To Whom it May Concern;

My Wife and I are residents of Litchfield NH and have been for over 10 years we have noticed a decline in water quality and color as the time has gone by and has not improved in the least. We have been forced to buy a water filter to filter the water we drink and cook with which requires filter replacement monthly. This is another added expense that was not factored in the budget which doesn't help coupled with this pandemic which has impacted our family financially. Nevertheless an increase of any amount for an already poor quality water is absurd unless the problem is corrected. All of us in Litchfield are fed up with the decline of water quality and discolor which gives us great concern as to what exactly are we getting in our water supply. Our family would like to know as well as our Neighbors what your intentions and proposed solution is for this water discoloration and poor water quality prior to the need for said increase as we all feel that this is not warranted due to the concern not being corrected just a band aid to appease us. We look to you for help in this situation and the proposed increase for water bill which has not been corrected and or resolved. Thank you for all your help and concerns with this matter.

Regards:
