**Subject:** Warning! Stranded Assets

Utilities Commission,

Dear Public Utilities Commissioners,

I am writing in hopes that you will not issue any permits to Liberty Utilities for the Granite Bridge Pipeline. Building new fossil fuel infrastructure when we know we need to be transitioning to 100% renewable energy leaves ratepayers with a significant risk for stranded assets. When our legislature at the local or national level succeed in passing carbon pricing legislation and when other states go the route of NY and ban fracking, the price of methane gas will increase making this project obsolete. But these failed investments don't come out Liberty Utilities' bottom line. Instead, the ratepayers are forced to absorb the costs. Don't leave ratepayers out to dry. Please stop the Granite Bridge pipeline.

Kiley Prinz
