Dear Public Utilities Commissioners,

I write to object most strongly to your 50-page order (Nov. 12, 2021) discussed at length by Donald M. Kreis (IndepthNH, Dec. 2, 2021). Kreis reasons that the order is “gutting our state’s ratepayer-funded energy efficient programs.” That conclusion is appalling. What was the Commission thinking? I don’t have to point out the obvious: that global warming and climate change is an undeniable reality and New Hampshire should be a leader in energy efficient (I have as many solar panels as the structure can carry).

Please assure me in a return email that you will (or already have) reverse course and restored our energy efficient programs.

Respectfully,

Kent
