

Public Service Company of New Hampshire d/b/a Eversource Energy
Docket No. IR 22-042

Date Request Received: December 30, 2022
Data Request No. RR 3-001A

Date of Response: January 04, 2023
Page 1 of 1

Request from: New Hampshire Public Utilities Commission

Request:

Reference response to question one (identified in the response as Response 1 to Data Request RR 3-001): For each avoided cost category (identified by roman numerals i-vi in the underlying question), please specifically respond Yes or No to whether those avoided cost categories benefit participants (i., ii., and iii.) and non-participants (iv., v., and vi.).

Response:

The avoided cost streams as developed in the regional AESC do not distinguish between participant and non-participant benefits, and therefore the benefits categories i through vi are not delineated in the way requested in the Utilities' benefit-cost models. However, the reduction of energy usage benefits both participants and non-participants.
