Subject: Liberty Utilities Lied

Utilities Commission,

Dear Public Utilities Commissioners,

I would like to ask you to oppose the Granite Bridge pipeline and tank. I recently heard that Liberty Utilities plans to sell gas from Granite Bridge to an electricity producer in Londonderry (ironically named Granite Ridge). For the past 11 months, Liberty Utilities has been telling us we need the Granite Bridge pipeline so we can heat our homes. It's unacceptable for Liberty Utilities to have misled us for this long but now that we know they want to use this gas to generate electricity it seems obvious that we should deny the pipeline. Utilizing solar and wind instead of natural gas would not only be more sustainable, it would also be better for New Hampshire's economy. Local energy like wind and solar will create long-term jobs in our state and keep the money we spend on energy in New Hampshire. Please stop Granite Bridge.

I live one mile from the proposed site of the tank and really want you to pay attention to why this is even being proposed.

Everyone knows that global warming is real and that adding more fossil fuel projects to our beautiful state will be what will destroy all that we love in the end.

I urge you to consider all of us who share these precious resources and to fight against those who are simply looking out for their own profits.

Please add my name to the list of NH Residents who want the Granite Bridge/Pipeline Project shut down.
