation winter cost of gas rate is \$0.0005 per therm. The rate |
| 20 | | approved in Docket No. DG 17-135 was \$0.0027 per therm. The decrease in the rate |
| 21 | | relates to an estimated \$88,304 decrease in costs due to the difference between the winter |

¹ For comparison purposes, by the end of the 2017/18 Winter Period, the residential cost of gas rate increased to \$0.8056 per therm through the operation of the monthly adjustment mechanism.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities 8 of 25

Docket No. DG 18-XXX

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara Page 6 of 17

| 1 | season 2017/2018 beginning balance of \$28,808 (an over-collection) and the winter |
|---|--|
| 2 | season 2018/2019 beginning balance of (\$59,496) (an under-collection). |

- 3 Q. In the calculation of its firm transportation winter cost of gas rate, has the Company
- 4 updated the estimated percentage used for pressure support purposes?
- 5 A. Yes. The Company used, for pressure support purposes, a rate of 8.7% based on the
- 6 marginal cost study used for the rate design approved in Docket No. DG 17-048.
- Previously the Company used an estimated percentage of 9.9% for pressure support
- 8 purposes.
- 9 Q. Did the Company include a fuel inventory revenue requirement calculation in this
- filing?
- 11 A. Yes (Bates 192). The Company is proposing to collect \$351,017 in fuel inventory
- revenue requirement consistent with Order No. 26,156 dated July 10, 2018, in Docket
- No. DG 17-048. The rate of \$0.0041 per therm is determined by dividing the \$351,017
- by the estimated November 2018 through October 2019 COG sales volumes of
- 15 86,451,254 therms.
- 16 Q. How was the statutory tax rate of 27.24% calculated (Bates 192)?
- 17 A. The statutory rate of 27.24% was calculated by using a 21% federal tax rate and a 7.9%
- tax rate for the State of New Hampshire $(0.21 + 0.079 (0.21 \times 0.079) = 0.2724)$.

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities 9 of 25

Docket No. DG 18-XXX

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara

Page 7 of 17

| 1 | Q. | How was the common equity pre-tax rate of 6.290% calculated (Bates 192)? |
|----|----|---|
| 2 | A. | The common equity pre-tax rate of 6.290% was calculated by dividing the 9.30% rate of |
| 3 | | return on common equity, approved in Docket No. DG 17-048, by 0.7276 (1 -0.2724 |
| 4 | | [statutory tax rate – see previous question]) and multiplied by 49.20% (equity component |
| 5 | | of the capital structure approved in DG 17-048) $[0.930 / 0.7276 \times 0.4920 = 0.0629]$. |
| | | |
| 6 | Q. | Has the bad debt percentage in this filing of 1.7% changed from the bad debt |
| 7 | | percentage calculated in the Winter 2017/2018 Cost of Gas Reconciliation? |
| 8 | A. | Yes, the bad debt percentage of 1.7% used in this filing is the calculated rate for the |
| 9 | | period of May 2017-April 2018. The Winter 2017/2018 Cost of Gas Reconciliation |
| 10 | | included a calculated rate of 1.1%, which was inadvertently carried forward from the |
| 11 | | prior period of May 2016–April 2017. |
| | | |
| 12 | Q. | What was the actual weighted average firm sales cost of gas rate for the 2017/18 |
| 13 | | winter period? |

14 A. The weighted average cost of gas rate was \$0.7321 per therm (Bates 095 Line 54). This
15 was calculated by applying the actual monthly cost of gas rates for November 2017
16 through April 2018 to the monthly therm usage of an average residential heating
17 customer using 778 therms per year, or 636 therms for the six winter period months.

18 III. PRIOR WINTER PERIOD UNDER-COLLECTION

- 19 Q. Please explain the prior period under collection of \$2,459,330.
- A. The prior period under-collection is also detailed in the 2017/18 Winter Period

 Reconciliation that was filed with the Commission on July 27, 2018. The \$2,459,330

Liberty Utilities (Energy North Natural Gas) Corp. d/b/a Liberty Utilities $^{\rm Attachment~I3}_{\rm 10~of~25}$

Docket No. DG 18-XXX

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara Page 8 of 17

under-collection is the sum of the deferred gas cost, bad debt, and working capital overand under-collection balances as of April 30, 2018. The under-collection was driven mainly by the lag in the timing of monthly cost of gas rate adjustments as compared to changes in the underlying costs. For three months within the six-month winter period the calculated COG rate adjustment was higher than the allowable 25% price increase so the Company held the rate constant at the maximum allowable rate of \$0.8056 per therm.

8 Q. Has the Company established a winter period fixed price pursuant to its Fixed Price

Option Program?

Yes. Pursuant to Order No. 24,515 in Docket No. DG 05-127, the Fixed Price Option Program ("FPO") rates are set at \$0.0200 per therm higher than the initial proposed COG rate. Proposed First Revised Page 91 (Bates 049) contains the FPO rate for the 2018/19 Winter period, which is \$0.7611 per therm for residential customers. This compares to the FPO rate approved for the 2017/18 winter period of \$0.6645 per therm for residential customers. This represents a \$0.0966 per therm, or 14.5% increase in the residential FPO rate. The total bill impact on the winter period bills for an average FPO heating customer using 636 therms is an increase of approximately \$122.86 or 14.25% compared to last winter. The total bill impact reflects the implementation of the increases approved in Docket Nos. DG 17-048 effective May 1, 2018, and DG 18-064 effective July 1, 2018, relating to permanent distribution rates and the cast iron/bare steel main replacement program, respectively. The estimated winter period bill for an average residential heating customer opting for the FPO would be approximately \$12.71 (or 1.3%) higher than the

Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities 11 of 25

Docket No. DG 18-XXX

bill under the proposed cost of gas rates, assuming no monthly adjustments to the COG
rate during the course of the winter. Schedule 23 (Bates 189) contains the historical
results of the FPO program.

4 V. LOCAL DELIVERY ADJUSTMENT CLAUSE ("LDAC")

- 5 Q. What are the surcharges that will be billed under the LDAC?
- 6 A. As shown on Proposed First Revised Page 97 (Bates 055), the Company is submitting for approval an LDAC of \$0.0836 per therm for the residential non-heating class and 7 residential heating class, and \$0.0772 per therm for the commercial/industrial bundled 8 sales classes, effective November 1, 2018. The surcharges proposed to be billed under 9 the LDAC are the Energy Efficiency Charge, the Revenue Decoupling Adjustment 10 Clause, the Energy Efficiency Resource Standard Lost Revenue Adjustment Mechanism, 11 the Environmental Surcharge for Manufactured Gas Plant ("MGP") remediation, the 12 Residential Low Income Assistance Program charge, and the rate case expense 13 reconciliation surcharge from Docket No. DG 17-048. 14

15 Q. Which customers are billed an LDAC?

A. All EnergyNorth customers including those in Keene are billed an LDAC charge. When calculating the LDAC charge, the November 1, 2018, through October 31, 2019, forecasted Keene therm sales of 1,451,361 are added to the EnergyNorth therm sales forecast of 183,203,513 for a total therm sales forecast of 184,654,874.

| Q. | Please explain the Energy Efficiency Charge. |
|----|--|
|----|--|

1

- 2 A. The Energy Efficiency Charge is designed to recover the projected expenses associated with the Company's energy efficiency programs for Calendar Year 2019 that will be filed 3 with the Commission in the near future. In the calculation of the Energy Efficiency 4 Charge, the Company has also included the projected prior period over-recovery of the 5 Company's residential and commercial energy efficiency programs as of October 2018. 6 7 As shown on Schedule 19 Energy Efficiency (Bates 125-127), the proposed Energy Efficiency charge is \$0.0450 per therm for Residential customers and \$0.0387 per therm 8 for commercial and industrial customers. 9 0. Please explain the Revenue Decoupling Adjustment Clause ("RDAC"). 10 The first RDAC will not take effect until November 1, 2019, after the first decoupling A.
- 11
- year is complete. It is designed to recover, on an annual basis, the difference between the 12
- Actual Base Revenue per Customer and the Benchmark Base Revenue per Customer. 13
- 14 The Actual Base Revenue per Customer is calculated after the first decoupling year.
- Schedule 19 RDAC (Bates 122) shows the proposed Benchmark Base Revenue per 15
- Customer calculation effective November 1, 2018, through October 31, 2019. 16
- Please explain the Energy Efficiency Resource Standard Lost Revenue Adjustment Q. 17 Mechanism ("LRAM"). 18
- A. As shown on Schedule 19 LRAM (Bates 120-121), the proposed LRAM charge is 19
- \$0.0003 per therm for residential customers and \$0.0001 per therm for commercial and 20
- industrial customers. It is designed to recover lost revenues associated with energy 21

Liberty Utilities (Energy North Natural Gas) Corp. d/b/a Liberty Utilities $^{\rm Attachment~I3}_{13~\rm of~25}$

Docket No. DG 18-XXX

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara Page 11 of 17

- efficiency measures installed under the EERS programs. Since the Company is implementing decoupling effective November 1, 2018, the Company will continue to implement its Lost Revenue Adjustment only as a prior period true-up mechanism effective November 1, 2018, and ending October 31, 2019.
- 5 Q. What is the proposed Residential Low Income Assistance Program ("RLIAP")
- 6 charge?
- As shown on Schedule 19 RLIAP (Bates 123-124), the proposed RLIAP charge is 7 A. 8 \$0.0130 per therm. It is designed to recover administrative costs, revenue shortfall, and 9 the prior period reconciliation adjustment relating to this program. For the 2018/19 Winter Period, the Company is providing a 60% base rate discount, consistent with the 10 settlement agreement approved by the Commission in Order No. 24,669 (Sept. 22, 2006) 11 in Docket No. DG 06-120. The current RLIAP charge is designed to recover \$2,409,164, 12 of which \$1,864,087 is for the revenue shortfall resulting from 5,056 customers receiving 13 14 a 60% discount off their base rates, and \$545,077 for the prior year reconciling adjustment. 15
- 16 Q. In Order No. 24,824 (Feb. 29, 2008) in Docket No. DG 06-122 relating to short-term
 17 debt issues, the Company agreed to adjust its short-term debt limits each year as
 18 part of the Company's Winter Period Cost of Gas filing. Did the Company

Liberty Utilities (Energy North Natural Gas) Corp. d/b/a Liberty Utilities $^{\rm Attachment \, I3}_{14 \, {\rm of} \, 25}$

Docket No. DG 18-XXX

18

19

20

21

A. Yes, the Company included in Schedule 24 (Bates 190) the short-term debt limit for fuel and non-fuel purposes for the 2018/19 period. As shown, the short-term debt limit for fuel inventory financing for the period November 1, 2018, through October 31, 2019, is calculated to be \$19,222,230 and the limit for non-fuel purposes is calculated to be \$94,878,262.

8 Q. Has the Company updated the Environmental Surcharge (Tariff Page 95)?

Yes, it has. The costs submitted for recovery through the MGP remediation cost recovery mechanism, as well as the third party recoveries, are included in the Environmental Cost Summary in Schedule 20 (Bates 128) of this filing. The environmental investigation and remediation costs that underlie these expenses are the result of efforts by the Company to respond to its legal obligations with regard to these sites, as described by Ms. Casey in her pre-filed direct testimony in this proceeding and as set forth in the MGP site summaries included in this filing under Schedule 20. The Summary included in Schedule 20 shows the remediation cost pools for the Concord Pond, Concord MGP, Manchester, Nashua, and Laconia sites, and a General Pool for costs that cannot be directly assigned to a specific site.

A summary sheet and detailed backup spreadsheets that support the 2017/18 costs are provided in Schedule 20 of this filing. Consistent with past practice, the Company met with the Commission Staff and OCA in August of this year to provide an update on the

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara Page 13 of 17

| 1 | | status of environmental matters. Ms. Casey's testimony describes the Company's |
|----|----|---|
| 2 | | activities with regard to all five sites. |
| 3 | Q. | Please describe how the Company calculated the Environmental Surcharge included |
| 4 | | in this filing. |
| 5 | A. | The proposed Manufactured Gas Plant Remediation surcharge for the period beginning |
| 6 | | November 1, 2018, and ending October 31, 2019, is \$0.0161 per therm. This surcharge |
| 7 | | will recover a total of \$2,970,867 in amortized remediation costs. The costs submitted |
| 8 | | for recovery are shown in the Environmental Cost Summary included in Schedule 20 of |
| 9 | | this filing. |
| 10 | Q. | Did the Company include a Rate Case Expense (RCE) surcharge in this filing? |
| 11 | A. | Yes. As shown on Schedule 19 RCE (Bates 118-119), the Company is proposing to |
| 12 | | collect \$1,706,158 in uncollected rate case and recoupment expense consistent with |
| 13 | | Order No. 26,122 dated April 27, 2018, in Docket No. DG 17-048. The RCE rate of |
| 14 | | \$0.0092 per therm is determined by dividing the \$1,706,154 by the estimated November |
| 15 | | 2018 through October 2019 sales volumes of 184,654,874 therms. |
| 16 | Q. | Has the Company also updated its Company Allowance percentage for the period |
| 17 | | November 2018 through October 2019 in accordance with Section 8 of the |
| 18 | | Company's Delivery Terms and Condition? |
| 19 | A. | Yes, in Schedule 25 (Bates 191) the Company has recalculated its Company Allowance |
| 20 | | for the period November 2018 through October 2019. The Company calculated the |
| 21 | | Company Allowance of 1.80% based on sendout and throughput data for the twelve- |

Page 14 of 17

- month period ending June 2018. The Company proposes to apply this recalculated
- 2 Company Allowance to all supplier deliveries beginning in November 2018.

3 VI. CUSTOMER BILL IMPACTS

- 4 Q. What are the estimated impacts of the proposed firm sales cost of gas rate and
- 5 proposed LDAC surcharges on an average heating customer's winter bill as
- 6 compared to the winter rates in effect last year?
- 7 A. The bill impact analysis is presented in Schedule 8 (Bates 095) of this filing. These bill
- 8 impacts reflect the implementation of the increases approved in Docket Nos. DG 17-048
- 9 effective May 1, 2018, and DG 18-064 effective July 1, 2018, relating to permanent
- distribution rate increases and the cast iron/bare steel main replacement program. The
- total bill impact over the winter period for an average residential heating customer is an
- increase of approximately \$67.17, or 7.42%. The total bill impact over the winter period
- for an average commercial/industrial G-41 customer is an increase of approximately
- \$86.13, or 3.38% (Bates 096). Schedule 8 of this filing provides more detail of the
- impact of the proposed rate adjustments on heating customers.

16 VII. OTHER TARIFF CHANGES

- 17 Q. Is the Company updating its Delivery Terms and Conditions in the filing?
- 18 A. Yes. The Company is submitting Proposed First Revised Page 147 (Bates 056) relating
- to Supplier Balancing and Peaking Demand Charges and Proposed First Revised Page
- 20 148 (Bates 057) relating to Capacity Allocation.

Liberty Utilities (Energy North Natural Gas) Corp. d/b/a Liberty Utilities $_{17\ \rm of\ 25}^{\rm Attachment\ I3}$

|---|--------------|----------------|--------|-------------|------------|-----------|
| 1 | \mathbf{v} | I ICASC UCSCII | | ciiaiizes i | io iai iii | I age IT/ |

- 2 A. In Proposed First Revised Page 147, the Company is updating the Peaking Demand
- Charge from \$20.06 per MMBtu of Peak MDQ to \$20.41 per MMBtu of Peak MDQ.
- This calculation is also presented in Schedule 21 (Bates 180).
- 5 Q. Please describe the changes to tariff Page 148.
- 6 A. Proposed First Revised Page 148 updates the Capacity Allocator percentages used to
- allocate pipeline, storage, and local peaking capacity to high and low load factor
- 8 customers under the mandatory capacity assignment requirement for firm transportation
- service. Schedule 22 (Bates 183-188) contains the six-page worksheet that backs up the
- 10 calculations for the updated allocators.

11 VIII. SUMMER 2019 COST OF GAS FACTOR

- Q. What are the proposed 2019 summer firm sales cost of gas rates?
- 13 A. The Company proposes a firm sales cost of gas rate of \$0.4445 per therm for residential
- customers, \$0.4417 per therm for commercial/industrial high winter use customers, and
- \$0.4506 per therm for commercial/industrial low winter use customers as shown on
- Proposed Seventh Revised Page 89 (Bates 200).
- 17 Q. Please explain tariff pages Proposed First Revised Page 88 and Proposed Seventh
- 18 **Revised Page 89.**
- 19 A. Proposed First Revised Page 88 (Bates 199) and Proposed Seventh Revised Page 89
- 20 contain the calculation of the 2019 Summer Period Cost of Gas Rate and summarize the
- 21 Company's forecast of firm gas sales, firm gas sendout, and gas costs. On Proposed

Docket No. DE 17-136
Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities 18 of 25
Docket No. DG 18-XXX

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara Page 16 of 17

| 1 | | Seventh Revised Page 89, the 2019 Average Cost of Gas of \$0.4445 per therm is derived |
|----|----|--|
| 2 | | by adding the Direct Cost of Gas Rate of \$0.4354 per therm to the Indirect Cost of Gas |
| 3 | | Rate of \$0.0091 per therm. The estimated total Anticipated Direct Cost of gas is |
| 4 | | \$8,661,183 and the estimated Indirect Cost of Gas is \$181,903. The Direct Cost of Gas |
| 5 | | Rate and the Indirect Cost of Gas Rates are determined by dividing each of these total |
| 6 | | cost figures by the projected Summer firm sales volumes of 19,890,267 therms. |
| 7 | | Proposed Seventh Revised Page 89 further shows that the Residential Cost of Gas Rate of |
| 8 | | \$0.4445 per therm is equal to the Average Cost of Gas for all firm sales customers. It |
| 9 | | also shows the calculation of the Commercial/Industrial High Winter Use Cost of Gas |
| 10 | | Rate of \$0.4417 per therm and the Commercial/Industrial Low Winter Use Cost of Gas |
| 11 | | Rate of \$0.4506 per therm. |
| | | |
| 12 | | The calculation of the Anticipated Direct Cost of Gas is shown on Proposed First Revised |
| 13 | | Page 88. To derive the total Anticipated Direct Cost of Gas of \$8,661,183, the Company |
| 14 | | starts with the Unadjusted Anticipated Cost of Gas of \$8,002,703 and adds the Net |
| 15 | | Adjustment totaling \$658,480. |
| | • | |
| 16 | Q. | What are the components of the Unadjusted Anticipated Cost of Gas? |
| 17 | A. | The Unadjusted Anticipated Cost of Gas consists of the following: |
| 18 | | 1. Purchased Gas Demand Costs \$4,372,669 |
| 19 | | 2. Purchased Gas Supply Costs 3,602,943 |
| 20 | | 3. Produced Gas Costs <u>27,091</u> |
| 21 | | Total Unadjusted Anticipated Cost of Gas <u>\$8,002,703</u> |

Docket No. DE 17-136

Winter 2018/2019 Cost of Gas & Summer 2019 Cost of Gas Direct Testimony of David B. Simek and Catherine A. McNamara Page 17 of 17

| 1 | Q. | What are the components of the adjustments to the | ne cost of gas? |
|----|----|--|--|
| 2 | A. | The adjustments to gas costs, listed on proposed Firs | t Revised Page 88, are as follows: |
| 3 | | 1. Prior Period (Over)/Under Collection | \$617,043 |
| 4 | | 2. Interest | 41,437 |
| 5 | | Total Adjustments | <u>\$658,480</u> |
| | | | |
| 6 | Q. | How does the proposed average Residential Summ | ner cost of gas rate in this filing |
| 7 | | compare to the initial cost of gas rate approved by | y the Commission for the 2018 |
| 8 | | Summer Period? | |
| 9 | A. | The cost of gas rate proposed in this filing is \$0.1312 | 2 per therm higher than the initial rate |
| 10 | | approved by the Commission for the 2018 Summer F | Period (\$0.4445 vs. \$0.3133) |
| 11 | | (Schedule 8, Bates 224). This increase is primarily d | lue to an \$874 thousand anticipated |
| 12 | | increase to the Supply Costs. | |
| 13 | Q. | Does this conclude your testimony? | |

14

A.

Yes, it does.

Notos:

- 1) The Planned Savings Therms were presented as MMBtu in the joint utilities' initial September 14, 2018 Core Energy Efficiency Filing.
- 2) The Residential Annualized Therm Savings were presented as MMBtu in the joint utilities' initial September 14, 2018 Core Energy Efficiency Filing. The resulting LBR was under-estimated by a magnitude of 10.
- 3) The Commercial & Industrial Annualized Therm Savings were incorrect in the joint utilities' initial September 14, 2018 Core Energy Efficiency Filing. The impact to savings was approximately 2,000 therms annually.

Note: Recast denotes change from accounting records. Savings recast to match original budget. Lost revenue is calculated based on original estimated savings. The final reconciliation using actual savings will be provided in the June 2019 filing. The Average Distribution rate for Residential and C&I Classes for the months of January thorugh April 2018 are from the 2017 Annual Report (LRR Page 4 of 22) in Docket No. DE 14-216 on June 1, 2018.

Year 2019
Savings and lost revenues are estimated on a calendar year basis. Does not include prior cumulative savings.

Comments

- 1 Legacy portion utilizes old methodology for calculating LBR i.e. it utilizes a combined ADR for measures installed in 2017 and 2018.
- 2 Actual LBR Savings differ from program savings as the 110% LBR cap was reached
- 3 New metholody disaggregates kWh and kW components as specified in the Settlement Agreement in DE 17-136 (Order No. 26,095).

^{*}Numbers may not add due to rounding.

Comments

- 1 Legacy portion for Granite State Electric is zero due to the fact that 2018 is a test year and savings and sales are set back to zero.
- 2 N/A
- 3 New metholody disaggregates kWh and kW components as specified in the Settlement Agreement in DE 17-136 (Order No. 26,095). Liberty is only including savings associated with its G-1 customers based on the fact that the G-2 customer class ratchets were not analyzed during the working group process and Liberty agreed to remove LBR for rate G-2 from the LBR calculation.

^{*}Numbers may not add due to rounding.

Comments:

12 Total Forecasted LBR - Year 2019 for Settlement Purposes

- (1) Legacy portion utilizes old methodology for calculating LBR i.e., it utilizes a combined ADR for measures installed in 2017 and 2018.
- (2) New Methodology disaggregates kWh and kW components as specified in the Settlement Agreement in DE 17-136 (Order No. 26,095).

210,579 \$

374,092 \$

41,328 \$

625,998

Line 8 + Line 11

(3) The total C&I kW LBR amounts in line 11 differ from Exhibit 19 due to a correction made in the annualization of kW savings.

This difference of \$18,942 changes the 2019 ending balance from (\$3,262) to \$15,987 (or a rate impact of \$0.00001/kWh).

Given the relatively small magnitude of this difference, and since differences from the plan will be reconciled at the time of the annual report, the Company does not plan to request a change to the LBR rate that was approved effective January 1, 2019.

Liberty Utilities (EnergyNorth Natural Gas) d/b/a Liberty Utilities NHPUC Docket No. DE 17-136

Attachment L5
Page 1 of 1

Per Order No. 26,122 dated April 27, 2018, EnergyNorth Natural Gas received approval of its decoupling mechanism. Page 45 of the Order states, "The Commission's order in the EERS docket set the stage for utilities to propose decoupling mechanisms to replace the LRAM. The LRAM was intended to be a temporary measure to remove the disincentive for utilities to undertake energy efficiency programs. We applaud Liberty for proposing decoupling mechanism to replace the LRAM." The following calculation does not apply to EnergyNorth Natural Gas as of November 1, 2018, the date by which the decoupling mechanism takes effect.
