Re: Pittsfield Aqueduct Company, Inc. - NHPUC Annual Report 2020

Dear Ms. Gilpatric:

Pursuant to Rule 609.04 F-16 – Water Annual Report - Attached is an electronic filing of the 2020 Annual Report, 2020 Unaccounted Water Report and the Short Debt Limit Threshold Calculations for Pittsfield Aqueduct Company, Inc. Pursuant to the notice issued by the Commission on March 17, 2020, suspending all Commission rules requiring the filing of paper copies until further notice, pursuant to its rule waiver authority under PUC 201.05, we are electing to only file an electronic form on this Annual Report with the Commission. We are maintaining the original copies on file which can be made available to the Commission upon request. Additionally, I am filing within the extended time frame of April 30, 2021, granted by Debra A. Howland, Executive Director on April 1, 2021.

Overall, the operating and maintenance expenses increased 8.38% or \$34,312 from the prior year. The primary reason for this change is due to the items noted below. These represent explanations for expense variances with a 10% increase (decrease) or more from calendar year 2019 to calendar year 2020:

Account 6623: Fuel or Power Purchased for Pumping decreased 32.84% or \$2,638. This is primarily due to a decrease in electric supply rate from \$0.0863 per KwHR in 2019 to \$0.0695 per KwHR in 2020.

Account 6624: Pumping Labor and Expenses increased 20.02% or \$13,841 primarily due to increased time spent fine tuning treatment plant operations to comply with Disinfection Byproducts Rule in 2020 versus 2019.

Account 6631: Maintenance of Structures and Improvements increased 38.68% or \$9,206 due to increased time spent maintaining the Berry Pond dam during 2020 versus 2019.

Account 6641: Chemicals increased 30.33% or \$1,632 primarily due to increase expense and usage associated with Soda Ash at the WTP.

Account 6642: Operation Labor and Expenses increased primarily 107.90% or \$2,629 due to increased water quality sampling associated with PFAS and Cyanobacteria monitoring that was not in effect in 2019.

Account 6652: Maintenance of Water Treatment Equipment increased 27.88% or \$1,955 primarily due to increase maintenance costs for this equipment in 2020 versus 2019.

Account 6663: Meter Expenses decreased 70.27% or \$6,550. This decrease is primarily due to the suspension of the majority periodic meter testing in 2020 due to CoVID and the need to limit access into customer premises except for emergency repair purposes.

Account 6665: Miscellaneous Expenses decreased 99.36% or \$78 primarily due to a reduction in small tools expenses in 2020 versus 2019.

Account 6673: Maintenance of Transmission & Distribution Mains increased 486.76% or \$20,282. This increase was attributed to two leak repairs being completed in 2020 versus 2019 with one of the leak repairs being completed within the Route 28 Right of Way that required substantial restoration.

Account 6675: Maintenance Services decreased 35.63% or \$13,039 due to less work being performed on services in 2020 versus 2019.

Account 6676: Maintenance of Meter increased 57.49% or \$689 due to the rebuilding of several failed meters that occurred in 2020 that did not occur in 2019.

Account 6677: Maintenance of Hydrants increased 124.66% or \$5,789. This increase was attributed to completing two hydrant inspections per hydrant in 2020 (a wet and a dry check) versus only completing a single dry check per hydrant in 2019.

Account 6678: Maintenance of Miscellaneous Equipment decreased 36.85% or \$1,756 due to decreased dig safe markings in 2020 versus 2019.

Account 6902: Meter Reading Expenses decreased 16.53% or \$461 due to less final reads associated with account transfers and less meter reading exceptions in 2020 versus 2019.

Account 6903: Customer Records and Collection Expenses decreased 12.67% or \$1,089. This decrease is due to the limits on shut off activity that resulted in 2020 as a result of CoVID.

Account 6904: Uncollectible Accounts decreased 64.82% or \$2,656 primarily due to This reflects less accounts being classified as uncollectible in 2020 vs. 2019 due to a change in the Company's write off policies associated with CoVID. Many accounts that would have been written off in the past were not written off in 2020 based on the inability to perform shut offs associated with CoVID.

Account 6921: Office Supplies and Other expenses decreased 69.17% or \$2,543 primarily due to reduced phone expense in 2020 versus 2019.

Account 6923: Outside Services Employed decreased 100% or \$8,972 due to a reduction in legal fees associated with the completion of PAC's property tax abatement proceedings that was completed in 2019. No corresponding legal services were provided to PAC in 2020.

Account 6924: Property Insurance decreased 14.96% or \$1,593 due to lower property insurance premium in 2020 versus 2019.

Account 6930: Miscellaneous General Expense increased 10.77% or \$18,859. This increase was primarily due to an increase in the PWW intercompany management fee for 2020 versus 2019.

** For each amount comprising the reported balance and changes in Account 104, Utility Plant Purchased or Sold, state the property purchased or sold, name of vendor or purchaser, and date of transaction.

Note B: Completed Construction Not Classified, Account 106, shall be classified in this schedule according to prescribed accounts, on an estimated basis if necessary, and the entries included in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (c). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, a tentative distribution of such retirements, on an estimated basis with appropriate contra entry to the account for accumulated depreciation provision, shall be included in column (d). Include also in column (d) reversals of tentative distributions of prior year of unclassified retirements. Attach an insert page showing the account distributions of these tentative classifications in columns (c) and (d) including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the tests of Accounts 101 and 106 will avoid serious omissions of the reported amount in respondent's plant actually in service at end of year. In the space below. describe briefly each major adjustment or transfer included in columns (e) and (f) above.

Notes:

- (1) Fire and meter counts are based on services that have been active for billing purposes at one time and not abandoned. Customer counts do not match the number of meters and fire services since an account could be both metered and have fire services. Additionally, the number of hydrants may only represent a few accounts.

S-1 REVENUE BY RATES

1. Report below, for each rate schedule in effect during the year, the thousand gallons sold, revenue, average number of customers, average thousand gallons of sales per customer, and average revenue per thousand gallons sold.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in schedule F-47 "Water Operating Revenues". If the sales under any rate schedule are classified in more than one revenue account, list the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification, the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. Number of customers should be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer shall be counted for each group of meters so added. The average number of customers means the average of the twelve figures at the close of each month.
